63, voted for Joseph L. Caven.

Mr. Quin—

1, voted for C. W. Weyman.

Joseph L. Caven having received a majority of the votes cast, was declared elected President of Common Council for one year, and was conducted to the chair by Mr. Weyman, when Mr. Bardsley administered the oath of office.

Mr. Caven, in resuming the chair for the ensuing year, made the following address :

GENTLEMEN OF COMMON COUNCIL:—I thank you for the compliment of a re-election to the Presidency of this Chamber for the year 1877. As I stood here one year ago so I

stand to-day, free from pledge or promise, controlled by one thought and one desire, that the government of the City shall be placed on a sound financial basis, the burdens of the people lightened, and our industries encouraged.

That something in that direction has been accomplished during the past year none can gainsay; that very much more could have been accomplished is equally apparent.

The appropriations for this year were reduced some \$850,000 below the Controller's estimates. They might have been reduced \$2,000,000 more without impairing the efficiency of a single department.

As our guide for the future, let me suggest some reasons why greater reductions were not made. The Councils become the servants of the departments, when they are, in fact, their masters. Heads of departments control Councils in the matter of expenses, while the converse of this proposition should be true. The number of employees in all the departments is much greater than the service required, but for political and other reasons it is very difficult to remedy this great evil. Let us be equal to the occasion.

The heads of the departments did not co-operate with Councils in their desire for retrenchment, and the reductions made were opposed in almost every instance. As the law now stands there is but one way for us to reduce our expenses and live within our income. Let the committees of this year scrutinize every department closely; cut off every unnecessary branch; dig out every dead root. In a word, run the business of the City as you do your own.

If we do this, extra appropriations will be unknown, and the tax-rate levied will pay our expenses, with probably \$500,000 of the floating debt.

The Municipal Commission appointed by the Governor may enable us to procure such legislation as will ensure re-

sponsibility, prevent appropriations beyond the tax levy, cash warrants on presentation, etc. Let us assist them.

Permit me to call attention to one branch of our public service. The contracts made by the Board of Health to clean our streets expire with this year. This work, in my opinion, can be efficiently performed by the inmates of the House of Correction. Let the House of Correction Committee, in connection with the Managers of the House of Correction, take the matter into consideration, and perfect arrangements for that purpose. This will accomplish two purposes: it will save \$300,000 and prevent lazy tramps from making the House of Correction their headquarters, thereby reducing materially the expenses of that department in addition.

I need not particularize further. Other matters will occur to you. The eyes of the people are upon us. Let us so discharge our duty that when our terms of service have expired we shall have nothing to regret.

Mr. Matthew

Moved that Council proceed to the nomination and election of a Clerk.

Which was agreed to.

Mr. Hanby

Nominated John Eckstein for Clerk.

Mr. Krumbhaar

Moved that John Eckstein be elected Clerk by acclamation.

Which was unanimously agreed to.

Mr. Lippincott

Presented the following:

IN THE COURT OF QUARTER SESSIONS OF THE PEACE FOR
THE CITY AND COUNTY OF PHILADELPHIA, THE FOLLOW-
ING APPEARS OF RECORD:

In the matter of the Contested Election of the member of
Common Council for the Tenth Ward of the City.

ELLIOTT *et al.*

vs.

LIPPINCOTT.

} Quarter Sessions.

Per curiam.

The evidence reported to us by our Examiners, shows that the return in the respondent's favor is untrue; that in point of fact the said Joseph B. Van Dusen was duly elected to said office, he having received forty-three more votes than those cast for the respondent.

And now May 1, 1877, it appearing by the testimony taken and filed by our Examiners, and also by the admission of the counsel for the petitioners and respondents that the said Joseph B. Van Dusen was duly elected a member of the Common Council from the Tenth Ward of this City, at the election held on the third Tuesday of February, 1876. It is judged and decreed

1st. That the return in favor of the said H. B. Lippincott in the premises be and is hereby vacated.

2d. That the said Joseph B. Van Dusen is the duly elected member to said office.

3. It is further adjudged that the petitioner's complaint is founded on probable cause, and hence carries costs.

Filed May 1, 1877.

I certify that the foregoing is a true and correct copy of the decree in the case there stated, as the same now remains of record in the office of the said Court of Quarter Sessions, &c., &c.

Witness my hand, and the seal
of said Court, this 1st day of
May, A. D. 1877.

J. P. GALTON,

[SEAL.]

pro Clerk.

Joseph B. Van Dusen then appeared before the Clerk's desk, and the oath of office was administered to him by his Honor Judge Pierce.

The resolution was again read.

Mr. Womrath

Moved to substitute the following resolution, viz. :

RESOLUTION

Of instruction to the Chief Engineer of the Water Department relative to
Wentz Farm Reservoir.

WHEREAS, During the late investigation in the matter of the construction of the Wentz Farm Reservoir, it was in evidence that the Water Department had issued warrants for 117,300 bricks, at thirteen dollars and fifty cents (\$13.50) per 1,000 (which had not been received), amounting to one thousand five hundred and eighty-three dollars and fifty-five cents (\$1,583.55), and had also paid for 2,000 cubic yards of rock excavation at one (1) dollar per yard, while the contract expressly stated that such excavation would only be paid for as earth excavation at thirty-eight (38) cents per yard, making an excess of one thousand two hundred and forty (1,240) dollars.

AND WHEREAS, By the certificate of John J. Thackeray, one of the sworn measurers of the City, it appears that the department has paid for about 400 cubic yards of stone masonry, at fourteen (14) dollars per yard, amounting to about five thousand six hundred (5,600) dollars in excess of the work actually done; therefore

Resolved by the Select and Common Councils of the City of Philadelphia, That the Chief Engineer of the Water Department be, and he is, hereby instructed not to draw any more warrants for work hereafter done on the said Wentz Farm Reservoir until the future work actually completed shall amount to the sum of eight thousand four hundred and twenty-three dollars and fifty-five cents (\$8,423.55).

Resolved, That the Chief Engineer be, and he is, hereby instructed that hereafter when contracts have been entered into, he shall not materially alter or amend them unless he shall have previously laid before the Select and Common Councils a plan of the proposed changes and estimated cost of the same, and obtaining the consent of said Councils to such changes and amendments.

Pending which,

Mr. Bardsley

Moved that Council do now adjourn.

Which was agreed to.

And Council adjourned till Friday, May 11, 1877, at 3 P. M.

The hour of 4 o'clock having arrived, Council resumed second reading of bill No. 334, entitled "An Ordinance to authorize the paving of Westmoreland street, from Almond street to Kensington avenue, in the Twenty-fifth Ward," which had been made the special order for that hour.

The first and only section was again read.

Mr. Bardsley

Raised the point of order, that the certificate of Surveyor attached to the bill, was not in accordance with the provisions of Section 10 of Ordinance approved December 23, 1874, constituting the Department of Highways, Bridges, and Sewers for the City of Philadelphia.

The Chair

Decided the point well taken,—

First. Because the street named in the ordinance running through two survey districts should have been signed by two District Surveyors.

Second. The certificate on the bill states that the names on the petition for paving the street “represent” the majority of the owners—it should state that they “are” a majority.

These are the express requisites of Section 10 of the Ordinance of December 23, 1874, mentioned.

Mr. Wagner

Moved to proceed to second reading of bill No. 310, entitled “An Ordinance requiring all bids and proposals to the departments of the City to be opened in their presence and the Committee having supervision over them.”

Which was agreed to.

The first and only section was again read, and agreed to.

The title was agreed to.

The bill was read a third time.

And on its final passage,

The yeas and nays were required, according to law, and were as follows :

YEAS—Messrs. Bardsley, Bromley, Clark, Copeland, Craig, Cunningham, Davis, Fox, Fullerton, Gilbert, Gunn, Haines, Hall, Hammett, Hanby, Hayhurst, Herr, Houseman, Jones, Kennedy, Klohse, Kolb, Krumbhaar, Kryder, Lawson, Marchment, Marshall, Martin, Matthews, McClung, McMullin, Merkle, Moran, F. Morgan, Mouat, Myers, Oliver, Page, Rowan, Russell, Salter, Schafer, Shedwick, Shegog, Thomas, Van Dusen, Wagner, Wallace, Womrath, Woolverton, and Caven, *Pres't*—51.

NAYS—None.

A majority of those elected having voted in the affirmative,

It was agreed to,

And the bill passed.

•

Also,

Moved to proceed to second reading of bill No. 311, entitled "An Ordinance to release certain property of Thomas W. Price from the lien of a certain judgment, and to substitute certain other property of the said Thomas W. Price in lieu thereof."

It was agreed to.

And the bill passed.

Mr. Wagner

Moved that the contract (for the construction of the Penrose Ferry bridge), between Cofrode & Saylor and the City

of Philadelphia be printed in full in the Appendix, and that a copy thereof be appended to the Ordinance approving the same.

Which was agreed to.

Council proceeded to second reading of resolution from Select Council No. 196, entitled "Resolution to establish curb lines on north side of Market street, east of Front street."

The resolution was twice read, and agreed to.

The title was agreed to.

So Common Council concurred.

Also,

Proceeded to second reading of bill from Select Council No. 184, entitled "An Ordinance to authorize the Commissioner of Markets and City Property to enter into a new lease with the Camden and Philadelphia Steamboat Ferry Company, the present lessees of Market street landing, Delaware river, north side."

The first and only section was again read, and agreed to.

The title was agreed to.

The bill was read a third time.

And on its final passage,

The yeas and nays were required, according to law, and were as follows :

YEAS—Messrs. Bardsley, Bonham, Bonsall, Bromley, Clark, R. H. Cooper, W. H. Cooper, Copeland, Craig, Fox, Gilbert, Haines, Hall, Hammett, Hayhurst, Henszey, Jones, Kennedy, Klobse, Kolb, Kryder, Lawson, Marchment, Marshall, Martin, McClung, McMonagle, McMullin, W. W. Mor-

APPENDIX No. 4.

Philadelphia, December 31, 1876.

To the Select and Common Councils.

GENTLEMEN:—The recent investigation into the affairs of the Tax Office, has made manifest to you the defects in the organization of that department; defects which I have been for some time painfully conscious of, and many of you will be my witness, that I have time and again urged upon you the necessity of immediately remedying. Although no reflection was or could be cast upon the honesty or integrity in the discharge of my official duties, nevertheless, I regret to see that three of my former clerks were detected in dishonest practices. It makes nothing for the system which allows such things possible, that two of the culprits made good the loss, and that we have ample security for the third. My idea is, that if the department was properly organized, such things could not happen. Therefore, it is, whilst this subject is fresh, I again invite your attention to it, hoping that you will agree with me in the necessity of a thorough reorganization of the department. It will afford me great pleasure in offering every facility, and impart all the information in my power, to any committee you may appoint. As the law now stands, my duties as well as that of those under me, are so sharply defined, that I have no discretionary power, and am absolutely without any authority to direct the duties of my subordinates. With immense responsibilities, I am shorn of authority and divested of power. The wonder is, that graver mistakes and greater loss has not occurred under such a system. Indeed, it is quite possible that more serious loss might have happened, had I not taken the precaution of requiring each of my clerks to give ample security. The City requires of me \$40,000, and I required of my clerks \$180,000 security. This amount, I am happy to say, will more than cover any possible loss which has or may occur during my term.

The most radical defect in the organization of the department, is in the first section of the ordinance of the Twenty-eighth of December, 1872, which requires me to have "fifteen receiving clerks." This is manifestly wrong. If the duty of receiving money was confided to one or two persons under

adequate security, there would be ten times less danger of peculation and fraud than now exists, and much of the evil justly complained of would be removed. It must be obvious to you, that with so many persons receiving money, it is practically impossible for me to supervise them, as to prevent all irregularities or at once to detect fraud.

With the system as it is, without power to change or modify it in the least, I have striven, to the best of my ability, to discharge the onerous duties of my office, and I am proud to say, that so far not one cent of the City's money has been lost.

In addition to all this, however, I consider it my duty, and I have an ambition to so perfect my department, that loss will be impossible. With this view and for this purpose, I earnestly invoke your assistance and co-operation.

Yours respectfully,

THOMAS J. SMITH,

Receiver of Taxes.

APPENDIX No. 5.

RESOLUTION

Relating to the reorganization of the Departments for assessing and collecting of Taxes.

Resolved by the Select and Common Councils of the City of Philadelphia, That a Joint Special Committee of three from each Chamber be appointed to report an Act of Assembly, reorganizing the departments for assessing and collecting taxes, and to make such examinations as may be necessary to perfect the same.

APPENDIX No. 6.

RESOLUTION

Of inquiry to the City Solicitor relative to the suit of the City of Philadelphia against the Union Passenger Railway Company, for License fees due the City.

Resolved by the Select and Common Councils of the City of Philadelphia, That the City Solicitor be instructed to inform Councils if the case of the City of Philadelphia *vs.* Union Passenger Railway Company for license fees due the City is on the trial list of the Supreme Court now being held.

APPENDIX No. 7.

RESOLUTION

Of request to his Honor the Mayor, to return a certain bill.

Resolved by the Select and Common Councils of the City of Philadelphia, That his Honor the Mayor be requested to return to Councils bill entitled "An Ordinance granting permission to the Executive Committee of St. Marks Workmen's Club and Institute, to erect a temporary frame chapel."

APPENDIX No. 8.

DEPARTMENT OF SURVEYS,

Philadelphia, January 4, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—The Hart Creek Sewer Investigating Committee has reported to you that the contract was not for a gross sum, but at certain prices per yard bid for brick work, masonry, earth excavation, &c., &c., and that the total cost

depends entirely upon the amount of work necessary to be done, which can only be determined positively at its completion, and that it has cost much more than was anticipated, in consequence of a larger amount of masonry and timber being required in the foundation work, where running sands have been found in the bottom of the trench. I believe the subject is understood by your Honorable Bodies, but there have been so many misrepresentations and false conclusions relative thereto, that a fuller statement of facts seems to be called for in order to show how unfounded they are.

The plans upon which the bids were received and the contracts made, show two sections or modes of construction; that for hard earth or rock requiring little more than a ring of brick eighteen inches in thickness, while that for soft ground or quicksand showed masonry foundations and wooden platform, the putting in of which greatly increases the quantity of earth excavations, and together nearly doubles the cost per lineal foot.

When the preliminary estimates were made, the existence of quicksands on the line was not known, and the approximate cost of \$245,000 only allowed for a small amount of masonry.

As the work progressed quicksand was found near the bottom of the trench, and the masonry had to be used as the plans and the character of the work required.

No more masonry has been put in than was absolutely necessary, and any less would most likely have resulted in the breaking of the sewer, as has been the sad misfortune to the City in some other cases.

It is difficult for any engineer to foresee what insecure foundations may be reached in public works, where the lower strata are entirely different from the surface indications.

In this instance, the original plans and dimensions, and estimates upon which the loan was based, were made by an engineer experienced in City work. The resolution directing their preparation having been passed during the term of my predecessor, they came into my hands complete a few days after my entering upon the duties of the office, and were not proportioned or estimated by me.

A discrepancy in the sewer bill threw some doubt upon the

amount of the appropriation for this sewer,. The City Controller decided when the sixth monthly estimate was presented, that \$220,000, which was less than the amount provided for Hart Creek sewer, would exhaust the appropriation. The same day that I received this information from the Controller, I reported the matter to Councils for their action, and after consultation with the City Solicitor, notified the contractor of the condition of appropriation, and that he must assume all responsibility in proceeding with the work, as he could not do it under authority from the Chief Engineer and Surveyor.

The magnitude of the work induced the contractor to open trenches in four places on the line, in order to complete the work in the specified time. The excavations extended from curb to curb, ranging from eighteen to thirty feet in depth, and frequent cavings of the quicksand bottom, placed the adjoining houses in constant jeopardy. With the risk of enormous damages, and the danger of floods before him, he deemed that the only protection for himself and the City from great losses, was to complete the work as soon as possible.

The greater part of the additional work has been done since I notified Councils, and asked them to take action in the matter. This sewer was projected to divert the water of Gunner's run from its winding course in the vicinity of Somerset street and Kensington avenue, where it ran diagonally through blocks which were rapidly being built up with houses.

What had originally been open meadow, is now closed up to a narrow channel, by the grading and paving of streets, so that slight freshets have caused much damage, and the construction of the sewer was urged upon Councils by leading citizens and physicians, who feared the spread of contagious disease, on account of the bad drainage of the neighborhood. The stream, by its winding, is two and a quarter miles in length, and is reduced by the sewer to one mile.

The greatest diameter of the sewer is sixteen and a half feet, proportioned for a rainfall of one inch per hour, which rule was adopted in this City shortly after consolidation, as the uniform guide in proportioning such work.

As I have said, no unnecessary work has been done; the sewer was examined by eminent engineers of this and foreign countries during the Centennial, who highly commended the

work as a credit to our City, and expressed surprise that a work of such magnitude could be done here at so low a price per lineal foot.

It will afford me pleasure to present any further information relative to this matter, and I respectfully and earnestly invite the most thorough scrutiny into the subject in all its details.

Respectfully submitted,

SAMUEL L. SMEDLEY,

Chief Engineer and Surveyor.

APPENDIX No. 9.

DEPARTMENT OF HIGHWAYS.

Philadelphia, January 11, 1877.

To the President and members of the Select and

Common Councils of the City of Philadelphia.

GENTLEMEN:—It frequently happens that ordinances are violated by the Passenger Railway Companies, and when called upon to enforce them, I find the remedy for their violation to be a suit before a magistrate for the recovery of a penalty, which is frequently entirely inadequate to the injury sustained by the citizens. This is forcibly illustrated just now, in my inability to compel the companies to remove the obstructions created by their snow sweepers on the public highways, as the public have been led to suppose it was my duty to do.

I have sent a communication to each of the Presidents of the Passenger Railway Companies (copy of which is enclosed), and have done all that I possibly could do under the ordinances to compel them to remove the snow, *wherever it impedes travel*, and have also instituted suit against one of the companies, to recover the penalty prescribed for neglect to comply with my order.

That the provisions of the ordinances may be effective, if Councils, in their wisdom, so deem it expedient, they should

authorize the Chief Commissioner of Highways to stop the running of the cars on any line neglecting to remove the obstructions, when ordered so to do.

Very respectfully,

WILLIAM BALDWIN,

Chief Commissioner of Highways.

—

DEPARTMENT OF HIGHWAYS,

Philadelphia, January 4, 1877.

PRESIDENT—DEAR SIR:—By ordinance of Councils, approved July 7th, 1857, and supplement thereto, approved April 1st, 1859, the several Passenger Railway Co.'s are required to remove the snow from streets occupied by them, when such snow impedes the travel on said highways, and I would hereby notify you that when any citizen or citizens shall make complaint of such obstruction, I shall forthwith require you to remove the same, under such regulations and requirements as are contained in the above mentioned ordinances.

Very respectfully,

WILLIAM BALDWIN,

Copy.

Chief Commissioner of Highways.

APPENDIX No. 10.

Philadelphia, January 11, 1877.

To the President and Members of

Select and Common Councils.

GENTLEMEN:—Sewers on Sansom, Sellers and Unity, Lombard and Palmer streets, and Snyder avenue, authorized by your Honorable bodies, were advertised for, and bids received last year, but so late in the season as to prevent the commencement of any work on them, since which time, there

has been such a decline in the price of both labor and material, that I feel it would greatly subserve the interests of the City, to re-advertise the same. Not wishing, however, to take the step without the approval of your Honorable bodies, I would respectfully call your attention to the matter, and if you coincide with me in my views on the subject, to indicate the same by a resolution requesting me to act accordingly.

Very respectfully,
WILLIAM BALDWIN,
Chief Commissioner of Highways.

APPENDIX No. 11.

RESOLUTION

Requesting the Chief Commissioner of Highways to re-advertise certain sewers.

Resolved by the Select and Common Councils of the City of Philadelphia, That the Chief Commissioner of Highways be and is hereby requested to re-advertise for bids for the construction of sewers heretofore authorized by these Councils, on the following streets, viz. :—on Sansom street, Sellers and Unity streets, Lombard street, Palmer street, and Snyder avenue.

APPENDIX No. 12.

To the Presidents and Members of the Select and
Common Councils of the City of Philadelphia.

GENTLEMEN—In compliance with a resolution of your Honorable bodies, the Building Inspectors most respectfully report that they have examined the following named theatres, halls, and places of amusement, &c., viz. :

Musical Fund Hall, situate on the south side of Locust street, west of Eighth. This building is 60 by 127 feet, two

stories in height, the second floor being used for a public hall, and will seat about 1,200 persons; the first floor is used for office, banquetting room, dressing rooms, &c. The means of ingress and egress are by three stairways, two of which, at the north end of the hall, are eight feet in width, emptying into a hallway sixteen feet wide leading out into Locust street; the other, or third stairway, on the south end of the hall, is six feet ten inches in width, opening into a side yard leading into Locust street. The entire building is warmed with an air furnace. We consider this a safe building in all respects, but as an additional security, in case of a panic, we would recommend another stairway on the east side of the building.

Academy of Music, situate at the southwest corner of Broad and Locust streets, 140 feet on Broad street, by 236 feet on Locust street, with a side yard 16 feet wide. This building has a seating capacity of 2,960, limited to 3,500, and can be emptied in from four to five minutes. The number of seats in the parquet and parquet circle is 1,078, with ten doorways of exit three feet six inches wide, leading into the lobby and vestibule; the first tier will seat 500, with twelve exit doorways three feet wide leading into the lobby, with three flights of stairs, two of twelve feet wide, leading into the vestibule, and one nine feet wide on the south side leading into the lobby; the second tier will seat 542, with twelve doorways, three feet wide, leading into the lobby, with two flights of stairs, seven feet six inches wide, one on the north side leading into Locust street, and one on the south side leading into the side yard; the third tier will seat 776, with twelve doorways, three feet wide, leading into the lobby, with two flights of stairs, six feet wide, one on the north side leading into Locust street, and one on the south side leading into the side yard. All of these stairways are separate and independent of each other, the doors of exit opening into the street and side yard, from the lower lobby and vestibule, and twenty in all—five doors eight feet six inches wide on Broad street, eight doors eight feet six inches wide on Locust street, and seven doors five feet nine inches wide on the side yard. All of the lobbies are of an average width of twelve feet; the entrance, or outer vestibule, is 9 x 90 feet;

the inner, or main vestibule, is 28 x 90 feet; the auditorium is divided from the lobbies by a two feet brick wall the entire height of the building. The stage is also divided from the auditorium by a two feet brick (fire) wall, carried above the roof, making a perfect division between the stage and the auditorium; the frame of the dome over the auditorium is a wrought-iron truss, covered with woven wire and plastered. The carpenter shop is divided from the stage by brick walls and iron doors, the scene dock on the adjoining lot, where all scenes not in immediate use are deposited, is divided from the stage by brick walls and iron doors.

There are two stairways four feet wide, one on each side, leading from the dressing rooms to the stage, with ample means of egress. The building is heated throughout with steam; the steam boiler and furnace is placed outside of the building, under the side yard, no other fires being used about the building; the entire building is lighted by electricity. There are three three-inch water attachments, one on each side of the stage, the other in the flies, with 250 feet of three-inch gum hose, operated with a ten-inch Worthington steam pump. There is also a large water tank in front of the building, next to the roof. The entire walls of the building are of brick of extra thickness, there being no (wooden) lath and plaster partitions in its construction; the stairways are enclosed with brick walls. There is a liberality in the design, construction, and equipment of this building that should give assurance to the public of its safety in all and every contingency, and inspire them with confidence in its security, and nothing but undue haste in leaving the building need be the cause of accident.

Horticultural Hall, situate on the west side of Broad street south of Locust. This building is 75 feet front by 200 feet in depth, with a twelve feet side yard on the north. It has a seating capacity of 1,600, or a standing capacity of 3,500, and can be emptied in about six minutes, having two doors, each five feet wide, opening out into Westmoreland street, on the south side, and two doors, each five feet wide, opening out into the side yard on the north side, leading to Broad street, and two doors four feet and two doors five feet five inches wide each, opening from the auditorium on the

landings, at the head of the stairways; these stairways are three in number, two of which are four feet eight inches wide, leading into the vestibule under the main stairs; the third or main stairway is eight feet wide, leading into a vestibule 19 x 19 feet, emptying into Broad street, through five doors, each four feet wide. The gallery in front of the auditorium will seat about 300, has two four feet stairways, emptying on a landing at the head of the main stairs. There is also one four feet stairway, on the stage, leading to the basement; the basement is divided into refreshment and other rooms. The building is heated by three air furnances, and is provided with two plug streams, with hose attached.

Grand Central Theatre, situate on the north side of Walnut street west of Eighth. This building is 80 feet front on Walnut street by 125 feet in depth, and will seat 1,500, limited to 3,000. The parquet and parquet circle will seat 500; the centre aisle is four feet in width, and the two side are two feet eight inches wide each, leading through three doors, each six feet wide, into a lobby nine feet wide, this lobby emptying into a hall, nine feet wide, leading out into Walnut street. The gallery will seat 1,000, and is emptied by two seven feet wide stairways leading direct to Walnut street. The carpenter shop is in the rear, and is divided from the stage by wooden doors. There are two plug streams, with hose attached, on each side of the stage. The dressing rooms, eighteen in number, nine on each side of the stage, 6 by 8 feet, built of boards, and are three stories high, with one flight of stairs each side, two feet wide, communicating with them; there is no means of exit from the rear of the stage. There are two stoves on each side of the stage, with stove pipes extending through the floors and partitions; also a large portable heater, in the cellar, with the pipes running through the floors and through the partitions of the dressing rooms, and two large cylinder stoves, in the side aisle of the parquet, and two large cylinder stoves in the lobby, in rear of the parquet.

All the gas lights in the building are unprotected by either globes or wire cages. This building we consider a dangerous structure. First, from its flimsy and faulty construction. Second, its want of egress from the rear of the stage. Third, its liability from fire, from the numerous

stoves and heater, all of which are in close proximity to the woodwork, the pipes of some passing through several board partitions.

Walnut Street Theatre, situate at the northeast corner of Ninth and Walnut streets, is 100 feet on Walnut street by 182 feet on Ninth street, will seat about 1,800, and can be emptied in about five minutes. The parquet and parquet circle will seat 800. The exit from the same is by five doors, opening into a lobby seven feet wide, said lobby being divided from the auditorium by a brick wall, and this lobby leads into a vestibule, and the vestibule empties on Walnut street, through three doors, each five feet wide, and by one door four feet wide, direct from the lobby, into Ninth street. We have recommended that another doorway be made from this lobby to Ninth street. The first tier will seat about 300; the aisles are five in number, three feet two inches in width. The means of exit from this tier is by two stairways, each five feet wide, emptying into the lobby. The second tier will seat about 800; the aisles are five in number, each three feet two inches wide. The exit from this tier is by two stairways, one on each side; the one on the east side four feet six inches wide, emptying direct into Walnut street; the other, on the west side, five feet wide, emptying on to the landing of the first tier. The exits from the stage are through two two feet doors leading into the lobby, and also by three doors opening into a six feet wide alley leading into Ninth street. There is one plug attachment on the stage, with two fifty feet sections of hose, with a liberal supply of buckets filled with water distributed over the building. The dressing, green, and property rooms are on the east side of the building, divided from the stage by a fire wall. The means of exit from the dressing-rooms are by one flight of stairs, two feet eight inches wide. The carpenter shop is in dangerous proximity to the stage. The building is heated by four air furnaces, two in front and two in the rear, under the stage, all in a satisfactory condition.

Kiralfy's Broad Street Theatre, situate on the east side of Broad street, north of Spruce, is 50 feet front by 160 feet in depth, and will seat about 1,200, and can be emptied, through

the front doors, in about four minutes. The parquet and parquet circle will seat 700. The means of egress are through four doors, each eight feet wide, opening out into a garden on the north side, and by four doors, each five feet wide, opening into the lobby nine feet wide, then by five doors from the lobby, each five feet wide, opening into Broad street. The first tier, or dress circle, will seat 500, and is emptied by four doors, each eight feet wide, opening out into a veranda eight feet wide, on the north side, and communicating with the garden by three flights of stairs four feet wide, and by two stairways, each four feet seven inches wide, emptying into the lobby on to the first floor. The exit from the stage is by one eight feet door, opening into Sycamore street, and by one two feet door into the lobby. All of the dressing-rooms being in the basement, under the stage, the means of exit are by doors and windows on Sycamore street. There are two plug attachments, one on each side of the stage, with two fifty feet sections of hose attached, also eight fire extinguishers. The house is lighted by electricity, and the entire building is heated by steam. All the arrangements for exit from this building, and the means of extinguishing fires, are satisfactory.

Arch Street Theatre, situated on the north side of Arch street, west of Sixth. This building is 70 feet front by 198 feet deep. The seating capacity is about 1,500, limited to 2,500, and can be emptied in about five minutes. The number of seats in the parquet and parquet circle is 500, the space between the seats is sixteen inches, giving easy and unobstructed passage to the aisles; the centre aisle is three feet three inches wide, and the two side aisles are two feet six wide, emptying into a lobby eleven feet two inches in width, through five doors, three of which are five feet nine inches, and the other two are three feet wide, to a vestibule eight feet five inches wide, through three doors, seven feet in width, on Arch street. There are two stairways, five feet in width, without doors or other obstructions, leading from the first tier and emptying into the lobby on the first floor, said lobby being divided from the auditorium by a brick wall. The first tier has a seating capacity of 422, in which there are four aisles, two of which are three feet five inches and two three feet wide, leading into a lobby twenty-three feet six inches by thirty-five

feet ; there is one stairway leading from the second tier, five feet, four inches wide, emptying into Arch street ; the seating capacity of the second tier is from 700 to 800, with four aisles emptying into a lobby eighteen by sixty-eight feet. There are five doors of exit from the stage, two through the proscenium into the auditorium, one on the rear, north side, four feet wide, leading into Cherry street, and two on the east side to a ten feet wide alley leading into Sixth street. There are two plug streams on the stage, and one in the flies, with fifty feet of hose attached to each ; also, three fire extinguishers and a liberal supply of buckets, distributed throughout the building. There are eight dressing rooms, four on each side of the stage, with stairs leading therefrom two feet four inches wide. The carpenter shop is located at the rear, and outside the building proper. The proscenium is lined with iron to the roof, thereby giving greater security in case of fire. The gas jets are covered with wire cages, and lighted by a torch. The building is heated by three air furnaces, two in front and one in the rear under the stage, and are in good condition, clear of all combustibles. The scene dock is outside and in the rear of the stage ; there are no wing lights, bunch lights being substituted, and secured to the stage, and protected with wire cages. There is also a fireman employed, whose special duty, during the performance, is to have the hose in readiness at all times, and at a moment's notice.

The Colosseum, situate at the southwest corner of Broad and Locust streets. The diameter of the building is 129 feet at the base and 126 at the eaves, the whole height is 166 feet ; the height to the eaves is 77 feet ; the building is constructed with iron frames covered with corrugated iron ; the centre, or stairway, is of iron frame, with wooden steps and trimmings, leading to and from the top of the building ; there is one door at the corner of Broad and Locust streets, ten feet in width, also one small door opening into a small street on the east. There is no fire in the building, it being heated by steam, the furnace and boiler being located outside. The gas is lighted by electricity.

Chestnut Street Theatre, situate on the north side of Chestnut street, west of Twelfth. This building is 70 by 150

feet; the seating capacity is 1,700 to 2,000; the time of exit, we are informed, is about four and one-half minutes. The seating capacity of the parquet and parquet circle is 558, and empties by three aisles, each three feet wide, through five doorways, one six feet, two three feet eight inches, and two five feet wide each, into a lobby eight feet eight inches by sixty-six feet, and this lobby empties by two doorways, each ten feet eight inches wide, through a vestibule 6 by 22 feet, and from the vestibule into Chestnut street by two doorways, each six feet two inches wide. The seating capacity of the first tier is 388, and empties by five aisles, one four feet, two two feet eight inches, and two three feet wide each, into an open space, in rear of seats, eight feet wide, and by two stairways, each four feet six inches wide, leading into the lobby on the first floor. The second tier will seat about 400, and empties by three aisles three feet eight inches wide each, into an open space in rear of seats, and then by two stairways each four feet six inches wide; the one on the east side empties direct into Chestnut street through one six feet doorway, the other, on the west side, empties into the stairway leading from the first tier. The seating capacity of the third tier is about 500, and empties by one stairway, on the north side, four feet six inches wide, leading direct into Chestnut street through one six feet doorway. The exits from the stage are by three doorways, in the rear, one seven feet nine inches wide, and two two feet nine inches wide, opening in on Clover street ("two of said doorways are made useless by being entirely obstructed by stage property,") and by one two feet wide doorway, on the west side of the stage, leading into the aisle of the auditorium. There are three fire-plugs, one on each side of the stage, with a fifty feet section of hose attached to each, and one in front of the stage, with two fifty feet sections of hose; there are thirty-six water buckets distributed through the house, all in good order. The dressing rooms are thirteen in number, located in rear and over the stage; the means of egress are by two stairways, one on each side, two feet eight inches wide, leading to the stage. The carpenter shop is located directly over the dome of the auditorium. The building is heated by steam, the boilers are placed in a vaulted arch, under the rear of the stage. The gas is lighted by torch, and well protected by wire cages.

Fox's Theatre, situate on the north side of Chestnut street, west of Tenth. The building is 100 feet front by 190 feet in depth, and has a seating capacity of 3,000, but will accommodate 5,000, and can be emptied in about six minutes. The means of accommodation are parquet, parquet circle, and three tiers above. The parquet and parquet circle will seat six hundred and sixty-four. The means of exit from here are by three aisles, one four feet, the other two three feet wide, leading to five doors, two seven feet nine inches, and three five feet four inches wide, into a lobby eight feet by thirteen feet six inches. This lobby empties through a four-fold door (opening out), thirteen feet six inches wide, into a hall thirteen feet six inches wide by fifty-two feet long, leading into Chestnut street. The first tier will seat three hundred and eleven. The means of exit here are by three aisles, one four feet eight inches wide, the other two are four feet wide, emptying through five doors (same as those in the parquet and parquet circle), into a lobby eight feet wide, with two flights of stairs, each three feet four inches wide, leading into the lobby of the parquet and parquet circle. The seating capacity of the second tier is from four hundred to five hundred. The means of exit are by four aisles, three of three feet two inches wide, and one four feet wide, emptying into a passage way in rear of seats, and leading to two flights of stairs; the passage to the flights of stairs, five feet four inches wide, on the east, is through a doorway two feet six inches wide, leading to the lobby of the first tier, the other flight, four feet five inches wide, leading to the main hall to Chestnut street. The third tier will seat from 2,000 to 2,500. The means of exit are by three aisles, one five feet wide, and two two feet ten inches wide, leading to the head of stairs, on the west side, four feet five inches wide, and leading to the stairs from the second tier. There is but one door of exit, three feet eight inches wide, from the stage, and leading to a small street in the rear. There are two fire plugs, one on each side of the stage, with fifty feet of gum hose to each. Also, six fire extinguishers. There are thirteen dressing-rooms on the stage, eight on the west and five on the east side. The means of exit from these rooms are by three flights of stairs, each two feet three inches wide; these rooms are three stories in height, and are all made of boards one inch thick. The carpenter shop is located in front

of the building, and in rear of the third tier. The gas is lighted with torch. The heating of the building is by steam from a boiler, on the east side, and under the stage. The gas burners are not properly protected with wire cages.

The building at the northwest corner of Ninth and Arch streets is 48 feet on Arch street by 126 feet on Ninth street, and is used for a museum and theatre. The theatre will seat about 1,100, and can be emptied in about three minutes. The parquet will seat about five hundred, and empties by three doors, each four feet wide, opening out into Ninth street, by three aisles, one three feet ten inches, the two side aisles, two feet six inches wide, leading to doorway four feet four inches wide, opening into Museum Hall, twenty-five by forty-six feet, then by three doors, one seven feet wide, and two three feet two inches each, emptying into Arch street. The first tier will seat about three hundred; is emptied by three aisles, two feet six inches wide, leading to one door four feet four inches wide, opening into Museum Hall, 32 x 45 feet, on the second floor, at the head of two flights of stairs, each four feet wide, which empty into Museum Hall on the first floor. The second tier can seat about three hundred. The means of exit are the same as of the first tier. The upper or fourth story, the entire size of the building, together with the three halls in front, are occupied for museum purposes. The exits are by two flights of stairs four feet wide. The dressing-rooms are in the basement, under the auditorium. The exits are by three flights of stairs, one into Museum Hall, one on to the stage, the other on to Ninth street. There is one fire-plug in the cellar, with 250 feet of hose leading on to the stage. The entire building is heated by three air furnaces. There are four fire extinguishers, all in good order. The means of egress from the stage are by three doors, each three feet four inches wide, opening out into Ninth street. The gas is lighted by torch, and the gas burners are protected by wire cages.

The New National Theatre, located at the southwest corner of Tenth and Callowhill streets, 79 feet on Tenth street by 169 feet on Callowhill street, will seat from 2,300 to 2,500, and we are informed can be emptied in about five

minutes. The parquet and parquet circle will seat 617, is emptied by three aisles, one in the centre, four feet wide, and two side aisles, each three feet wide, leading to avenues in rear of seats ; the exits from the parquet and parquet circle are by seven doorways, two seven feet six inches wide, two six feet six inches wide, two three feet wide, and one five feet eight inches wide, opening into a lobby, eight feet by seventy-five feet; the lobby is emptied by three doorways, two of which open into a hall, twelve feet wide by forty feet in length, leading into Tenth street; the other door is at the bottom of the stairs leading from the second tier, and opens onto Callowhill street. The first tier will seat 488 ; is emptied by five aisles, each three feet wide, leading to open space, eight feet by seventy-five feet, in rear of seats ; and is emptied by one stairway, five feet three inches wide, leading to the lobby on the first floor ; and by one doorway opening into the stairs from the second tier. The second tier will seat about 1,000 ; and is emptied by three aisles, each three feet six inches wide, leading by one stairway, five feet five inches wide, to Callowhill street. There are two fire-plugs, one each side of the stage, with 150 feet of hose attached. The dressing-rooms are eight in number, four on each side of the flies, with two stairways, each three feet eight inches wide, one each side, landing onto the stage ; there are two doorways in rear of the stage, one two feet eight inches wide, and one seven feet ten inches wide, opening into a ten feet alley, leading to Callowhill street. The building is lighted by electricity, and is heated by steam ; the carpenter shop is located on the south side of the stage, opposite the flies.

Carnecross and Dixey's Eleventh street Opera House, situate at the southeast corner of Eleventh street and Marble alley. The building is 50x80. The parquet has a seating capacity of 422 ; it has three aisles ; the centre one is two feet three inches wide ; and the two side aisles are two feet eight inches wide. The means of egress from the parquet, on the first floor, are by five doors, two in front, four feet three inches wide, opening into a vestibule ; one door on the north side, four feet one inch wide, and one two feet five inches wide, opening into Marble alley ; and one on the south side, three feet two inches wide, opening into a passage-way,

four feet wide, leading into Eleventh street. There are two stairways leading from the first tier, four feet six inches wide (said tier has a seating capacity of 500), emptying into a vestibule, to the front door, ten feet in width, opening out into Eleventh street. There is one fire-plug on the stage, with fifty feet of hose attached, in good order. The building is heated by two air furnaces in the cellar, all of which are well protected, and in good condition. The proprietors claim that the house can be emptied in three and one-half minutes. The dressing-rooms are on the south, and outside of the building, with a good supply of water.

Martin's Varieties, situate on the northwest corner of Eleventh and Wood streets. This building is 56 feet front, by 70 feet in depth. The first floor has a seating capacity of 600; having three aisles; one, four feet six inches wide, and two three feet ten inches wide, leading into a vestibule, emptying by three doors into Eleventh street; one of which is four feet, and the other two are three feet six inches wide. The gallery has a seating capacity of 500, with two stairways leading therefrom, three feet seven inches wide, to the front doors. The building is heated by stoves in the basement; there is no supply of water; the rear exit is from the basement, leading to the side-door on Wood street. The basement is occupied with bar-room and dressing-rooms. There are no appliances in case of fire.

Concert Hall, situate in the second-story of building Nos. 1217 and 1219 Chestnut street. The size of the hall is 57 feet 4 inches in front by 130 feet in depth; it has a seating capacity of 1,000; is emptied by three aisles; the centre aisle is five feet two inches wide, the other two three feet each, leading through three doorways, one three feet, one three feet four inches, and one five feet wide, into a lobby 10 by 36 feet. There is one gallery at the south end of the building with a seating capacity of 300, emptied by two stairways, each three feet wide, into a lobby; the means of exit from the lobby are by two stairways, each five feet six inches wide, emptying into Chestnut street; there are no means of exit in the rear of the hall to the street. The dressing rooms are in rear of the stage and warmed by stoves; the hall is heated by two air furnaces

in the cellar. The first story under the hall is occupied as a carriage repository and furniture ware rooms; part of the cellar is occupied as a furniture work shop, while the story over the auditorium is used as a paint shop and other purposes. There is no fire plug or other appliances for extinguishing fire in the building. We consider this an unsafe building, it having no means of egress from the rear, and the upper and lower stories being occupied for manufacturing purposes.

Enoch's Varieties, situate on the east side of Seventh street, south of Arch. The building is 65 feet front by 110 feet in depth. The parquet has a seating capacity of 500; it has one centre aisle three feet three inches in width; the means of egress from the same are by three doors, one five feet eight inches, and two three feet eleven inches wide, emptying into a lobby 8 by 60 feet, and thence through a doorway into the vestibule eight feet wide, leading to two stairways each six feet wide, one on the north and one on the south side, emptying into Seventh street through a doorway seventeen feet three inches in width. The first tier has a seating capacity of 600; the means of exit are by two stairways three feet two inches in width, one on the north and one on the south side, emptying into the lobby of the auditorium. The building is heated by one air furnace in the front cellar under the ticket office; there are also several stoves in the basement where are located the bar, dressing, and other rooms, there is one plug stream with fifty feet of hose attached, together with twenty-four water buckets.

Arch Street Opera House, situate on the north side of Arch street, west of Tenth. The size of the building is 50 by 100. The parquet has a seating capacity of 446, with three aisles; the centre aisle is three feet, and the two side aisles are two feet wide. The means of egress from the parquet are by two doors, four feet ten inches wide, emptying into a hall, thirteen feet nine inches wide, and fifty-three feet in length, to Arch street. The first tier has a seating capacity of 400, with four aisles, two feet nine inches wide, emptying direct to two stairways, four feet five inches wide, leading to the hall on the first floor. The second tier has a seating capacity of 350, with four aisles, two feet nine inches

wide, emptying into stairways four feet five inches wide, leading into the stairways of the first tier. The means of exit from the stage are by two doors opening out into Academy street, on the north. There is one plug on the stage, with one hundred feet of hose attached; also, thirty-three fire buckets. The carpenter shop and paint shop are in the building, and over the stage. The building is heated by an air furnace in the cellar; the gas burners are not protected. The front door of exit is ten feet six inches in width.

Association Hall, situate on the northeast side of Germantown avenue, south of Haines street. This building is 45 by 113. The audience room has a capacity of about 750; there are three aisles; the centre one is four feet, and the two side aisles are two feet eight inches wide. The means of exit are by three doors four feet wide, opening into a vestibule nine by twelve feet, leading to stairways five feet seven inches wide, and into a vestibule at the front door, said door being seven feet six inches wide. The gallery has a seating capacity of 220, with three aisles three feet two inches wide; the means of exit from the same are by two stairways, two feet ten inches wide, emptying into the main stairway. The building is heated by steam, the furnace and boiler being located in the cellar, in the rear: there are no appliances against fire; the means of egress from this building are very inadequate.

Wilson's Opera House, situate at the northwest corner of Main street and Chelton avenue, Germantown. The size of the audience hall is 40x100 feet; the seating capacity of the parquet is 425; there is only one aisle, three feet seven inches wide; the means of exit from the parquet are by one side door, four feet eight inches wide, near the stage, with two rows of seats blocking up the doorway; said doorway opens out into a landing at the head of the front stairs, emptying into the street; the stairway is eight feet eight inches wide, and the front door is six feet six inches wide; it is also emptied into a passage in the rear, six feet eight inches wide, leading to a vestibule, eight feet nine inches by sixteen feet, and by the vestibule to the front stairway. The gallery has a seating capacity of 300, with two aisles

three feet two inches wide, emptying into a passage in the rear, three feet three inches wide to one narrow stairway, three feet three inches wide onto the passageway in the rear of the parquet, and thence along the vestibule to the front stairs. The exit from the stage is by one flight of steps, three feet three inches wide, under the stage, through a door three feet wide to the rear stairway four feet wide. There are five dressing rooms under the stage; the gas jets are protected by wire cages. The building is heated by a steam furnace and boiler located in the cellar; there are no appliances against fire. The hall in the third story is 40x50 feet, with one door of exit, six feet wide, opening to landing at the head of the rear stairway, four feet wide, emptying into the vestibule; said vestibule leading to the front stairway. The first story is occupied by stores. The means of exit from the auditorium and gallery are wholly insufficient.

It is almost impossible to guard against panics in theatres and other places, where large bodies of people are assembled, and the recent burning of the Brooklyn theatre renders that disaster one of the most horrible on record, there being at the time about 1,000 persons in the building, 400 of whom were in the upper gallery or second tier; those that were in the parquet and parquet circle, despite the panic, with a few exceptions, managed to escape, while nearly 300 of those in the gallery, with but one four-foot stairway of egress, lost their lives, and the fact that in the inconsiderable short space of two minutes' time, the building was a sepulcher, has made the public painfully sensible of the necessity of such improvement in places of this kind, as will tend to lessen their liability to a similar accident in case of fire. If this theatre, with a gallery to seat from 400 to 500, and one stairway but four feet wide, was insufficient, what must be the consequences, under similar circumstances, in any one of the theatres of this City, with galleries seating from 400 to 2,000, with one stairway four feet wide for egress.

There is scarcely more than one theatre in this City, that is provided with sufficient means of egress from its galleries in case of a panic, and but few with sufficient means of egress from the rear, and not one where just such a fire as lately took place, might not occur among the scenes. The reasons, it appears, that were the cause of this disaster, are three

fold: first, insufficient means of egress from the galleries; second, total want of any appliances for extinguishing fires; third, neglect to render the scenes, &c., incombustible. Therefore, we deem it requisite for the better protection of life in case of fire, that all public halls and places of amusement, that have galleries, should have at least two separate stairways from each tier, not less than six feet in width, one on each side of the building, and leading directly to the street, and not to empty into the lobbies and vestibules, to come in contact with the people of the first floor.

All "scenes" and "borders" in places of amusement should be made of incombustible material.

A fire wall should be built between the stage and auditorium, the entire height of the building, and form a battlement above the roof.

A brick wall should be built up to the first tier (if not higher), separating the auditorium from the lobby. There should not be less than three aisles in each tier or circle, not less than three feet six inches in width, unobstructed by steps, and directly opposite doors of exit. The space between the front of the seats and back of the row in front, should not be less than sixteen inches, so as to give easy access to the aisles.

Double acting "lever bolts" should be substituted for "flush bolts" upon all doors opening outward, and kept closed during the performance.

There should not be more than two tiers or circles in any theatre or place of amusement.

A suitable person should be employed, whose special duty should be that of "fireman," and during the performance he should be stationed at the fire plug, with hose attached, always ready for service.

There should not be stored in the building, any material, such as scenery or other matter not in immediate use. No carpenter shop should be allowed in the building. "Dressing rooms" should not be constructed entirely of wood, and stairs leading to them should not be less than three feet in width, the number of flights to be determined according to the location of the rooms. There should be "two" or more doors of exit, at least four feet wide, from the rear of the stage, and they should be kept unobstructed at all times. No stoves or air heaters should be allowed in the building; they should be heated by steam, with the boiler placed outside of the building, or in fire proof vaults.

All border or other gas lights pertaining to the stage should be protected with wire cages.

Canvas ceilings over the auditorium, or elsewhere, in the building, should be prohibited, and plastered ceilings substituted for those that now have them.

We would here ask that special attention be given both to Fox's Theatre, and the Chestnut Street Theatre, each of which have three tiers, or circles, above the parquet, Fox's third tier accommodating from 2,000 to 2,500, the Chestnut Theatre third tier accommodating 500 and upwards; now from these third tiers there is but one narrow stairway provided for exit; in Fox's the stairway is but four feet five inches wide, and leads to the head of the stairs of the second tier. In the Chestnut Street Theatre, the stairs from the third tier are but four feet six inches wide, and leads to Chestnut street. We recommend that the third tiers of both of these houses be immediately closed to the public, and that both houses be remodelled, for in their construction the great object seems to have been to obtain the largest amount of space in which to pack an audience, while they have given the least amount of room possible, as a means of exit.

The means of exit from public halls, are, as a general thing, wholly inadequate; some of them having the upper and lower portions of the building occupied for manufacturing and other purposes.

Most, if not all, of the church doors open inwards, or are fixed on rollers, and slide inside of the walls. There appears to be as little room as possible appropriated for stairways and vestibules; the aisles and passage-ways, when the buildings are crowded, are filled with benches, chairs, and stools, so that in case of a panic it would be impossible for the people to escape without loss of life or limb. We therefore recommend that the doors of exit from all "churches" be made to open outwards, and that the aisles and passage-ways, during service, be unobstructed.

The means of escape from manufactories are very inadequate; buildings several stories in height, and covering a large area, have but one small wooden stairway, and that located in one corner of the building; the stairways and floors being saturated with oil, in case of fire, it would be impossible for the inmates to get out with safety; it is true, that some have iron ladders (called fire-escapes) erected, and while

these ladders might answer for persons accustomed to climbing, they would be of no use as a means of egress for the women and children employed in such establishments, or even to many of the male operatives, in case of fire. All manufactories should have one or more stairways, either inside or outside, at convenient distances, and not less than "six feet going," encased with "brick or stone walls, or iron doors" (folding) at least four feet wide, opening onto the stairway.

In conclusion, we recommend that ordinances be passed, compelling such alterations in buildings, already in use, as upon inspection are deemed not to have sufficient means of egress, in case of an emergency, and such additions and alterations as may be thought requisite, based upon location, construction, number and condition of employees, or other persons.

By the Board of Building Inspectors,
WM. H. BUTLER,
Secretary.

APPENDIX No. 13.

RESOLUTION

Of request to the Trustees of the Philadelphia Gas Works,
relative to gas lights.

Resolved by the Select and Common Councils of the City of Philadelphia, That the Trustees of the Philadelphia Gas Works be and they are hereby requested to omit the lighting of every alternate lamp on the line of Girard, Elm and Belmont avenues, west of the river Schuylkill, and to omit the lighting of one-half of the lamps on the bridge over the river Schuylkill at Spring Garden street.

RESOLUTION

For a Joint Special Committee to consider the expediency of
consolidating certain Departments of the City.

Resolved by the Select and Common Councils of the City of Philadelphia, That a Joint Special Committee of five from each branch of Councils be appointed to inquire into the expediency of consolidating into one department, any of the departments of the City of Philadelphia; and if found expedient to make such consolidation, they are hereby instructed to report what legislation, if any, may be necessary to consolidate such departments into one.

APPENDIX No. 17.

RESOLUTION

Requesting the Legislature of the State of Pennsylvania to repeal Acts requiring the City of Philadelphia to allow discount on taxes.

Resolved by the Select and Common Councils of the City of Philadelphia, That the Legislature of the State of Pennsylvania be requested to repeal all laws requiring the Receiver of Taxes to allow a discount on taxes, and to impose a penalty for the non-payment of the same during the year for which the taxes have been assessed, and to pass an act giving Councils power to regulate discount, if any, and impose such penalties as will insure the prompt collection of taxes, and that the Committee on Law be requested to prepare such an act.

APPENDIX No. 18.

RESOLUTION

Of request to the Commissioners of Public Buildings.

Resolved by the Select and Common Councils of the City of Philadelphia, That the Commissioners of New Public Buildings be, and are, hereby requested to furnish a place on the first floor of the new public buildings for the Highway Department.

APPENDIX No. 19.

RESOLUTION

Relative to the election of Trustees of the Philadelphia Gas Works.

Resolved by the Common Council of the City of Philadelphia, That this Common Council will not elect any one a Trustee of the Philadelphia Gas Works who will not first give a written pledge to use all honorable means to secure public business meetings of the said Board of Trustees.

OFFICE OF COMMISSIONERS OF PUBLIC BUILDINGS,

Philadelphia, January 18, 1877.

To the Select and Common Councils
of the City of Philadelphia.

At a stated meeting of the Executive Committee of the Commissioners for the Erection of the Public Buildings, held on the 17th instant, the fact being brought to their notice that two sub-committees of Councils had been appointed to inquire as to the possibility of any rooms in the building being fitted up for use before the completion of the entire building, the following resolution was adopted:

Resolved, That the President be instructed to inform Councils that rooms in the Public Buildings are in a condition to be fitted up temporarily for occupation of the City Commissioners, Law Department, City Controller, and City Treasurer, and Highway Department, within a short time if desired.

In accordance with this instruction I have the honor to submit the above.

Very respectfully,

SAM'L C. PERKINS,
President of Commissioners.

APPENDIX No. 21.

Philadelphia, January 3, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—We hereby offer to the City of Philadelphia for school purposes the lot of ground at the southeast corner of Fourth and Cumberland streets, in the said City.

The lot has three fronts, being one hundred feet on Fourth street by one hundred and two feet six inches along Cumberland street, to Orianna street, which is thirty feet wide.

All street improvements of gas, water, curbing, and paving are made on Fourth and Orianna streets, and a culvert is now completed along the Cumberland street front. The lot is level with the street grades.

The price is four dollars and twenty-five cents (\$4.25) per foot front on Fourth street, or seven thousand and eighty-three and thirty-three one hundredths dollars clear, being cheaper at that price, we believe, than any other lot with equal advantages now offered for sale in that section of the City.

We would call attention particularly to the facts that it is a corner lot, has three fronts, is graded to street level, is dry, and without springs; that the improvements on the back street are made, and that it is deeper by twelve feet six inches than any lot on the west side of Fourth street.

Should a larger amount of ground than one hundred feet be required, we are authorized by the owner to offer any part of a lot of ground situate on the east side of Fourth street, beginning one hundred feet south of Cumberland street, containing, in front, one hundred and fifty feet, and extending in depth one hundred and two feet six inches to Orianna street. Any portion of this lot which the City may require will be sold at three dollars and ninety cents per foot front.

Very respectfully,

MAC MANUS & TRAUTWINE.

APPENDIX No. 22.

RESOLUTION

To meet in Joint Convention to elect Railroad Directors.

Resolved, That Select Council be invited to meet Common Council in Joint Convention in Common Council Chamber this day, the eighteenth instant, at four o'clock (4) P. M., for the purpose of electing three Directors for the Philadelphia and Erie Railroad Company.

APPENDIX No. 23.

" " 1874,	359,146 74,	"	$3\frac{2}{10}$	" "
" " 1875,	783,994 81,	"	$6\frac{4}{10}$	" "
" " 1876,	1,662,749 03,	"	$13\frac{3}{10}$	" "
	<hr/>			
	\$3,317,137 06			
	<hr/>			

A much larger amount of taxes will be registered for 1876, than former years, owing to the depression of business and want of employment by owners of a majority of the number of properties assessed, and that, no doubt, will be the case in the year 1877 to a great extent. The general average of taxes registered of former current years, has been $11\frac{8}{10}$ per cent. ; the amount of tax registered for 1876 is $13\frac{3}{10}$ per cent.

I would call the attention of Councils to the condition of the City Hall, or Public Buildings, as it is generally termed. The walls, in their unfinished condition, if allowed to so remain, will greatly deteriorate, and to a greater amount (unless well covered in), than the cost of finishing the northern, eastern, and western walls to the square. Most of the southern wing has been roofed in, and made available, and all the facings of the inner walls are up to the square ; if then, an appropriation be made to finish the outer walls on the east, west, and north, and roof them in, as is now done on the south wing, which it is believed would not exceed the cost of the tax levy for 1876, the whole building could then be occupied to as much advantage to the City, as the whole structure could be when finished according to the plans, &c. The addition of the mansard, the turrets, steeple, and the ornamental parts could readily be deferred without detracting from the usefulness of the building. Such course would not only prevent deterioration, but would be a source of great saving to the City, in the shape of rents now paid for the several offices of the Departments, &c. I would therefore recommend that an amount equal to the tax levy of eighteen hundred and seventy-six, be directed by your Honorable Bodies to be applied to the completion of the walls to the square, and finishing the interior, so that it can be used for the purposes of its legitimate intent. The payment of the debt authorized by Councils in 1876, could, with advan-

tage to the City, be deferred for one year, because by finishing the building to the square, and occupancy, this saving in rent would be two-fold over the cost of interest of the sum for the time.

The unfinished condition of East Park Reservoir should also claim your attention. It is confidently asserted by those competent to judge, that one basin can be finished for a sum not exceeding \$64,000.00, which would give the City storage for sixty-seven million of gallons of water; the balance could then be completed at a subsequent time. If it cannot, or is not desirable to be completed, under the present contract, I advise the settlement of the obligation so far as has been done, cancel or have the present contract surrendered, and take a new departure for its completion.

I believe the funding of the Floating Debt of the City to be a matter of necessity. To secure the amount from taxation, by enforced collection, would be to ruin and render homeless thousands of families, besides injuring to a large extent the many building associations with which the moderate class are connected.

The legality of funding the Floating Debt, I think, cannot be questioned, there being nothing in the Constitution to prevent the application of the City of Philadelphia, at this time, to the Legislature, to increase the Funded Debt three per cent. on the assessed value of the real estate, &c., of the City, and nothing to prevent the Legislature from granting it. The only limit is that it shall not, on any one application of the City, exceed three per cent. of the assessed value of property.

I would recommend the collection of taxes semi-annually, without any rebate for prompt payment, except to those who pay for the whole year, and then only three per cent. on the last six months; also the payment of the interest on the Funded Debt of the City quarterly. The fact that the out-

standing loan stipulates that the payment of interest is semi-annual, will prevent few who hold the loan from availing themselves of quarterly payments, from advantages which would accrue to them without injury to the City.

Considering that 1876 was Centennial year, the extent and character of improvements made, and the large amount of extra expenses incurred in them, and extra police force, and various other items have increased the expenses beyond the usual amount. The general economy in 1876 will be best shown by comparison of expenses of those of 1875.

COMMONWEALTH OF PENNSYLVANIA:

City of Philadelphia, ss.:

On the eighteenth day of January, A. D. 1877, personally appeared before me, the subscriber, Mayor of the City of Philadelphia, Samuel P. Hancock, who being duly affirmed, doth depose and say, that to the best of his knowledge and belief, the foregoing statement of the finances of the said City of Philadelphia is just, correct, and true, having been carefully compared with the vouchers in the Controller's Department of the said City.

SAMUEL P. HANCOCK,
City Controller.

Affirmed and subscribed before
me, on the date above written.

Witness my hand and the seal
of the City of Philadelphia.

WILLIAM S. STOKLEY,
Mayor of Philadelphia.

APPENDIX No. 24.

RESOLUTION

To appoint a Joint Special Committee to investigate alleged political assessments upon the Police Force.

Whereas, In an ordinance to make an appropriation for the Department of Police for the year 1877, it is provided, *inter alia*, "And that it shall be illegal to assess these officers for political purposes, and His Honor the Mayor is requested to discharge any officer making or paying such assessment." *And whereas*, A communication charging a violation of the foregoing provision was referred, for investigation, to the Committee on Police, and by them "laid on the table" without action, therefore

Resolved by the Select and Common Councils of the City of Philadelphia, That a Joint Special Committee of three (3) members from each Chamber be appointed to inquire if any assessment, for political purposes, has been made upon the police force of this City in violation of law, and to report when and by whom such assessment was made. Said Committee to have power to send for persons and papers.

APPENDIX No. 25.

Frankford, Philadelphia, November 17, 1877.

To the President and members of Common Council.

GENTLEMEN:—If elected a member of the Board of Trusts of Philadelphia Gas Works I pledge myself to vote and use all honorable means to have the sessions thereof held in public.

Very respectfully yours,

NATHAN HILLES.

APPENDIX No. 26.

Philadelphia, January 17, 1877.

JOS. L. CAVEN, ESQ.,

President Common Council.

DEAR SIR :—Mr. Seabrook, the Engineer in charge of the examination of the Hart Creek sewer on my behalf, has been driven away by a subordinate of Mr. Malone, and unless the orders of the Chief Engineer Smedley are obeyed, I must stop interesting examinations. I am willing to guarantee the sewer from any damage resulting from my examinations.

Very respectfully,

Your obedient servant,

HENRY B. TATHAM.

APPENDIX No. 27.

Philadelphia, January 18, 1877.

To the Select and Common Councils

of the City of Philadelphia.

GENTLEMEN :—The Committee on Finance respectfully report that they have considered “An Ordinance to authorize the appointment of a Joint Standing Committee on Poor,” and report the same back in the form of a resolution, and recommend its passage.

AN ORDINANCE

To authorize the appointment of inspectors of sewer connections.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Chief Commissioner of Highways be, and is, hereby authorized and directed to appoint ten inspectors, whose term of service shall be three months, at a salary not to exceed two hundred (200) dollars each, and whose duty it shall be to examine all properties in the districts to which they may be assigned, and ascertain which of said properties have connection with the sewers and the nature of said connections, and report the same to the Chief Commissioner of Highways; and in order that said inspectors shall be known as such by the residents whose properties they desire to examine, each of said inspectors shall be furnished by the Department of Highways with a badge designating his office and authority.

APPENDIX No. 34.

Philadelphia, January 18, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN :—Your Committee on Surveys and Regulations, to whom was referred the accompanying ordinance “to authorize the construction of a sewer on Dauphin street,

between Sixteenth and Nineteenth streets," reports the same back with an amendment, included in Section 3, after the words lowest and best bidder, thus: "who shall agree to keep said sewer in repair for three years after its completion." We respectfully ask the adoption of said ordinance as amended.

DAVID WALLACE,	JOHN FOX,
F. DUNDORE,	BENJ. SAELTZER,
D. B. WENDLE,	HENRY GLASS,
MAXWELL ROWLAND,	JOS. J. MARTIN.

AN ORDINANCE

To authorize the construction of a sewer on Dauphin street, between Sixteenth and Nineteenth streets.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Chief Commissioner of Highways is hereby authorized and directed to enter into contract with competent mechanics for the construction of a main sewer, on the line of Dauphin street, from its present terminus, near Sixteenth street, to Nineteenth street.

SECT. 2. That it shall be the duty of the Chief Engineer and Surveyor to prepare plans and specifications for said sewer, and that the contract entered into for the construction thereof, shall be in accordance with such plans and specifications.

SECT. 3. That before entering into the said contract, the Chief Commissioner of Highways shall cause advertisement to be made for sealed proposals, for the construction of the sewer, and that the contract therefor shall be awarded by him to the lowest and best bidder, who shall agree to keep said sewer in repair for three years after its completion, and no contract therefor shall be binding on the City of Philadelphia, until the same shall have been authorized by these Councils.

SECT. 4. That no proposal for the construction of the said sewer shall be considered by the said Chief Commissioner

of Highways, unless accompanied by an engagement in writing from two or more sufficient sureties, guaranteeing the faithful execution of the contract in case such proposal be accepted.

SECT. 5. That as the completion of the said sewer shall progress, there shall be assessed and charged upon the properties in front of which the same shall be completed, the sum of one dollar and fifty cents for each lineal foot of the front of the said properties.

SECT. 6. That it shall be a condition of such contract that the contractor shall accept the sums so assessed and charged under the foregoing section of this ordinance, in part payment of his contract price, and that he shall collect the same at his own cost; and the better to enable him so to do, he may use the name of the City of Philadelphia, and employ all legal remedies or proceedings, whether of lien or otherwise, to which the said City may be competent.

SECT. 7. That portion of the cost of said sewer which shall arise from the construction of inlets and inlet connections on the lines thereof, and which shall not be defrayed by the sums assessed upon the properties situated thereon, as heretofore provided, shall be charged to Item 21 "for constructing new inlets," of the annual appropriation to the Department of Highways, for the year 1877.

SECT. 8. That payments may be made while the work of constructing the sewer is in progress, by the Chief Commissioner of Highways, in warrants upon the City Treasurer, charged to a loan for said purposes, approved October 14th, 1872; said payments in all cases to be made upon a certificate of the Chief Engineer and Surveyor, estimating the amount of work done: *Provided*, That for all current estimates no payments shall exceed four-fifths of the money meritoriously earned under said contract, after deducting the ratable proportion of the assessments referred to in Section 5 of this ordinance; said payments to be made in the bonds of the City of Philadelphia or in cash, at the discretion of the Mayor.

SECT. 9. Satisfactory evidence shall be furnished by the contractor to the Chief Commissioner of Highways that full payment has been made for all labor done and mate-

rials furnished, previously to drawing a warrant for the final estimate of any work done by virtue of this ordinance: and the Chief Commissioner of Highways shall require full and entire payment by the contractors of all labor and materials on account of such work; and the said Commissioner shall give one month's notice in two daily papers of the time at which final payment will be made on each and every final estimate.

APPENDIX No. 35.

Philadelphia, January 18, 1877.

To the Presidents and Members of Select and
Common Councils of the City of Philadelphia.

GENTLEMEN:—We, your Committee on Police, to whom was referred the bill entitled “An Ordinance authorizing the erection of bay windows,” respectfully report that we have examined and approve the same, and submit for your consideration the annexed ordinance, and recommend its passage.

E. H. HAYHURST, <i>Ch'n</i> ,	JOS. G. HAINES,
ALEX. RUSSELL,	W. ELLWOOD ROWAN,
WM. WRIGHT,	JOHN McCULLOUGH,
S. C. COLLINS,	J. W. BAKER,
GEORGE T. MOORE,	GEO. A. ENO,
JOHN SHEGOG,	AMOS M. SLACK,
FRANCIS MORGAN,	CHAS. THOMSON JONES.

AN ORDINANCE

Authorizing the erection of two bay windows.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That Dr. George Strawbridge be, and he is, hereby permitted and authorized to erect two brick bay windows, two stories in height, and to extend not more than four feet beyond the building line, on the west side of Fifteenth street below Walnut street, provided that he first pay into the City Treasury the sum of fifty (50) dollars for advertising this ordinance.

APPENDIX No. 36.

OFFICE NORTHERN LIBERTIES GAS COMPANY,

Philadelphia, January 8, 1877.

To the Select and Common Councils

of the City of Philadelphia.

GENTLEMEN:—The Trustees of the Northern Liberties Gas Company herewith present a statement of the receipts and disbursements of the past year, together with the previous outlay of capital.

Receipts.

For sales of gas, - -	\$172,249 66	
For sales of coke, tar, &c., -	9,659 49	
	<hr/>	\$181,909 15

Disbursements.

For works, as per last report, -	\$217,119 39	
during 1876, -	763 38	
	<hr/>	217,882 77
For mains, as per last report, -	76,981 92	
during 1876, -	250 70	
	<hr/>	77,232 62
For services, as per last report, -	64,706 77	
during 1876, -	980 12	
	<hr/>	65,686 89
For meters, as per last report, -	68,332 58	
during 1876, -	947 50	
	<hr/>	69,280 08
For real estate, as per last report, -	30,944 89	
during 1876, -	9 00	
	<hr/>	30,953 89
For coal on hand at commencement and received		
during the year, - - -	- - -	72,165 49
For wages, taxes, repairs, - - -	- - -	59,170 13

The only feature possessing any degree of novelty in the operations of these works in 1876, was a reduction in the price of gas. This was effected early in the year. Since

then, gas has been supplied to private consumers at the very low rate of two dollars and fifteen cents, and to all public burners of gas at one dollar and seven and one-half cents per thousand cubic feet.

During the year there have been put down two hundred and twenty-eight feet of three-inch main, and twenty-seven feet of three-quarter inch pipe have been laid for the supply of a public lamp.

Every needful attention is directed to the condition of the works, that they may be adequate, at all times, to afford the best quality and whatever quantity of gas the district may require, and in the accomplishment of this object the trustees have never failed of success.

All of which is respectfully submitted.

WM. P. FODELL,

Secretary.

APPENDIX No. 37.

Philadelphia, January 25, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—I feel it my duty to inform you that under an alleged authority of a resolution of the Common Council, the Mayor has deemed himself warranted, with the aid of the police, to forcibly introduce into my sewer certain engineers not in the employ of the City, nor having any power under my contract, to supervise my work.

Before the passage of this resolution, with the consent of the Chief Engineer and Surveyor, I permitted engineers to enter the sewer with the intention, as I supposed, of measuring the work and examining if the timber platforms had been built as provided for. This carefully done could produce no damage to the work. Recently, however, these men have removed the stone which form the arch of the sewer, and have done such damage to its strength that it cannot be restored as before.

If an examination of completed work had been made by the Chief Engineer and Surveyor, the contract provides for its payment, in case it is found I am not in default; but in the present condition of things, while the sewer is in my charge, and my work approved in accordance with the contract approved by the City, I and the City are wholly unprotected from the damages which may occur.

My desire in addressing you is, that if, without regard to my contract, you wish to enter upon my work, that you pass an ordinance paying me for what I have done, and release my sureties from any further responsibility. If you do not think it well to secure indemnity from the results of a voluntary examination, instituted by angry rival contractors, I am constrained to say that I consider myself entitled to be relieved from continuing liability.

Yours, very respectfully,

R. A. MALONE.

APPENDIX No. 38.

RESOLUTION

Of instruction to the Chief Engineer and Surveyor.

Resolved by the Select and Common Councils of the City of Philadelphia, That the Chief Engineer and Surveyor be, and is, hereby instructed to furnish the Chief Commissioner of Highways with a list of all the sewers and drain pipes in the City of Philadelphia.

APPENDIX No. 39.

ANNUAL REPORT OF THE TRUSTEES OF THE
PHILADELPHIA GAS WORKS.

To the Select and Common Councils
of the City of Philadelphia.

The Trustees of the Philadelphia Gas Works present the Forty-second Annual Report of their proceedings, and the statement of the financial condition of the Works under their control, and the results of the business carried on by them for the year 1876.

Since the last Annual Report there has been expended :

For Works,	-	-	-	-	\$331,436 68
“ Mains,	-	-	-	-	135,772 14
“ Services,	-	-	-	-	129,810 43

Making a total of	-	-	-	-	\$597,019 25
-------------------	---	---	---	---	--------------

From which deduct amount received on account of mains and services,	-	-	-	-	\$70,065 47
--	---	---	---	---	-------------

Leaving a balance of	-	-	-	-	\$526,953 78
----------------------	---	---	---	---	--------------

The quantity of gas manufactured during the year 1876 was 2,154,281,000 cubic feet, an increase of 281,087,000 cubic feet, or about 15 per cent. over 1875. The street mains laid during the past year were 112,993 feet, making the entire length of the mains laid through the City, and in use by the Gas Works, 674½ miles; the amount of street mains laid last year is not so large as that laid during the year 1875, as almost all of the street mains laid for the use of the Centennial grounds and buildings were laid in the former year, amounting to 41 miles.

The whole number of lamps on the first of January of this year was 11,350, of which 10,875 were supplied with gas from these works, and 475 with gas from the Northern Liberties Works. The Cashier's Report, herewith submitted, shows the loans created by Councils from time to time, for

the construction of works, their increase and manufacturing capacity, the extension of mains, and for the purchase of other works amounted to \$7,070,000.00.

These loans were as follows :

No. 1. Dec. 22, 1836, due Jan. 1, 1862,	\$150,000 00
" 2. Feb. 8, 1838, due Jan. 1, 1863,	200,000 00
" 3. June 3, 1841, due March 1, 1861,	125,000 00
" 4. June 17, 1841, due Jan. 1, 1866,	125,000 00
" 5. May 25, 1848, due Jan. 1, 1868,	70,000 00
" 6. March 15, 1849, due Jan. 1, 1869,	100,000 00
" 7. Jan. 10, 1850, due Jan. 1, 1870,	200,000 00
" 8. March 20, 1851, due Jan. 1, 1872,	400,000 00

The above loans have all been paid off.

No. 9. July 18, 1855, due July 1, 1885,	500,000 00
" 10. March 16, 1859, due July 1, 1883,	500,000 00
" 11. October 22, 1860, due July 1, 1884,	500,000 00
" 12. Dec. 22, 1864, due July 1, 1884,	1,000,000 00
" 13. Dec. 26, 1858, due Jan. 1, 1899,	1,000,000 00
" 14. May 18, 1870, due Jan. 1, 1900,	1,000,000 00
" 15. October 25, 1871, due Jan. 1, 1902,	500,000 00
" 16. Nov. 16, 1874, due Jan. 1, 1905,	1,000,000 00

Making a total of	-	-	\$7,370,000 00
Less amount not issued of Loan 16,			300,000 00

Leaving,	-	-	\$7,070,000 00
----------	---	---	----------------

There have been, in addition, expended on the Works now operated by the Trustees, the amount provided by the ordinance of the 20th March, 1855, for the purchase of the Spring Garden, and Moyamensing, West Philadelphia, and Frankford Gas Works, viz. : - - \$450,000 00

And for the purchase of the Southwark and Moyamensing, Germantown, Manayunk, and Richmond Gas Companies, - - 300,740 00

Making the total amount advanced on the credit of the City to the construction of the Gas Works since their creation, - \$7,820,740 00

The amount taken from the sinking fund from time to time, in order to pay off the principal of Loans Nos. 1, 2, 3, 4, 5, 6, 7, and 8, as they became due, was \$1,370,000.00.

There is in the sinking fund in charge of the Trust, for the payment of Loan No. 9, - - \$1,471,522 37

In addition to the above amount, the amount of loans and cash now in the hands of the Commissioners for the Sinking Fund of the City, for the redemption of Loans Nos. 10, 11, 12, 13, 14, 15, and 16, is - - - - - 1,281,385 31

Making a total now in the sinking fund, of \$2,752,907 68

The total amount of loans now remaining unpaid, is - - - - - \$6,000,000 00

Less amount of Loan No. 16, not issued, - 300,000 00

Leaving the total amount of loans now due, and outstanding, - - - - - \$5,700,000 00

Deduct from this amount, cash and securities in the hands of Trustees, and of the Commissioners of the Sinking Funds of the City for the redemption of the existing loans, \$2,752,907 68

And there remains as the balance of gas loans to be provided for - - - \$2,947,092 32

The present amount of the loans and cash in the sinking fund is sufficient at six per cent. compound interest, not only to pay all the present outstanding loans borrowed for the construction of the Gas Works as they respectively become due, including the \$700,000.00 already issued of Loan 16, but to leave on the first of January, 1905, the day on which the last of the above loans become due, a surplus after their payment, of \$1,465,827.85. This calculation does not credit the sinking funds with the two per cent. on the amount of outstanding loans required by the ordinance to be laid aside every year for the sinking funds, which will, of course, very largely swell the above amount.

The loans created for the payment of the Spring Garden, Moyamensing, West Philadelphia, and Frankford Gas Works, amounting to \$450,000.00, are not included in the above statement, there being a separate sinking fund for the payment of these loans in the hands of the City Treasurer, now amounting to \$414,464.61.

There is also in the different sinking funds, for the redemption of the loan created for the purchase of the Southwark and Moyamensing, Germantown, Manayunk, and Richmond Gas Companies, stock amounting to \$300,740.00, the sum of \$164,297.78. As has been stated, the total amount of money that has been advanced on the credit of the City for the construction and the extension of the Gas Works, is - - - - - \$7,070,000 00

In addition to this amount the accumulated profits up to the end of the year 1875, amounting to the sum of - - - \$2,697,928 24 have been applied to the maintenance and extension of the Works.

Making a total amount invested in the Gas Works, of - - - - - \$9,767,928 24

The net profits of the Works during the past year were \$365,015.51, making the total amount of accumulated profits up to the end of the year 1876, \$3,062,943.75.

The above results show, therefore, that the Philadelphia Gas Works, under the management of the Board of Trustees, have been constructed and managed for forty-two years, supplying gas to the citizens of the City at a lower price than it is supplied in any city of equal size in the United States, at a cost of nothing whatever to the City, while the money now invested in them is nearly \$10,000,000, subject to outstanding loans, all of which will be paid off out of the sinking fund in hand, alone, by the year 1905, and leave a surplus after their payment, of about \$1,500,000. The City will thus ultimately obtain Works costing \$10,000,000, together with a large surplus in cash above mentioned, without the payment or advance by the tax payers of a single dollar, but merely by a loan of their credit from time to time, while the citizens have been supplied with gas at an exceedingly low rate.

These magnificent results are largely due, the Trustees are led to believe, to the early adoption of the system of manufacturing and supplying gas by the Trust, thus avoiding the enormous useless outlay of capital incident to the existence of several competing companies in the same locality. The history of the enterprise for supplying gas to the various

cities in the United States, has demonstrated to all candid minds, that no private company, when subject to competition, can, in the long run, supply gas as cheaply as where it is under the control of a single board, the managers of which have at the same time the privilege of supplying the whole district in which the works are situated. The manufacture of gas necessarily differs in many important particulars from any other manufacture. The sale of its production is a limited one, as it is confined to the city or district which it supplies, and, as the commodity manufactured by it is not a luxury but a necessity, it must lay its pipes so that all who desire to use it may do so, thus entailing an expenditure in distribution, which is not, perhaps, repaid by the sale of gas in the particular locality for many years. A very large part, therefore, of its first investment is a material that could not give any return, in case it desired to withdraw from business. Of course, where more than one company exists supplying the same districts, several mains in the same street must exist instead of one, the cost of which, while borne by the company at the time, must, of course, be paid in the end by consumers. In addition to this, the amount which must necessarily be laid apart each year by a private corporation, for dividends to its stockholders, is utilized when works are managed by a Public Board, either in the construction of additional works, the supplying of gas to distant localities, not immediately paying the cost of introduction, thus encouraging improvements in the outskirts of the City, or else in the reduction of the price of gas to the municipality and its citizens. A commission recently appointed by one of the large cities of the Union, as late as 1875, after a most careful and personal inspection and examination of the works of gas companies in the principal cities of this country, and of their history for the last twenty years, was unanimously of opinion that in no case has competition succeeded in permanently lowering the price of gas. The illuminating power of the gas manufactured by the Philadelphia Gas Works, has been, during the year 1876, nearly equal to that of seventeen candles, or above the average standard. Some time since, its illuminating power was allowed to run higher, reaching on some occasions that of nineteen candles, and the report of the commission appointed by the City of Boston, to examine into the subject of gas manufacture, shows that at the time

of their visit to this City, it was equal to eighteen and three-fourths candles. The gas when enriched to this power, however, caused a perceptible smoking in the gas burners, ordinarily in use throughout the City, and the Trustees have not been able to allow the illuminating power to much exceed seventeen candles. They here submit the average illuminating power of gas made at the different works under their charge during the year 1876, reported from tests made daily by Professor Robert E. Rogers, of the University of Pennsylvania, and Professor Lemuel Stephens, of the Girard College, the lowest average in every case being given.

The construction of the Philadelphia Gas Works was begun in 1835. The manufacture of gas for illuminating purposes was then almost an experiment. The ordinance for the construction and management of the Works, passed the 21st of March, 1835, provided that they should be completed on a scale competent to manufacture 75,000 cubic feet of gas daily, or less than one one-hundred-and-seventeenth of the amount of gas consumed on the 18th day of December last, the average amount now consumed in a week equalling twice the annual production of the first works. Since that time, and up to the time of the City's consolidation in 1854, gas works were erected in several of the different districts that now form the City. In 1854, however, the then existing Board of Trustees was authorized to purchase, on certain terms, these Gas Works, and the Spring Garden, Moyamensing, West Philadelphia, and Frankford, as well as the Southwark,

and Moyamensing, Germantown, Manayunk, and Richmond Companies were all purchased from time to time, for the sum of \$750,740; all the works in this City and County, excepting those in the Northern Liberties, now being operated by the Trustees.

The various Gas Works in operation at the time of the consolidation of the City, were sufficient, with some extensions, to supply the citizens until 1861, when the increased demand required the construction of entirely new works. Point Breeze was the site selected as affording the necessary room for further extensions, and the money raised by Loans Nos. 10 and 11, \$1,000,000 in the aggregate, was applied to these works.

In 1864, the increase of the City again rendered it necessary to extend the works at Point Breeze, which now have a productive capacity of over 3,000,000 cubic feet of gas in twenty-four hours.

The principal site of the works at the time of the consolidation, was at Twenty-third and Market Streets, and by constant additions to the works, the Trust continued to supply the main portions of the City with gas until 1871, when they became entirely inadequate, and a portion of the older works was removed, and a gasometer capable of containing a million cubic feet of gas, was erected there, together with a retort house, of a capacity of 900 retorts. These changes have raised the producing capacity of the works in this vicinity, to five millions of cubic feet in twenty-four hours, which is probably their extreme limit, owing to the want of further space.

In the various works now operated by the Trustees, there are seventeen gasometers, four of which are capable of holding each, one million cubic feet, while the remaining thirteen vary from 800,000 cubic feet to 25,000 cubic feet, their total storage capacity being 7,298,000 cubic feet.

The greatest amount of gas produced and distributed by the gas works in twenty-four hours, was on the eighteenth day of last December, when 8,794,000 cubic feet were consumed. But this is above the average producing capacity, which does not much exceed 7,500,000 cubic feet. An examination of the amount of gas consumed for the last few

years shows the average increase in each succeeding year to be about ten per cent. of the total consumption of the preceding year. So that in the latter part of this year the average daily consumption will probably exceed the present by some 700,000 or 800,000 cubic feet; and the increase per diem for each succeeding year will be between 800,000 and 1,000,000 cubic feet. The average daily consumption in the latter part of the present year will therefore probably be as much as the present works have been able to supply only on extraordinary occasions; while that of 1878 and 1879 will exceed their extreme producing capacity.

An examination of the Cashier's Report, submitted herewith, will show that the profits made by the works on the manufacture of gas during the past year, were \$365,915 51. The appropriation made by the City for gas, and attendance to street lamps during 1877, is \$150,000 less than that made for the previous year. With the same amount of business therefore, as that done last year, the profits would of course be that much less, or about \$215,000; and they will in fact, fall below that amount, as part of the profits realized in 1876 was due to the extraordinary business occasioned by the Centennial Exhibition.

In view of the immediate necessity now existing for a large extension of the works, the Trustees have contracted for the construction of two gasometers of a capacity of 1,000,000 cubic feet each; and works in the Twenty-fifth Ward, at Tioga Street, on the Delaware, about three squares above the Richmond coal wharves. The works now in process of construction, out of moneys in the hands of the Trustees, and the \$300,000 yet unissued of Loan No. 16. Mains from these works will connect them with the whole system of gas mains in the rest of the City; and, as necessity requires, extensions will be made which will eventually have a producing capacity of 9,000,000 cubic feet daily. The completion at an early day of the works now under contract, is, however, a matter of necessity, and the Trustees have felt obliged to devote to them the whole amount of moneys in their hands remaining unexpended.

The price of gas has been reduced from \$2 30 to \$2 15 per thousand cubic feet, since the 1st of March last. In view of the increased demand for gas, which requires the immediate

construction of new works, it will not be possible to make any further reduction until the works now in course of construction shall be completed.

The price now charged is less than in any city of similar size in the country, that in New York being from \$2 50 to \$2 75 per 1,000 feet; in Brooklyn, \$2 75; in Chicago \$2 50; and in St. Louis, \$2 70. The average price of gas, per 1,000 cubic feet, in the whole of the United States, was, one year ago, \$4 32½. Boston is favorably situated, but one company being allowed to supply gas to its thickly built-up portion; and the amount of leakage is necessarily less, as well as the cost of distribution, there being but 112 miles of gas mains laid there, while in Philadelphia, whose business portions and distant suburbs are supplied at a uniform price, there are nearly 700 miles of mains. Owing, also, to the system of drawbacks allowed to those transporting coal to Boston by the Pennsylvania Railroad, coal costs the buyer there no more than in Philadelphia; the price of gas coal paid in Boston last year being at one time \$6 75, while \$6 70 was paid here. The price now charged in the thickly-settled parts of Boston for gas is \$2 25 per 1,000 feet; but in South Boston it is \$3 00; and in Brookline, eight miles distant, it is \$3 60. If the price charged for the transportation of gas coal to Philadelphia was reduced by an amount equal to the drawback allowed on coal transported to Boston, the Trustees could have purchased gas coal for about one dollar per ton less, or about \$260,000 less in the aggregate, which would have reduced the cost of gas to the citizens about 14 cents per 1,000 feet less than the present rate, or at \$2 01.

So soon as the additional works now being constructed shall be completed and in operation, the amount of annual profits made by the Gas Works will be again returned to the citizens in a proportionate reduction of the price of gas.

In conclusion, the Board desire to express their acknowledgments to the executive officers of the Trust, for the faithful manner in which they have discharged their respective duties.

By order of the Trustees.

President.

ENGINEER'S REPORT.

To the Trustees of the
Philadelphia Gas Works.

GENTLEMEN:—I have the honor to present the Forty-second Annual Report of the condition of the Works, with a detailed statement of their operations for the year 1876.

The total amount of gas made during 1876 was 2,154,281,000 cubic feet, being an increase in quantity over the year 1875 of 281,089,000 cubic feet, or 15 per cent., making the total product of the Works since their erection 24,181,627,000 cubic feet.

The amount manufactured at the different stations was as follows:

Gas made at Twenty sixth Ward Works	638,258,000
Gas made at Ninth Ward Works.....	1,297,763,000
Gas made at Fifteenth Ward Works.....	154,390,000
Gas made at the Twenty-first Ward Works.....	63,870,000
Total.....	<u>2,154,281,000</u>

The maximum consumption in twenty-four hours was 8,794,000 cubic feet, which occurred on the night of the 18th of December.

The maximum production of gas in twenty-four hours was 8,176,000 cubic feet.

The annexed statement shows the quantity of materials used in the manufacture and purification of gas.

The number of meters and service pipes introduced during the year has been:

In Wards comprised in limits of old City.....	265
In Spring Garden and Penn.....	1,512
In Moyamensing.....	591
In Southwark.....	272
In Richmond.....	102
In Kensington.....	378
In Twenty-first Ward.....	93
In Twenty-second Ward.....	165
In Twenty-third Ward.....	81
In Twenty-fourth and Twenty-seventh Wards.....	785
In all.....	<u>4,274</u>

Adding these to total number before in use, makes the total number 89,386.

The applications for gas registered during the year have been—

At the Seventh street office.....	10,121
At the Spring Garden office.....	6,624
At the Twenty-first Ward office.....	438
At the Twenty-second Ward office.....	519
At the Twenty-third Ward office.....	466
At the Twenty-seventh Ward office.....	1,658
Total.....	<u>19,856</u>

Deducting removals and discontinuances, amounting to 15,712, shows an increase of 4,144, which, added to former number of consumers, makes the total number now on the books of the Trust, 90,443.

The lights added during the year were:—

In old City.....	20,534
In Spring Garden and Penn.....	30,629
In Southwark.....	2,571
In Moyamensing.....	5,781
In Richmond.....	1,600
In Kensington.....	5,162
In Twenty-first Ward.....	2,264
In Twenty-second Ward.....	2,285
In Twenty-third Ward.....	994
In Twenty-fourth and Twenty-seventh Wards.....	18,353
	<hr/>
	90,173
Previously in use.....	1,191,393
	<hr/>
Total.....	1,281,566
	<hr/>

There are now under the charge of the Trust 10,875 public lamps, supplied with gas from these Works, and 475 from the Northern Liberties Works, making a total of 11,350.

112,993 feet of street mains were laid during the year, making the entire length of mains belonging to the Trust 3,561,308 feet, or over 674½ miles.

Operations at the new works in the Twenty-fifth Ward have so far progressed as to leave no doubt of their being completed, ready for use, prior to the heavy consumption of next winter.

The present works are in good condition ; the large amount of gas required during the year will, however, necessitate the renewal of more than the average number of retorts, and will, therefore, increase the repair account of the present year.

A portion of the Twenty-first Ward has been lighted since August last with gas made at the Manayunk Works, by what is known as the Lowe process. Its value, as compared with coal gas, will be submitted to you as soon as the report is received from Professors Rogers and Stephens, who are now making an analysis of it.

A series of complaints were filed with the proper Court, by citizens residing in the vicinity of the Ninth Ward Works, complaining of the disagreeable odors arising from the burning of oyster-shells and the spent lime from the purifiers. The lime-kilns, by your direction, have been removed, and the odors from spent lime materially lessened ; and by the use of other material in connection with lime, as suggested by the commission appointed

by the Court, it has been demonstrated by experiment that the nuisance complained of can be almost entirely abated.

A tabular statement of the past and of each preceding year will be found annexed.

It again affords me much pleasure to bear testimony to the faithful manner in which all of the officers in my department have discharged their several duties.

Yours respectfully,

THOMAS R. BROWN,

Engineer.

SAMUEL R. MARSHALL,

JOHN COCHRAN.

LAW DEPARTMENT,

Philadelphia, January 22, 1877.

JOSEPH L. CAVEN, ESQ.,

DEAR SIR:—As requested by you, I have examined the ordinance referred to a Committee of which you are Chairman, taking possession of the property of the Philadelphia Gas Works.

Your ordinance provides for the absolute security of the bondholders, and in this respect differs from the ordinance passed in 1868, the execution of which was restrained by the Supreme Court.

I am of opinion that the ordinance, as drafted, if passed, will be sustained by the Courts.

I am very respectfully, &c.,

CHARLES H. T. COLLIS,
City Solicitor.

AN ORDINANCE

Taking possession of the property in the custody of the Trustees of the Philadelphia Gas Works, and to make an appropriation for the payment of certain outstanding loans, and the interest on loans created for the use of said gas works.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the sum of five hundred thousand dollars is hereby appropriated to pay the loans of any holder of the bonds of the City of Philadelphia, issued on the pledge and stipulation that the gas works shall be controlled and managed by a Board of Trustees, elected and constituted under any ordinance of the City of Philadelphia, said payment to be made only in case the holder of said bond shall demand the same before maturity.

SECT. 2. That from and after July first, one thousand eight hundred and seventy-seven, the "Trustees of the Philadelphia Gas Works" be, and the same are, hereby abolished, and all ordinances providing for the election thereof are to that extent hereby repealed.

SECT. 3. The officers and employees now employed by the Trustees of the Philadelphia Gas Works, shall continue with the same functions and salaries as heretofore, until the same shall be modified or altered. All receipts of moneys or funds of any description arising from, or in any manner connected with the manufacture and furnishing of gas, shall be paid weekly into the City Treasury, and the City Treasurer shall keep the same separate and apart from all other moneys and funds belonging to the City, and shall keep separate accounts thereof, and shall not pay out any part of the same except when directed so to do by ordinance of Councils.

SECT. 4. The interest of any loans heretofore created for the use of said gas works shall be paid from time to time as the same may become due, in the same manner as interest on other loans of the City of Philadelphia is paid, and the sinking funds provided for by the respective ordinances authorizing the said loans shall be maintained and held by the Commissioners of the Sinking Funds.

SECT. 5. Until otherwise provided, warrants which shall be required for any purpose incident to the carrying on of the said gas works, shall be drawn by the Mayor.

APPENDIX No. 60.

Philadelphia, February 1, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—The Committee on Finance respectfully report that they have considered the petition of certain claimants to be paid for work and material furnished by order of the Board of Health, during the year 1876, and report the same back with a negative recommendation, because

the work and material were furnished without authority of law. The Committee request the passage of the annexed resolution.

Very respectfully,

LOUIS WAGNER, <i>Ch'n</i> ,	W. L. ELKINS,
JOHN A. CLARK,	G. T. JONES,
EDWARD MATTHEWS,	SAMUEL R. MARSHALL,
JOHN P. WOOLVERTON,	ARTHUR THACHER,
MAXWELL ROWLAND,	JAS. R. GATES,
JOHN COCHRAN,	G. W. BUMM,
W. S. REYBURN,	ROBERT B. SALTER.

RESOLUTION

To discharge the Committee on Finance from the consideration of the petition of certain claimants for work and material furnished the Board of Health.

Resolved by the Select and Common Councils of the City of Philadelphia, That the Committee on Finance be discharged from the further consideration of the petition of certain claimants for work and material furnished in the abatement of nuisances as per order of the Board of Health, during the year 1876, to the amount of twelve thousand nine hundred and twenty-seven dollars and eighty-seven cents.

APPENDIX No. 61.

RESOLUTION

Of instruction to the Clerk of Common Council.

Resolved by the Common Council of the City of Philadelphia, That the Clerk of Common Council be, and he is, hereby instructed not to order any more printing or stationery until an ordinance shall pass making an appropriation to pay for the same.

APPENDIX No. 62.

ANNUAL REPORT OF THE BOARD OF FIRE
COMMISSIONERS.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—In conformity with the provisions of the ordinance creating the Fire Department, the Board of Commissioners beg leave to submit this their Sixth Annual Report of the condition and operation of the department for the year ending December 31, 1876. Annexed hereto is a statement in detail of the expenditures, rolls of the several companies, the apparatus and material owned by the City, and under the charge of this department, together with a statement of fires and alarms which have occurred during the past year, with the losses and insurance on the property exposed, and other matters of such general character as will tend to a correct knowledge of the workings of the department.

The department still maintains that effectiveness which has earned for itself the reputation of being one of the most efficient in the world. Discipline is still maintained in an eminent degree, and insubordination is severely rebuked whenever and wherever it is known to exist, but it so rarely occurs, and the cases are so isolated, that but few men have been dismissed during the past year. The men take an interest in their calling, and their prompt answer to the signal is the best proof of their fitness for the work allotted them. Their intrepidity and daring on the fire ground have elicited praise from a people whose discernment would justify no craven disregard of duty. The City should feel a just pride in a

department so admirably drilled in their work that the citizen can feel a sense of security from one of the most dreaded calamities that can be visited upon a community such as ours. Your Board cannot help thus speaking of the department over which they preside, as it is but a just tribute to the officers and members of an organization who are never wanting in the hour of peril.

The repair shop, organized as an economical adjunct, has fully justified the efforts made to organize it, and it was in contemplation to manufacture lighter engines to be substituted in the place of the heavy and cumbersome ones now in use, but the limited appropriation made for the current year has compelled us to abandon the project for the present.

The number of horses in the department is one hundred and twenty-eight (128); there has been purchased during the year twenty-five (25); during the same period four (4) have died, and there have been thirteen (13) sold by order of the Board, and the proceeds, eight hundred and ninety (890) dollars and fifty-five (55) cents, together with four hundred and fifty (450) dollars from sale of manure, and eighty-three (83) dollars and eighty (80) cents from sale of useless material, making in all the sum of fourteen hundred and twenty-four (1,424) dollars and thirty-five (35) cents, paid over to the City Treasurer.

In conclusion, the Commission desire to avail themselves of this opportunity to express their sincere thanks to the Committee on Fire Department for their earnest co-operation in all matters tending to the success of the department.

JACOB LAUDENSLAGER,
President.

Attest—JOHN R. CANTLIN,
Secretary.

REPORT OF CHIEF ENGINEER.

Philadelphia, January 1, 1877.

To the President and Members of the
Philadelphia Fire Commission.

GENTLEMEN:—In accordance with the requirements of the eleventh section of the ordinance, approved on the 29th day of December, 1870, creating and reorganizing the Fire Department of the City of Philadelphia, I have the honor to submit this, the sixth annual report of the present condition and efficiency of the department in my charge, embracing a statement in detail of the number of fires, and the causes of such fires, the losses, and the insurance for the year, as near as has been possible to obtain them. Also, a full and complete list of all the employes attached to the department, with their names, rank, age, residence, and occupation, with a schedule of property held in charge by the different companies on the first day of January, 1877. Also, a tabular statement of the number of alarms by days; number of first, second, third, and fourth alarms; false alarms; fires where losses have exceeded twenty thousand (20,000) dollars; chief and assistant engineers' attendance at fires; Company attendance at fires, together with such other information as may be of benefit for future reference.

The department as now organized consists of—

One chief engineer.

Five assistant engineers.

Twenty-seven foremen of engine companies.

Five foremen of hook and ladder companies.

Twenty-seven engineers of companies.

Twenty-seven firemen of companies.

Thirty-two drivers of companies.

Five tillermen of hook and ladder companies.

Two hundred and twelve permanent hosemen.

Fifty permanent hook and ladder men.

Eight temporary hosemen located in rural districts.

They are divided into thirty-two companies as follows:

Twenty-seven steam engine companies, five hook and ladder companies, with the addition of hose and hose carriage at each station.

There is also a hand engine, hose, and hose carriage, and all the necessary equipments, at each of the following rural stations: Chestnut Hill, Roxborough, Kingsessing, and Bridesburg.

There are also in the department seven steam engines and two hook and ladder trucks used as substitutes.

Hose.

There are in use at stations forty-seven thousand five hundred feet of rubber hose; also, three thousand seven hundred and fifty feet of linen hose, rubber lined, all with the Jones patent coupling.

Fuel Wagons.

There are six fuel wagons in the department, each capable of carrying one ton of engine coal and one-half cord of wood, to be used in case of large fires, where more fuel is required than is carried by the engines.

One stationed at headquarters, No. 1328 Race street.

One stationed at station No. 10, No. 810 Morris street.

One stationed at station No. 26, No. 1013 Hamilton street.

One stationed at station No. 27, No. 2202 Columbia avenue.

One stationed at station "C," corner of Norris and Sepviva streets.

One stationed at station "E," corner of Twentieth and Hand streets.

Fires.

The accompanying statement shows that the whole number of fires attended by this department during the past year was eight hundred and ten (810), with a loss of property amounting to one million three hundred and sixty-six thousand nine hundred and four (1,366,904) dollars, which, by a comparison with the previous year shows an increase of one hundred and seventy-two (172) fires, and an increased loss of property of thirteen thousand six hundred and forty-five (13,645) dollars. The losses, as near as could be ascertained, are covered by insurances amounting to five million eight hundred and thirty-one thousand nine hundred and fifteen (5,831,915) dollars.

Deaths and Accidents.

It becomes my painful duty to record the deaths of, and accidents to, the following members, while in the discharge of their duties :

Deaths.

Edward W. Paul, hoseman attached to Engine Company No. 24, died April 24; cause of death, consumption.

William Barr, hoseman attached to Engine Company No. 18, died April 27; cause of death, consumption.

Hugh McClintock, acting Assistant Engineer, died June 21; cause of death, injuries received at fire.

James McFate, hoseman attached to Engine Company No. 24, died December 1; cause of death, consumption.

Accidents.

The following is a record of accidents that have occurred to members of the department during the past year:

Hugh McClintock, acting Assistant Engineer, received severe and fatal internal injuries, caused by falling from the roof of No. 313 Market street, during the fire at Wood, Marsh & Co.'s dry goods warehouse. Alarm from box 41, March 4.

James C. Baxter, Assistant Engineer, foot and knee severely burned at fire No. 1145 St. John street. Alarm from box 242, July 26.

William F. Mooney, Assistant Engineer, right foot badly injured, caused by being run over by hose cart while proceeding to fire. Alarm from box 239, December 28.

W. S. Penrose, driver to Chief Engineer, received severe sprain of ankle, also slight injuries about the head, caused by collision and being thrown from his carriage while proceeding to fire. Alarm from box 176, November 18.

Andrew Kilpatrick, fireman attached to Engine Company No. 4, slightly injured, and William J. Black, hoseman of same company, had his left arm dislocated, caused by the upsetting of hose cart at Twelfth and Chestnut, while proceeding to fire. Alarm from box 14, April 14.

William Irwin, engineer attached to Engine Company No. 11, ankle badly sprained, caused by the slipping of a step ladder while winding clock at engine station, December 25.

Hudson Davis, sub-hoseman attached to Engine Company No. 13, had his fingers badly crushed, caused by being caught in roller of hose cart. Alarm from box 238, January 3.

John Buck, fireman attached to Engine Company No. 15, severely burned about the face and hands at fire No. 1145 St. John street. Alarm from box 242, July 26.

Samuel Suplee, engineer attached to Engine Company No. 16, arm badly bruised, caused by colliding with a car while proceeding to fire. Alarm from box 163, April 21.

Samuel Suplee, engineer as above, severely bruised about the body, caused by being caught between engine and door of engine house, while answering alarm from box 272, July 5.

William Lex, hoseman attached to Engine Company No. 18, leg fractured, caused by falling from step ladder while answering an alarm from box 423, September 9.

James Brown, hoseman attached to Engine Company No. 26, had leg broken, caused by being thrown from engine while proceeding to fire. Alarm local, April 15.

Henry Hollwarth, foreman attached to Engine Company No. 21, ankle broken, caused by the falling of a ladder at fire Emerald and Sargeant street. Alarm from box 361, July 7.

George Cost, hoseman attached to Engine Company No. 21, ankle sprained, also bruised about the body, caused by the falling of a ladder at above fire. Alarm from box 361, July 7.

George R. Orr, engineer attached to Engine Company No. 22, feet severely injured, caused by slipping while endeavoring to get on engine, while answering alarm from box 43, July 15.

James C. Handley, hoseman attached to Engine Company No. 23, slightly injured at fire. Alarm from box 361, December 16.

James A. Mack, foreman attached to Truck Company B, hip severely injured while attending alarm from box 3, January 22.

John Peck, ladderman attached to Truck Company B, badly injured about the head, caused by being knocked from a ladder by a falling flag staff at fire Twelfth and Callowhill street. Alarm from box 67, February 22.

William T. Snyder, tillerman attached to Truck Company B, cap of knee badly injured while answering an alarm from box 68, June 14.

George Dungan, ladderman attached to Truck Company B, became overheated while attending alarm from box 236, July 2.

Francis Burk, ladderman attached to Truck Company B, received severe sprain of ankle while answering alarm from box 57, July 3.

James Mack, foreman attached to Truck Company B, severely injured, caused by running a nail in his foot at fire. Alarm from box 231, July 7. Also sprained his wrist at fire, alarm from box 361, July 7.

Francis Lowery, attached to above company, received severe wound of hand, caused by running nail in it at fire. Alarm from box 361, July 7.

David Sisk, tillerman attached to Truck Company C, small finger of right hand crushed, caused by being caught in tiller ratchet. Alarm from box 242, January 11.

George Gray, ladderman attached to Truck Company D, severely injured by falling from roof at fire 313 Market street. Alarm from box 41, March 4.

George Schlag, ladderman attached to Truck Company D, foot badly injured, caused by running a splinter in it while responding to alarm from box 42, December 8.

To add to the efficiency of the Fire Department, I recommend that a steam engine company be organized and located in the neighborhood of Thirty-eighth and Haverford streets,

West Philadelphia. Also, combine at this proposed station a first-class hook and ladder truck ; by locating this company it will give sufficient protection to the thickly built up and rapidly growing portion of the City. I will state in connection with this recommendation that there are but two fire stations located west of the Schuylkill river, No. 5 Engine Company, located at Thirty-seventh and Ludlow streets, and No. 16 Engine Company, located at Fifty-first and Lancaster avenue, a very great distance apart, which leaves a thickly built up, valuable, and populated portion of West Philadelphia without sufficient protection.

The Fire-alarm Telegraph.

The fire-alarm telegraph is still lacking in that efficiency which the wants of the community demand. Alarm boxes sparsely situated, a few covering so vast an extent of territory, that the City has cause to thank Providence, and not the telegraph for its preservation from anything like a serious conflagration during the past years. There are some of the most valuable, populous and dangerous parts of this City so exposed and without sufficient telegraph protection, that before an alarm could be transmitted a fire could gain great headway, and leave the ruins of warehouses and dwellings as a monument of the folly of trifling with the repeated warnings which have so often and candidly been brought to your notice.

Chemical Engines.

I recommend the purchase of a first-class Chemical Engine, and its location somewhere between Chestnut and Arch streets, and Tenth street and the Delaware river ; the services of an engine of this class will be an additional protection from fire, and the saving from loss by water of a great amount of valuable goods and property in this business portion of the City.

I also recommend the purchase and use of Chemical Engines at the following Hand Engine Stations, viz.: at Chestnut Hill, Roxborough, and Kingsessing. There is at present a hand engine and hose carriage in charge of one hoseman at each of these rural stations. His services is insufficient to

handle the apparatus without depending upon the very uncertain services of citizens in the neighborhood. The Hand Engines could be disposed of and the most reliable Chemical Engines substituted.

Fire Plugs.

I call the attention of City Councils to a very serious cause of complaint, which is the freezing up of many of the fire-plugs, during the winter season, at almost every fire. The firemen experience great trouble and delay in getting into service quickly. I recommend that where new ones are to be set that non-freezing plugs be substituted in place of the present defective and ill-adapted hydrants or plugs, so as to meet the proper requirements of our fire service.

Conclusion.

During the year 1876 there has been an advance in the efficiency and discipline of the members of the department. The officers and members deserve the highest praise for the promptness with which they have performed every task, no matter how severe, and gradually winning the good-will and esteem of the citizens of this great City. They have behaved as true firemen and good citizens, with but one object in view, that being the protection of life and property from destruction by fire.

I desire to return my sincere thanks to his Honor the Mayor, William S. Stokley, Chief of Police Kennard H. Jones, Fire Marshal James S. Thompson, and the officers and men under their command, and to the officers and men attached to the Delaware and Schuylkill Police and Fire tug boats, for their ever prompt assistance rendered in time of need.

I return my thanks to President Atwood Smith and Captain T. McCusker, of the Fire Insurance Patrol, and to the efficient, useful, and ever-active body of men attached to that useful organization, who have at all times rendered valuable aid to this department.

And to the President and members of the Fire Commission I offer to each of you my thanks for the many acts of kindness done, and valuable suggestions offered to me, in our official relations, and I only trust that my humble efforts to protect the property of our fellow-citizens may merit the favor I receive and the confidence which has been so fully accorded me.

The following statement shows the valuation of property in Philadelphia which receives fire protection :

Area of the City, $129\frac{1}{3}$ square miles.

Total number of buildings, 145,001; of this number 133,343 are dwelling-houses, and 11,658 are stores, factories, and other buildings.

Assessed value of real and personal estate (subject to City tax), \$595,413,378.

Respectfully submitted,

WILLIAM H. JOHNSON,
Chief Engineer.

APPENDIX No. 63.

RESOLUTION

To meet in Joint Convention.

Resolved by Common Council, That Select Council be invited to meet Common Council in Joint Convention in Common Council Chamber, this Thursday, February 8, 1877, at 4½ o'clock, P. M., for the purpose of electing a Chief Engineer of the Water Works, and a Commissioner of Markets and City Property.

APPENDIX No. 64.

REPORT ON THE HART CREEK SEWER.

To the Executive Committee

Citizens' Municipal Reform Association.

With this, I have the honor to submit the report of Messrs. W. Milnor Roberts and Thomas Seabrook, Jr., the engineers who have investigated the character of the work of the Hart Creek Sewer. The high professional and personal standing of these gentlemen, and the minute details into which they have entered, render it necessary for me only to call attention briefly to a few of the many points suggested by an examination of these documents. It would be difficult to exaggerate the importance of the whole, as an illustration of the manner in which the business of the City is transacted, and the cause why our revenues are always inadequate to our expenditures, with the resultant oppressive taxation, and constantly increasing debt.

It is not easy to understand the influences which led Councils to award the contract to a bidder, whose prices for the various items in the quantities estimated as required at the time of letting the contract amounted to \$230,885, when another responsible contractor put in a bid which amounted to only \$211,310. This favoritism, however, was but the

commencement, and after the work was begun, the contractor appears to have been allowed to do whatever he pleased, both as to amount and quality of work. No effective supervision was exercised ; his work was accepted, whether in accordance or not with the terms of the specifications, and the amounts allowed in the monthly estimates of payments, appears to have been arrived at by calculations made from *plans in the office* without intelligent examination as to whether the work was really executed.

Thus virtually left to his own devices, the contractor paid no regard to the terms of his contract, except to demand and receive the prices provided for the various items in his bid. The original plan of the sewer, as prepared by Mr. Kneass in 1872, contemplated an excavation, hollowed out to receive the brick work, without additional support. When the calculations were made in October 1875, under which the contract was awarded, a moderate item of 5000 cubic yards of rubble masonry makes its appearance, but no timber is estimated for. It is on these apparently insignificant items of masonry and timber that the enormous demands now made by the contractor are principally based.

It is a well-known device of contractors to place upon items which are apparently small, but really expan-sible, heavy prices which will compensate in the end for lower rates upon other items which at first are ostensibly more important. In Mr. Malone's bid, rubble masonry is estimated at \$6 per cubic yard, and timber at \$40 per 1000 feet, while Mr. Smith's bid is, masonry \$3.75 per cubic yard, and timber \$25 per 1000 feet.

Now, in the process of construction, these items, which were scarcely contemplated by so competent an engineer as Mr. Kneass, and which in Mr. Smedley's estimate were but a small percentage of the whole, have attained a magnitude which explains the exaggerated cost of the sewer, for their growth has been necessarily attended with a corresponding increase in the excavation and refilling.

The excuse at first alleged for this change in the plans was the existence of quicksands, not anticipated or discoverable before excavation. In all the examinations made by the engineers, however, no trace of quicksand, or other treacherous bottom, has been found, and I believe the contractor

himself has now abandoned the assertion. The only sand indeed found on the excavation, was a source of profit and real value to the contractor, as it was a good sharp building sand, which he used in preparing cement mortar, a purpose for which quicksands are utterly unfit, and cannot be used.

The items thus superfluously introduced in the sewer, are charged for by the contractor according to the final estimate of December 29, 1876, as follows :

28,600 cubic yards of rubble masonry, at \$6 per yard,	-	-	-	-	\$171,600
925,000 feet of timber and planking, at \$40 per M,					37,020
					<hr/>
					\$208,620

though in the estimate under which the awards were made, they amounted, in Mr. Malone's schedule, to only \$30,000; and in Mr. Smith's, to but \$18,750.

But this is not all. The quality of the rubble masonry, as found by the engineers, is wholly at variance with the requirements of the specifications, "scarcely deserving the name of rubble masonry." It is worth, at the outside, not over \$4 per cubic yard. At this rate, it would afford a large profit to the contractor; and the bid of Mr. Smith, \$3.75 per yard, is probably fully as much as it is worth. As for the timber, none of it is worth more than \$17 per thousand on the cars in close proximity to the sewer, while much of it is hemlock scantling of small dimensions, costing not over \$8 per thousand in the raft at Gunner's Run.

Nor yet is this all. As far as the investigations of the engineers could reach, during the limited time allowed, and the difficulties under which they labored, the *quantity* of the masonry was as deficient as the *quality*.

This can best be understood by reference to the diagrams on page , representing cross-sections of the masonry bed of the sewer, in which the external black line shows the area on the plans, by which the work was estimated and paid for, while the dotted line shows the amount of masonry actually existing. In the second diagram the shaded portion shows some additional masonry underpinned, or added, after the first measurement was made.

If the whole length of the sewer corresponds in this respect to the parts concerning which the engineers have actual proof, the amount of masonry absolutely laid is only 16,874 cubic yards, instead of 28,600, amounting, at the contract price of \$6.00 per yard, to an overcharge of \$70,356 on this item alone.

It will also be seen from the diagram how greatly the cost of excavation has been increased by the process.

The item of rock-cutting, also, though comparatively a small one, is also highly suggestive. No rock appears to have been thought of until the estimate of December 8, when it suddenly makes its appearance in an item of 4,600 cubic yards, increased in the final estimate of December 29 to 10,000 yards. So far as the examination of the engineers could reach, and from such evidence as they could obtain, but little material has been met with in the whole length of the sewer which could be classed as rock under the specifications, and through their representations I believe the engineer representing the City in charge of the work will disallow at least a portion of the claim.

The item of refilling, though but slight in cost, is of great importance as regards the durability of the work, and the paving of the streets under which it runs. In the specifications this has been provided for with the most minute care, as to packing and ramming, so that the ground shall be left firm and solid, and not liable to sinking or caving. These specifications, according to the engineers' report, have been wholly disregarded during the period they were on the ground, the excavated material being dumped into the cutting in the most careless manner, which will for years entail upon the city a constant expenditure for the repair of streets, and constant discomfort upon the citizens along the line.

In short, it may be said that in the construction of the sewer there is scarcely a detail in which the obligations of the contract have been regarded, while the cost has been so enormously increased. Even the brickwork, which appears otherwise to be almost the sole redeeming feature of the job, has been seriously impaired by being urged forward in violation of the contract, during the freezing weather of the past two months.

The cause for this improvident haste is not apparent. The contractor had twelve months from June 12, 1876, in which to finish the work. The contract provided "that all the masonry should cease after December 1, unless specially authorized in writing by the Chief Engineer." No such authorization appears to have been given, yet the work was urged forward as rapidly as possible. On December 29 the Chief Engineer authorized the final estimates, amounting to the enormous aggregate of \$450,496; and a desperate effort was made to push through the appropriation for the deficiency at the last regular meeting of Councils, Thursday, December 28. When this failed, the unprecedented expedient was adopted of calling a special meeting for Saturday, December 30, for the purpose of making a final attempt to get the money. The City is usually not so eager to pay its debts, just or unjust; nor can it be easily explained why an appropriation could not have been made in January as readily as in December, or why the contractor was allowed to proceed during a severe winter, to the manifest detriment of the work.

If there were any secret influences at work, however, they have not appeared on the surface.

In conclusion, I would call your attention to the well-considered opinion of the engineers, that Hart Creek Sewer could have been well and substantially built, according to the original plans, with a fair profit to the contractor, for the sum of \$250,000, while the City is charged \$450,000 for what they consider imperfect and unsatisfactory work. The report shows that there are possible over-estimates to the contractor on excavation, rock, rubble masonry, and timber and plank; and on account of the rubble masonry being inferior to the requirements of the specification, which together amount to \$121,921. Whether this is the result of fraud and collusion, it is not my province to decide. After the revelations made in the engineers' report, it is scarcely to be anticipated that Mr. Malone's claim will be paid without resistance; and if he should proceed to establish his rights in Court, such developments will doubtless be made as will place the responsibility where it properly belongs.

Meanwhile the public can learn from this case the defects in our system, which renders efficiency and economy a vir-

tual impossibility, and improvidence and extravagance the prevailing rule in municipal affairs.

From first to last there has been no control really exercised by any one. Responsibility has been divided, under the law, between the offices of the Chief Engineer, the Commissioner of Highways, and the District Surveyor. No close intelligent supervision has been exercised; the contractor has been allowed to do as he pleased, and he has acted as though sure that whatever he chose to do would be accepted and paid for. Hart Creek Sewer may be regarded as the type of nearly all the work that is done for the City. Big jobs and little—paving, reservoirs, school-houses—are managed substantially in the same manner; and until the system is changed, responsibility concentrated, and the management of affairs placed in honest and competent hands, the suffering tax-payer may vainly look for relief from his ever increasing burdens.

It is proper to state, that the origin of this investigation is due to Mr. George W. Smith and Mr. Andrew Hague, both of whom deserve the thanks of the community.

All of which is respectfully submitted.

REPORT OF ENGINEERS.

HENRY B. TATHAM, Esq.,

Philadelphia.

DEAR SIR:—Having completed the investigation of the Hart Creek Sewer, we respectfully present the following report:—

The examination of the sewer was commenced January 1, by Mr. Thomas Seabrook, Jr., and our joint duties began January 4, at which time we were introduced by you to Mr. Smedley, Chief Engineer and Surveyor, and to his assistant engineer in charge, Mr. Rudolph Hering. The gentlemen courteously placed at our disposal for examination the contract, specifications, plan, and estimates. After studying these, so as to obtain a general idea of the nature and extent of the sewer, Mr. Herring accompanied us, the same afternoon, to the work, and introduced us to the contractor, Mr. R. A. Malone, and the inspector, Mr. Benjamin Hoover, who gave us further information concerning the work. Afterward we made repeated visits, and carefully observed the method of construction, its supervision, and the manner in which the different parts of the work had been done.

Most of the sewer had been built and covered with embankment. There were, however, four places incompletd, namely, the upper end and three intermediate places. The masonry at the outlet of the sewer was not quite done, but it was finished a few days afterward.

The work was going on vigorously just below the Frankford road, progressing westward, consisting of excavation, rubble masonry, brickwork, and refilling, notwithstanding the severity of the weather. It is unusual to lay brickwork and masonry in cement mortar so late in the season, and it is impossible to make such masonry as good as when laid in the proper time. We saw the cement sometimes stiff on top from the cold.

Noticing that the specification required the laying of masonry to cease the 1st of December, the Chief Engineer stated that the contractor was doing the work upon his own responsibility since that date.

Description of the Sewer.

The length is 5,160 feet; 120 feet less than a mile. It is arranged in three parts, every part being circular, but of different diameters. The upper portion, 1,720 feet long, is 15 feet in diameter. The middle portion, 2,200 feet long, is 16½ feet diameter. The lower portion, 1,240 feet long, is a double or twin sewer, each circle being 13 feet diameter. The height was here reduced from 16½ to 13 feet, to conform to the grade of the Pennsylvania Railroad, under which the twin sewers pass; the bottom of the sewer at the outlet being about 3 feet below ordinary high tide; the tidal rise in the Delaware river at the City being about 6 feet, the bottom is about 3 feet above low tide.

The sewer begins in the valley of Hart creek, or Gunner's run, at the junction of Leamy and Indiana streets, and runs thence along Indiana street to Hart lane, along Hart lane to D street, along D street to Somerset street, and along Somerset street to the old canal bridge, discharging through its now western abutment into the Aramingo Canal, which is nothing more than the old natural bed of Gunner's run, slightly embanked. This outlet is about a mile and an eighth, measured along Gunner's run to its mouth at the Delaware river.

The grade of the sewer is four-tenths of a foot per 100 feet for 1,800 feet from the upper end, and three-tenths of a foot per 100 feet thence to the lower end. The whole drainage area is 2,150 acres, or 3.36 square miles; being one-half more than the drainage area of the old city proper, between Vine and South streets, and the Schuylkill and Delaware rivers, which is about $2\frac{1}{4}$ square miles.

By an ordinance of Councils, passed over twenty years ago, the sizes of sewers were required to be sufficient to pass a flow of 60 cubic feet per minute per acre, for the passage of storm water. Each part of this sewer is of ample size to freely pass this large storm discharge of rain-fall, which amounts to 129,000 cubic feet per minute. Should such a discharge occur, it would be likely to undermine the eastern abutment of the outlet bridge, which stands opposite to the lower end of the sewer, unless it should be guarded in some way.

A large portion of this area to be drained is rural; but when it shall be built up, there will be no other outlet for the rain-fall and sewerage of this 2,150 acres.

Plans of the Sewer.

Originally, in 1872, when the plans were arranged by Mr. Kneass, former Chief Engineer and Surveyor, two kinds of sewers were provided for: one for the single sewers, 15 feet and $16\frac{1}{2}$ feet diameter respectively; and one for the twin sewers, each circle 13 feet diameter. It was not contemplated to put in a timber and plank foundation under any portion of the sewer, excepting 30 feet in length, under the chamber between the $16\frac{1}{2}$ feet sewer and the twin sewers. There, as the plan shows, 9-inch square timbers, 3 feet apart, were to be laid and covered with two courses of 3-inch plank. This would have required but a small quantity of timber and plank. The general plan was to take out the excavations to fit the curve of the lower part of the sewer, upon which the brickwork was to be laid, requiring only a small quantity of rubble masonry. Afterward, in 1875, when this sewer was publicly advertised for letting, no quantities of the different kinds of work were exhibited to the bidders; but certain

quantities were used by the engineer in making calculations for comparing the gross amounts of the respective bids. At that time an item of 5,000 cubic yards of rubble masonry was used in the calculation; but there was no item of timber and plank calculated. These two items, rubble masonry and timber and plank, have since become large and important.

We have not been shown any plan representing timber and plank foundation under any portion of the sewer, excepting that under the chamber, already described. The only drawing we have seen, representing the sewer, has upon it two kinds of work: one with a masonry foundation 12 inches thick, and masonry cradles for the support of the brickwork, to be used on embankment, or when the depth of excavation was slight; the other, in excavation, without rubble masonry foundations or cradle, with only a small shoulder of masonry near the spring line of the arch. The plan adopted and upon which the work in progress has been *estimated*, was a heavy foundation of solid timber and plank, 15 inches thick, on a length of 1,240 feet immediately westward of the Aramingo Canal; the deck covered with 12 inches of masonry, and with heavy side walls and cradle of masonry upon which the brick twin sewers rest; and westward of the chamber, all the way through the deep cutting to the upper end, a distance of 3,920 feet, there was to be a foundation of masonry 12 inches deep, and heavy side walls of masonry for the support of the brick sewer.

The plan, as shown on the drawing, of shaping the excavation to the curve of the brickwork, has not been adopted on any portion of the sewer.

Change of Plan.

The changes of plan have added very largely to the cost of the sewer. The necessity for these changes is, therefore, one of the points to be investigated.

According to the statements of the engineers and contractor these changes could not have been decided upon at the time of the letting, or there would have been a large item of timber and plank, and a very large quantity of rubble masonry included in the calculation of the comparative

amounts of the different bids, which were not included ; and which would have changed the relative amounts of the several bids.

The engineers and contractor state that these changes were made after the excavations had disclosed troublesome quicksands, and very soft bottom, requiring an extraordinary timber and plank foundation on about 1,240 feet in length, and masonry foundation, and heavy side walls, all the way through the deep excavation ; and nearly doubling the preliminary estimated cost.

Estimate for Quantities.

For convenient reference a table is annexed, showing the items of work estimated in the two preliminary estimates, of 1872 and 1875, and in the approximate final estimate made out December 29, 1876.

Bids for the Sewer.

There were nineteen bids, and, calculated from the items used at the time of the letting, Mr. G. W. Smith's bid was \$19,575 lower than that of Mr. R. A. Malone; but calculated from the items given in the approximate final estimate of December 29, 1876, Mr. Smith's bid is \$83,385 lower than Mr. Malone's.

The following table shows the prices and amounts of these two bids, with the quantities, as calculated Oct. 5, 1875.

In laying before you these figures, obtained in the office of the Chief Engineer and Surveyor, we do not consider it part of our duty to discuss the awarding of the contract, but it should be noticed, that although the difference between these two bids, according to the quantities used at the time of the letting, was not quite \$20,000, it is now, according to the quantities in the approximate final estimate, over \$80,000.

Current Monthly Estimates.

Contract dated May 23, 1876. Official notice to begin work June 12, 1876.

An inspection of the foregoing table of estimates shows several facts of importance.

The first estimate is dated June 20, only seven working days after the official notification to begin, and yet there are

returned as done 30,600 cubic yards of excavating, an enormous quantity for such a brief period. Upon inquiring of the Chief Engineer as to the time when the contractor had begun work, he said he was not sure, but thought he had commenced before the 12th of June, the date of his official notification. The engineer in charge, in answer to a similar inquiry, stated that he did not know when the contractor had commenced; but that he did not go out to the work till after the official notification had been given.

On asking the contractor he said he thought he had begun work on the first Monday after signing the contract, that was the 29th of May.

The amount of work estimated as done during the month ending September 20, is also notably large: consisting of

39,000 cubic yards of excavation.

17,000 " " refilling.

4,200 " " brick masonry.

6,100 " " rubble masonry.

338,000 feet B. M. of timber and plank foundation, amounting, including a few small items, to \$100,392.

The amount estimated as done between October 16 and December 8 is also unusually large; the leading items being as follows:

16,800 cubic yards of excavation.

4,600 " " rock.

6,300 " " refilling.

5,176 " " brickwork.

8,252 " " rubble masonry.

18,900 feet B. M. of timber and plank foundation, amounting, including a few minor items, to \$114,691.

Thus, for about 70 working days, running through two estimates, there was estimated \$215,000.

Either an immense force must have been employed, or immense profits must have accrued.

It is also to be noted that at the date of December 8th there were 4,600 cubic yards of rock estimated as excavated, no rock having been estimated previously, while in the approximate final estimate in the same table, which was made out only three weeks afterward, there is an item of 10,000

cubic yards of rock. Under the head of "rock excavation" this will be more particularly referred to.

The Contract and Specification.

The contract, signed May 23, 1876, requires the work to be finished within twelve months from the date of official notification by the Chief Engineer, which was June 12, 1876.

The contract and specifications are admirably drawn for the protection of the city; the specifications are clear and rigid, and if properly enforced, should insure good work; but the provision for the supervision and inspection of the large amount of work upon this, and other city improvements, is entirely inadequate.

The Chief Engineer and Surveyor has but one assistant for this sewer, and a number of other important works scattered over the city, who could devote but a small portion of his time to its actual supervision. The only inspector for all the various parts of this important sewer does not receive his appointment from the Chief Engineer, but from the head of another independent City department, the Commissioner of Highways; while the laying out of the work, giving grades, levels, etc., is done by still another department, the District Surveyors, who are elected by the people; but no part of whose duty is to make any measurement of quantities of the different items of work, or to note the manner of doing the work, or to keep any records of such items, or to superintend in any way the performance of the contract. So that with the City's interests carefully guarded in the contract and specifications, the City is left very much in the power of the contractor, in consequence of the faultiness and weakness of the system under which this work has been carried on.

Mr. Smedley, the Chief Engineer and Surveyor, has told us that the system is better than it was formerly, when the City had no inspector of any kind. The inspector in this case is said to be a good bricklayer, and he could superintend a reasonable amount of bricklaying, cement mortar making, etc., but, when the work was being rushed through at four or more places at the same time, it was physically impossible for him to properly inspect, especially when they were laying 90,000 bricks per day.

The engineer in charge said to us, that he had travelled over the City railroads, and on foot, about thirty miles in a single day, in getting around over more than a dozen public improvements that he was obliged to look after. It was therefore not possible for him to be much of his time on this sewer; and he had no assistant of any grade to send in his place, when office duties, which he said were imperative and exacting, prevented him from going out to this work. He said he thought he had been on this work three days in the week, for about three hours at a time. We have never met with so important a work as this left so much to the contractor.

As there are various items of work of different kinds included in this contract, they may be referred to in the order in which they occur in the specifications, under distinct heads.

Ordinary Excavation.

“By ordinary excavation is understood the taking out of all materials that can be removed by pick and shovel or axe, whether hard-pan, quicksand, boulders, loose and disintegrated rock, timber, or stumps.”

According to this classification, it is clear that nearly all the excavation of this sewer falls under the head of ordinary excavation. The only other item is rock, the classification for which is so rigid that but a trifling quantity of the excavation could have been entitled to that classification.

“Not more than two hundred feet of trench shall be opened at any one time in advance of the completed sewer, unless by a written order, etc.”

“The bottom of the trench shall be excavated to the exact form and size of the lower half of the sewer, if so required. No allowance will be made for any earth excavated or caved in from outside of such widths.”

No portion of the excavation was required to be excavated in the form and size of the lower half of the sewer. It was all excavated either for timber and plank foundation, or for rubble masonry foundation; which, of course, increased the quantity to be excavated; but on a considerable portion of the length the width of the cuts was limited at the top to 34 feet, the distance between the curbs of the streets.

In the deep cuts in such streets it was not practicable to excavate at the bottom the width required by the plan, although the cuts shored up with uncommonly steep slopes, not over four or five feet in thirty feet depth. We had the best possible opportunity of seeing the deep cuts at the Frankford road, and near Kensington avenue, and we consider them very favorable for the excavation and construction of a sewer.

They were easily excavated, and easily sustained with a moderate amount of timber and plank shoring. We examined the fronts of all the houses along the streets through which the sewer is built, and found only four small two-story brick houses just above the old bed of Gunner's run which are out of plumb. Mr. Herring, the engineer in charge, said he was of opinion this was not due to the excavation of the sewer, but to original faulty construction. As the pavements were still standing in front of them, it is quite probable that their bad appearance was not caused by the sewer excavation.

One house at the corner of Somerset street and the Frankford road, was seriously injured after we began our examinations; but that was caused by the water breaking through a defective temporary bridge abutment just above, letting through a strong flow of water, which struck the cellar wall, and undermined it.

The seam of sand which is a few feet above the bottom of the cut, is not at all like quicksand, and there was no serious difficulty caused by it, notwithstanding the cut is 30 feet deep. The fact that during our examinations at that particular point the engineer in charge authorized the contractor to excavate to less width, and to lay less rubble masonry, goes to prove that the only trouble there was caused by the limited width of the cut at the top, being confined to 34 feet.

In regard to the quantity of excavation returned in the estimates of the work done, and on the approximate final estimate (taking the specification, the depths of the cuttings, and the widths as nearly as they can be arrived at), our calculations show a considerable smaller amount. The original estimate of Mr. Smedley was 110,000 cubic yards of earth, and 15,000 cubic yards of rock, a total of 125,000 cubic yards.

His present approximate estimate is 154,000 cubic yards of earth and 10,000 cubic yards of rock, making a total of 164,000 cubic yards, or 39,000 cubic yards more. The only place where any material increase seems to have been necessary was in the additional depth and a little extra width on 1240 feet in length under the twin sewers.

The measurements of work done were not made and kept in the usual manner by any one; the quantities being approximately obtained by memorandums of average widths, multiplied by the known depths. This, taken with reasonable care, might give the quantity the contractor was required by the specifications to excavate, but it might fail to give correctly the quantity actually excavated.

According to the best judgment we can form, the contractor has been estimating more cubic yards than he has taken out; chiefly in reduced widths, though partly in reduced depths, for side walls.

Rock Excavation.

Rock is described in the specification to be "the taking out of all material which can only be removed by blasting, plug and feather, or cold chisel. No soft or disintegrated rock which may be removed with a pick, and no boulders or loose rock * * * will be measured or allowed as rock."

This is a very strict classification indeed; and our investigations have shown that it has not been adhered to in the classification, when 4600 cubic yards of rock were returned in the estimate of December 8. Mr. Hering, the engineer in charge, stated to us that much of it was soft. The fact is, that quantity of rock, according to the specification, could not have been taken out at the place assigned to it, west of the Frankford road; and the inspector, Mr. Hoover, assured us there had been no rock east of that point; and we could see for ourselves that there was none at and near the Frankford road, though that shows the deepest cutting, 30 feet.

There has been a material error of judgment, to say the least, in connection with the estimate of rock. In regard to the original estimate of 15,000 cubic yards, before the work was begun, that may have been perfectly justifiable as a rea-

sonable precaution ; but estimating rock to a contractor when it is known, or should have been known, that it did not exist, is a different thing.

After examining the work, and finding there was no rock to be excavated, and there had been none to come out at the date of December 29, when 10,000 cubic yards were put into the approximate final estimate (only three days before our investigations began), we asked Mr. Hering for an explanation. He said the amount would be less, it would not be more than 5000 in the final. Afterward we were convinced that the amount of rock, 4600 cubic yards, estimated to the contractor December 8, according to the classification of the specifications, is largely over estimated, and that a considerable portion of it was merely ordinary excavation according to the specification.

As to the shape of the excavation through this rock, so-called, on a length of 500 feet between 4400 and 4900 feet from the lower end, the accounts are conflicting. At first it was that the masonry had been laid in the full dimensions all through the sewer, excepting only a comparatively small portion in the vicinity of the Frankford road.

The specification requires that the excavation in rock shall be taken out only six inches below the bottom of the brick-work, instead of one foot, where very soft ground might require a foot thickness of masonry or timber, etc.

If there had been *rock*, such as that described in the specification, of an average depth of seven feet, as claimed, nearly all of the side walls should have been omitted. So far as we have been able to ascertain, no instructions were given to the contractor to change the plan materially, if any, on account of rock. The material above the plank road, claimed by Mr. Malone to be rock, and which we saw in the excavation, was soft argillaceous, very easily removed with the pick, and is clearly described in the specification as "ordinary excavation."

Refilling.

The refilling over the sewer is regarded as a very important part of the work. We saw it going on upon this culvert for several weeks, and in a manner so entirely different from the requirements of the specifications that we quote a portion of that part of the contract:

14. "After the sewer is built the work shall be backed in, and carefully packed and rammed by trusty persons with proper material, as specified below, and with proper tools. The material shall be filled and rammed in layers not to exceed six inches in any place. The number of men back filling shall not exceed the number of those ramming."

During the time we observed this work going on no attention whatever was paid to the specification relating to "refilling." It was nothing more than ordinary embankment carted on, without any care, frozen lumps and stones, just as common railroad bank might be made up in winter. The specification demands good careful refilling, "embankment" is another thing in the specifications; but as the whole length of the sewer is an excavation, strictly, there is no embankment, it is all "refilling." The work of refilling is quite different from the specification of the refilling.

Brick Masonry.

The specifications for the brick masonry are admirable, and if carried out carefully would certainly secure first-class brickwork. There are only a few points in connection with the brickwork now going on, in the dead of winter, to which your attention may be called:—

"All bricks are to be thoroughly wet by immersion immediately before laying." This clause was not complied with during our examinations, and the reason assigned was that it was "too cold." We do not favor the plan of immersing bricks when it is freezing hard, nor can we recommend the laying of bricks in cement mortar at such a time.

"Every third course must be laid fair and smooth by line."

Although this was not generally done, the lines of brick were tolerably well maintained considering the weather and the speed at which they were laying them.

"All brickwork, as it progresses, must be racked back in courses, unless special permission be given for toothing."

We saw none that was racked back. We examined the top of the sewer at the Kensington avenue crossing, where an accumulation of surface water was leaking through the top of the sewer. It showed no such coating of cement-

mortar; nothing but bare bricks. Mr. Hering, who was present, said "it must have been washed off." The requirements in regard to the centres are very good, but they have not been adopted in doing the work.

"Each length is to be made at least ten feet long, and in a manner that two of such separate lengths shall be used adjoining each other, and that the back length may be drawn first."

"This back length of centre shall not be removed until the work upon it has thoroughly set and the refilling of earth has progressed up to the crown of the arch."

We found the centres were not so arranged that the back length could be drawn first; and the inspector said that they could not draw the back length till the front length had been drawn. We saw also that they were drawn without any reference whatever to the refilling; the arch would be finished, and the next day the centres would be withdrawn. Precisely what effect this system of working at this season of the year may have had upon this brick masonry we are not prepared to say.

In those portions of the sewer which have been some time laid, some of the cement-mortar was quite hard; in other places it was rather soft.

Our first impression, on seeing the interior of the sewer, was that the brickwork was good, but, observing afterwards that the specifications and the other part of the work in several important respects did not coincide, we were at some loss to judge concerning it. That which we saw laid was, so far as we could see, good work, and as it is considerably thicker in the arch than such spans should be according to theory, it ought to stand if the foundations are properly built, even if they contain much less stone masonry than the engineers required to be put in; but, in regard to that portion put in, in freezing weather, no theoretical or any other calculation is applicable.

In the $16\frac{1}{2}$ feet sewer there are about $87\frac{1}{2}$ cubic feet of brickwork for every foot in length; in the lower half about 27 cubic feet, and in the upper half about $60\frac{1}{2}$ cubic feet. This gives an average thickness of arch, above the springing

line of $2\frac{3}{4}$ feet, with a maximum thickness of $2\frac{1}{2}$ bricks, or about 21 inches. The maximum thickness on the haunches is $3\frac{1}{2}$ feet.

The plan of shaping the excavation and fitting the bottom of the brickwork, $1\frac{1}{2}$ bricks thick to it, has not been adopted on any portion of the sewer. We think it might have been used on portions of the route, especially in the rock, if there was any. The arrangement of the courses of the bricks, so as to throw the line of pressure at all points through the line of full bricks, is admirable.

The measurement of the brickwork by the engineer is made upon the plan, not upon the work, it being assumed by him that the work is built throughout in accordance therewith. Whether it has been so built or not we have no present means of knowing, excepting so far as we could see the work in progress.

Rubble Masonry.

The item of rubble masonry, although in the beginning regarded apparently as unimportant, has since become the most costly item in the contract. Originally there were but 500 cubic yards of this class of work estimated as likely to be necessary. At the letting in October, 1875, there were 5,000 cubic yards estimated for comparison of bids, while in the approximate final estimate of December 29, 1876, there are 28,600 cubic yards estimated, which, at the contract price of \$6 per cubic yard, is \$171,600.

The plan of this part of the work has, therefore, been changed since the contract was made, by the addition of a large amount of rubble masonry, the increased cost of which is \$141,600.

The engineers have stated that this increase was necessary in consequence of running sands, quicksands, and treacherous material upon which the sewer has to be built, and that 1,240 feet in length westward from its outlet, to insure its safety, had been laid upon a foundation, or deck of solid timber 12 inches thick, covered with a solid covering of 3-inch plank, this being covered with a foot depth of masonry 42 feet wide, upon which were laid the masonry side-walls and the twin brick sewers, each 13 feet diameter. The masonry side

walls were to be carried up to the height of about one foot above the springing line of the arch, $3\frac{1}{2}$ feet thick at the top, back of the brickwork, making the total height of the stone masonry, above the timber and plank foundation, $9\frac{1}{4}$ feet. The excavation for this length of 1,240 feet was made through Somerset street, which had been in part embanked; it had been paved and curbed, and used as a thoroughfare for more than twenty years. This embankment was about 50 feet wide on top, sloping down with the ordinary slope (of about one and a half to one) to the natural ground, which, in the lowest part near the outlet, was about four or five feet above the bottom of the sewer. On the residue of the route, 3,920 feet in length, which was all through deep excavation, a very short distance excepted, the bottom was to be covered with one foot of masonry the whole width of the sewer and side walls, making 32 feet wide under the $16\frac{1}{2}$ feet sewer, and 30 feet wide under the 15 feet sewer. There were 220 feet in length, as stated by the engineer in charge, laid with timber and plank foundation, westward of the Frankford road, under the single sewer, but he could not give the exact location. He said it was in small sections; that he had added them together, which made a total of 220 feet. He could not give the locality of a single section. We saw no plans of this timber and plank foundation, but obtained the above information verbally.

Borings made outside of the line, and also through the bottom of the sewer, did not show any quicksand. They showed a rather gravelly, sandy soil, apparently strong enough to support a sewer with a moderate expenditure for regulating the irregularities of the foundation.

From our examination of the excavations in the vicinity of the Frankford road, and at several places westward of that place, and from the information given us by the Engineer and contractor concerning the excellent quality of the sand found all along in the excavation, we are satisfied that there is no quicksand, nothing more than a seam of sand, which, like all such material, might run, if it had water to carry it. There is not evidence to show that the large additional quantity of stone masonry which has been authorized and estimated was necessary. Certainly it would not be necessary in the cuts that we saw, and should not have been deemed

necessary where there was rock as claimed. The quality of the masonry they were laying when we saw the work was very far inferior to that described in the specification, and the shape of the side walls was materially different from the plan which had been shown to us, making a much smaller quantity than that estimated to the contractor on a given length of sewer.

The stones were small, very irregular in shape, and they were very rapidly and carelessly laid, the cement mortar of a poor quality, being thrown in with shovels, the whole scarcely deserving the name of rubble masonry. On only one day, January 18th, we noticed that considerable care was used in laying the stones; and we also noticed some improvement in the sizes, but had the specification been prepared from the masonry, as we saw it laid, there would have been no difficulty in securing bids to do it for a sum not exceeding four dollars per cubic yard, which price should have afforded a handsome profit. The specifications for stone masonry and rubble masonry are carefully prepared, with strict requirements, but the work has been done with no reference thereto, either in quality or quantity.

If circumstances required the large amount of 28,600 cubic yards of masonry, that amount of "dry wall," properly placed, would have answered as well as the "rubble masonry," as it is built. The contractor's price for dry wall is \$4 per cubic yard, which would have made a saving to the City on 28,600 cubic yards of \$57,200.

No regular system of measurement has been kept by any one, and the estimates of quantities have been made out by the engineer from the plan in his office, to be corrected hereafter; he said from notes kept by Mr. Hooven, the inspector; and that when the final estimate was to be made the deductions would be made from the quantity of masonry, according to his notes.

We afterwards made two measurements of the cross-section of the ends of masonry open to view; one just below the Frankford road, which showed 55 per cent. of the quantity required by the plan; the other, near the crossing on Gunner's Run, west of the plank road, which showed 46 per cent. of the quantity required by the plan taken January 25, 1877, at the exposed end, where the wall had been stopped, some

time before our investigation began. The day following, the place we had measured was underpinned with fresh masonry. It was then measured by Mr. Hooven, the inspector, after it had been underpinned by the contractor. The calculation from his memorandum shows a cross-section 69 per cent. of that required by the plan.

 " as per inspector's notes, 100.8 " " after underpinning.

The shaded portion denotes the difference between the work as done and the notes of the inspector after the underpinning.

In an interview on the subject of measurement of masonry, etc., Mr. Hooven stated that he first received orders to take measurements of the shortness of the masonry October 5, 1876. From that time, at different dates, he had made pencil memorandums, on different days, of the width across the bottom of the masonry as done, and the height of this line above the bottom as per plan, without showing the distances between the different measurements. This width and depth of the said walls are all that the notes show. No distances were noted in his book, so that no engineer or other person can make any calculation of *quantities* from these measurements. He said he had not been required to keep any account of the distances, or to turn the notes over to the engineer; and that they were to be turned over at the time of making the final estimates; so far as we could learn no one has taken or kept proper records of the quantity of masonry actually built, and these notes, which Mr. Hooven was directed to keep, only run from October 5 to November 3, a few afterward without date or place, except the street, and two or three in January.

Mr. Hooven, on being asked, said that he had never taken any measurements of rock or timber, had never had orders to do so, and that he knew of no place where the masonry was as large as the plan, unless it might be where the timber foundations were laid.

As the engineer had no record of these matters, and as the few notes of Mr. Hooven, the inspector, throw scarcely any light upon them, we have to judge in regard to them, to some extent, from other evidence.

In confirmation of the fact that the rubble masonry in the work is very materially less in quantity than the calculations made from the plan in the engineer's office, we have the measurements, made in October last, by a legal measurer of this city on 612 feet in length of the sewer, of the masonry actually in the walls and foundations, amounting to an average of $96\frac{3}{4}$ cubic feet per foot lineal, agreed upon between the parties furnishing the stone and the contractor as the quantity of stone to be paid for.

This makes 2,193 cubic yards, whereas, the quantity made use of in calculating from the plan for estimate, prepared by the engineer in charge, namely, $164\frac{16}{100}$ cubic feet per foot

lineal, amounts to $3720\frac{96}{100}$ cubic yards, showing that the masonry built in this distance of 612 feet, is only 59 per cent. of the amount calculated from the plan, and heretofore estimated to the contractor. The difference between the two amounts is \$9,167.76.

The total approximate final estimated quantities of rubble masonry made by the engineer December 29, 1876, was 28,600 cubic yards, and, if the same proportion of actual work done should be applicable throughout, the quantity in the work would be only 16,874 cubic yards. In that case, the amount in dollars, instead of being \$171,600, would be only \$101,244, or \$70,356 less.

The first object of our investigation, in connection with the twin sewers in the beginning, was to ascertain the necessity or otherwise of the extraordinary deck of timber and plank 42 feet wide on a length of 1,240 feet, which increased the depth of the excavation 15 inches; and, also, to judge of the necessity or otherwise of the one foot thickness of masonry intervening between the deck and the bottom of the brick sewer, which added one foot more to the depth of the excavation; and about doubling the cost of the sewer; the two increasing the depth 2 feet 3 inches. If a timber and plank foundation was really advisable, a much less costly one would have answered the purpose; and such masonry as we found between the brickwork and the wooden deck, which allows the water to flow freely through it, is, under the circumstances, an injury rather than a benefit. The mortar in the bottom of the sewer where we opened it was poor, adhering but slightly to the bricks and stones, yet that part had been built some months, and, if it had been good, it should have been hard. The reason assigned for this at the time by Mr. R. A. Malone, the contractor, was "that cement would not set in running water." Mr. George Mills, his superintendent, afterwards said: "I was formerly superintendent of the Cohocksink sewer, and my experience is that it will set. I have had considerable argument with Mr. Malone about it." For all the running water that was there during the building of the sewer on top of a deck 42 feet wide, there would have been no trouble in the setting of good cement mortar.

To examine the side walls of rubble masonry at the twin sewer would require considerable work, as the street has

been refilled to or near grade on its whole length; and as the ground was frozen hard, and we saw no portion of the said walls of rubble masonry underneath the twin sewer.

Piling.

We refer to this small item "Piling," merely in connection with the nature of the foundation near the outlet of the sewer, which the engineers considered soft enough to require piling, on a length of 51 feet west of the old canal bridge abutment.

The new abutment, which is much heavier than the sewer alone, does not rest on piles.

No regular account of the driving of the piles was kept. It was considered that they had an average depth of 10 feet, though some were considerably less.

The data in connection with these piles do not afford any definite information respecting the character of the earth through which they were driven.

Mortar.

The specification requires the mortar to be made one part of cement to two parts of sand, or more cement if required by the engineer. Nearly all the sand used was taken out of the excavation for the sewer. That which we saw near the bottom of the deep cut at Frankford road was clean, sharp sand, which, if properly mixed with sufficient cement at a proper season of the year, should make strong mortar.

Some of the mortar that we saw in the brickwork was excellent; some of it that was used in the stonework was very poor. Some of the mortar in joints, which had been laid several months, was quite hard, others soft. According to the estimate of work done, an immense quantity of mortar had to be very rapidly made. Mr. Malone stated that he certainly used three-fourths of a barrel of cement to the cubic yard of stone masonry, and more than that in the brick masonry. In one month there were 10,300 cubic yards of brick and stone masonry estimated. At three-fourths of a barrel per cubic yard, this would require 7,725 barrels, which divided by 25 working days, gives 309 barrels per day, or for ten working hours, 30 barrels per hour, or a barrel every two minutes, so that in four places of working, there

would be a barrel every eight minutes. It is evident that the individual whose duty it was to inspect the laying of over 400 cubic yards of masonry per day, would have to divide himself ere he could do justice to the City's interest in the works.

For 4,500 cubic yards of brickwork and stone masonry, according to the statement of the contractor, it would take 3,300 barrels of cement.

From information obtained, the quantity of cement used in the sewer, has not exceeded two-thirds of the quantity claimed by the contractor to have been used, so that, instead of three-fourths of a barrel per cubic yard, taking all the masonry estimated as having been actually done, the average would not exceed half a barrel per cubic yard, or in all, 22,000 barrels instead of 33,000 barrels.

Foundation timber and planking.

The engineer in charge informed us that a guillage of timber with concrete was laid just west of and adjoining the piling for about 150 feet in length, but that the plan was then changed to a deck of solid timber 12 inches thick, laid crosswise, covered with a course of 3-inch plank laid lengthwise and spiked to the timber, making a solid deck 15 inches thick of hemlock.

The bottom of the excavation for this timber and plank deck at the outlet of the sewer, was about the level of low tide, the grade of the sewer being 0.3 foot per 100 feet, the bottom of the trench would be one foot and one-half above low tide, at the distance of five hundred feet from the outlet. These circumstances show a rather favorable opportunity of getting rid of the water.

In one of the borings through the bottom of the sewer, not far from the 30-foot chamber, we found only two courses of 3-inch planks and no timber, the bottom course laid crosswise and the top course lengthwise of the sewer. As we had been assured by the engineer in charge, that the solid deck 15 inches thick, extended the whole length of the 1,240 feet, we were, of course, surprised, and when the engineer in charge was informed of it soon afterwards, he expressed great surprise, saying "that he thought that the timber was in,

and had so estimated it to the contractor." We do not purpose to relate here the various statements and explanations which followed this discovery, excepting one of the remarks of the contractor made at the time, namely, that he did not know whether the engineer had or had not estimated to him that part of the foundation the full thickness of 15 inches. In the same place we found only about 6 inches of masonry below the brickwork, instead of one foot, as had been estimated to the contractor. The soil underneath the foundation was of the same general character as the borings had shown outside. We made in all, in the twin sewers, nine openings through the bottom.

These openings were all closed, some by the contractor and the residue by ourselves, with the best quality of German Portland cement, excepting one opening between Frankford road and the plank road (where we found no timber), and which could not be repaired owing to the quantity of water backed up by a temporary dam.

Table of tests made in the southern section of the twin sewer, beginning at the mouth of the sewer. The datum line from which the measurements were taken in the bottom of interior of sewer, top of bricks.

Distance from mouth in feet.	Beginning of sand and gravel. Depth. Feet.	Depth of tests. Ft.—inches in sand and gravel.	Depth of mas. mry. Inches.	Thickness of timber and plank. Inches.	Remarks.
Outside of mouth.	3	3-8			
420		10 $\frac{1}{8}$	15	
450		15 $\frac{3}{4}$	15	
500		11 $\frac{3}{4}$	9	Two tests, 18 inches apart.
700		15 $\frac{1}{8}$	15	
850	2-5	11 $\frac{3}{4}$	15	
1000	2-10	9	17	
1110		7 $\frac{3}{4}$	15	End of 6-inch timber.
1120		7 $\frac{3}{4}$	15	
1150	1-9	6	6	Very solid bot- tom.

The reasons for many fractions of an inch occurring is that the depth of the bricks, which is called 8 $\frac{1}{4}$ inches, is deducted from the measurements to get the depth of the masonry.

The tests of boring into the soil below the deck were stopped 850 feet from the mouth of sewer, as there was too much water below that point to get the opening through the masonry large enough to admit the bore. It should be remarked, that in none of these borings was quicksand found or other treacherous bottom requiring extra precautions.

SUMMARY.

The principal facts developed by our investigations may be summarized as follows, taking them in the order in which they are referred to in the report :—

First.—That the interior diameters of the several portions of the sewer are ample for the discharge of the heaviest floods from storms.

Second.—That the changes of plan, after the work was let, whereby the cost was greatly increased to nearly double the preliminary estimate, to the extent made, were not warranted by the circumstances. In round numbers, the preliminary estimate, without any addition for contingencies, was \$230,000, while the approximate final estimate, made December 29, 1876, is \$450,000. Most of this increase arises from additional excavation, refilling, brick masonry, rubble masonry, and timber and plank in foundation, caused by changing the plan.

Third.—That the work was not let to the lowest bidder. The bid of G. W. Smith was \$19,575 less than that of R. A. Malone, calculating from the items of work in the preliminary estimate, and \$83,385 less, calculating from the items in the approximate final estimate.

Fourth.—That the current monthly estimates in several instances show a very unusual and extraordinary amount of work done in brief periods assigned. This induced a careful investigation, which has shown that the items of excavation, rubble masonry, and foundation timber and plank have been considerably over-estimated.

Fifth.—That the contract and the specifications are very carefully and admirably drawn, strongly guarding the City's interest at every point; but, that the system under which

the work has been laid out, measured and superintended is radically defective, leaving the door wide open for the performance of unfaithful work, if a contractor should be disposed to deceive.

Sixth.—That the amount of rock, namely 10,000 cubic yards, inserted in the approximate final estimate, is entirely unjustifiable, as the engineer in charge should have known that there could be no such quantity of rock in the excavation, when the approximate final estimate was made December 29, 1876. Our investigation began on the first of January, 1877, only three days later, and it was obvious that there was then no rock to be excavated. We are also satisfied that according to the specifications, there has not been any such quantity as 4,600 cubic yards of rock excavated, although that quantity was returned in the estimate made for the contractor, at the date of December 8. Previous to that date no rock had been included in the monthly estimates.

Seventh.—That the refilling we saw going on throughout the whole month of January, 1877, was not at all in accordance with the specifications. It was made less costly to the contractor, and very inferior to the refilling demanded under the contract. It was in fact nothing more than ordinary carting on of embankment.

Eighth.—That the change made in the plan of the brick masonry, after the contract was signed, adding four inches on the upper part to the thickness of the arch, was unnecessary, and materially increased the cost to the City.

That the brickwork we saw laid during the month of January, 1877, would have been good, if it had been laid at a proper season; but, being laid in the dead of winter, part of the time in hard freezing weather, it is doubtful whether the cement mortar will set properly, or have sufficient strength. Mr. Hooven, the inspector, who is himself a practical bricklayer, appeared to attend faithfully to the laying of the bricks, and we noticed that the mortar then used for the brickwork was much richer in cement than that used in the rubble masonry. The bricks are a little under the usual size, but they are well burned, and hard.

Ninth.—That the rubble masonry, compared with the rigid requirements of the specifications, is of a very inferior char-

acter; so that if the rubble masonry described under the heading "stone masonry," which should have regulated the dimensions of the stones, and the manner of laying, is worth six dollars per cubic yard, the contract price, the work we saw laid is not worth exceeding four dollars per cubic yard. That in addition to this fact, we are satisfied, from our own examinations, from notes of the inspector, and from reliable measurements made by a legally authorized measurer of the City, and from collateral evidence, that the quantity of rubble masonry in the foundation and side walls is many thousands of cubic yards less than the quantity calculated from the plan and estimated to the contractor. The engineer in charge did not measure the work on the sewer, but on the plan. This gives the quantity that the contractor is required to do; but it does not give the correct amount done where the shape and dimensions of the walls were different from the plan, as they are in this case.

If all the rubble masonry has been laid in the same manner that we found portions of it to be laid, and as a considerable length of it, 612 feet, was shown to be laid, by a legal measurer, there would be only fifty-nine per cent. in the sewer of the amount called for by the plan, and estimated to the contractor. According to the quantity of cement, which (after assigning a proper share for the brickwork), could be applicable to the rubble masonry, one of two things is certain; either the quantity of masonry is very greatly less than the quantity which has been estimated to the contractor, or the quantity of cement used in the mortar for the rubble masonry has been entirely inadequate.

Tenth.—That the heavy deck of timber and plank, not considered at the time of letting, but which was afterwards adopted under the whole length of the twin sewers, on a length of 1,240 feet (consisting of solid timber and plank 15 inches thick, 42 feet wide), was not necessary. That, if a wooden foundation had been necessary, a much less costly one would have answered.

That with such a foundation, if thoroughly laid, there was no necessity for the intervention of rough stone masonry between it and the brickwork of the sewer. Its omission would have saved 1,928 cubic yards of masonry, which, at \$6 per cubic yard, amounts to \$11,548, and it would also

have kept the bottom of the trench one foot higher, saved the same number of cubic yards of excavation, and rendered it in all respects less troublesome. We have not been able to account for the whole amount of the timber and plank estimated, which is 925,000 feet board measure, owing in part to the uncertainty in the mind of the engineer in charge as to where different thicknesses of foundation were actually put in. On a length of 1,240 feet, 42 feet wide, 15 inches thick, it would require 781,280 feet board measure. We know that a portion of this was put in only six inches thick, or two courses of three-inch plank on a length of about 110 feet. The engineer in charge did not know that the 12-inch timber had been omitted at that place (including the chamber between the single and double sewers), till we made the discovery by boring; and the contractor at the time said he did not know whether the omitted timber had or had not been estimated to him. The engineer in charge stated there was a length of two hundred and twenty feet west of the Frankford road with a foundation of timber and plank. Afterwards he said it was in detached pieces, not continuous, but that he could not point out the place of any piece, and he had no record of it. Mr. Hooven, the inspector, said that west of the Frankford road, between that and Kensington avenue, there had been laid in some places a double course of three-inch plank, but no timber. So that while it is clear to us that the quantity of timber and plank in the estimate is greater than the quantity put into the work, we could not ascertain the precise quantity. It cannot be less than one hundred and twenty-five thousand feet board measure, and it may be considerably more.

Eleventh.—That from the facts herein stated it is just to all parties to say that we have never known a contract of this magnitude, upon which the work had to be pushed through in a limited time (one year), and under a penalty, which was allowed to go on under such a small provision for its efficient superintendence. The Chief Engineer and Surveyor, who is made responsible for its faithful execution, in a private letter, which we have seen, urged Councils to allow him to appoint an inspector from his department to be constantly on this sewer, on the ground that no engineer should be held responsible, unless he had adequate superintending force to insure

strict performance on the part of the contractor. Councils did not comply with the request, but authorized the head of another department, the Commissioner of Highways, to appoint an inspector, who is not an engineer, familiar with all the branches of such a contract, and whose only or chief experience may have been applicable to a single item of the sewer, namely, the bricklaying, for which duty, we understand, he is quite competent.

Twelfth.—That the contract requires that the laying of masonry shall cease on the 1st day of December, and the Chief Engineer and Surveyor, who is made responsible for the integrity of the work, states that since that date the contractor has been doing work “on his own responsibility.” We do not understand this.

Here is the clause of the contract relating to this important subject :—

“(101) Mason work of all kinds shall cease on the 1st day of December, unless the contractor is otherwise directed by a written notice, and then only for such time as may be designated. No work shall be resumed before the time appointed. Upon the suspension of mason work, the same shall be well protected, and the grounds left in good order, according to instructions given by the Chief Engineer and Surveyor.”

The contract does not say that the mason work *may* cease, but that it *shall* cease on the 1st day of December.

Of course it was then the duty of the engineer either to stop the work, or to direct otherwise in writing. But the engineer has permitted the work to progress, and continued its superintendence.

In a letter recently published, the Chief Engineer and Surveyor refers to the risk of heavy damages as likely to arise in case the contractor did not go on and finish the work before spring.

The damages, if any occurred, would have devolved upon the contractor ; and the risk of material damage could have been greatly lessened, if not wholly guarded against, by extra timber shoring, and by stopping the excavation at the Frankford Road deep-cut, at the contract date, December 1. The damage to the sewer, if any shall accrue in consequence of doing this important mason work in the winter, is not mentioned in the letter.

Where the responsibility in the case may legally belong, we do not undertake to judge; we give the facts.

Thirteenth.—That with judicious management, and moderate profit to a contractor, this sewer might have been built for two hundred thousand dollars less than the approximate final estimate of December 29, which was in round numbers \$450,000. Our examinations have not shown any quicksand, or the necessity for the costly extra quantities of excavation, rock, rubble masonry, brickwork, and timber and plank estimations in the work.

Under the present contract prices, and the changed plans, this very large saving could not have been made; but the facts go to show that there is a material difference between the quantities of work actually done and the quantities estimated to the contractor.

The engineer made approximate estimates of the items of excavation, rock, refilling, masonry, and timber and plank in his approximate final estimate of December 29, 1876, basing the masonry quantities upon the cross sections marked on the plan, multiplied by the known length of the sewer, and not from measurements of the masonry as laid.

The estimate of 10,000 cubic yards of rock included in the approximate final estimate of December 29, 1876, was unjustifiable, when it was clearly impossible. The 4,600 cubic yards of rock allowed to the contractor in the estimate of December 8, 1876, except, possibly, a small proportion, was not rock as classified by the specification. From the best information attainable by us, we are satisfied that not over 1,000 cubic yards of the 10,000 cubic yards in the approximate final estimate, was entitled to rock classification; showing an over-estimate on the rock of 9,000 cubic yards, which at 70 cents (difference between \$1 and 30 cents), is \$6,300.

The rubble masonry is largely over-estimated. A calculation, based on a measurement made by a legal measurer, giving the quantity agreed upon between the party furnishing the stone, and the contractor, on 612 feet length of the sewer, shows that, instead of 28,600 cubic yards, there would be only 16,874 cubic yards of rubble masonry, provided the same proportion between the plan and the actual work be applied throughout.

This would make 11,726 cubic yards less, which at the contract price, is \$70,356. If to this should be added \$2 per cubic yard on 16,874 cubic yards, on account of the masonry not having been done according to the specifications, it would be \$33,748 more. If there is an over-estimate of 11,726 cubic yards of masonry, as the proportion referred to would show to be possible, there should be a corresponding reduction of the excavation, which at 30 cents per cubic yard, would amount to \$3,517. Independently of this uncertain item, our calculations show an over-estimate of at least 10,000 cubic yards, according to the terms of the specification, and the limited width of the streets between the curbs, which, at 30 cents per cubic yard, is \$3,000.

There is also an over-estimate of timber and plank of at least 125,000 feet, board measure, which, at \$40 per thousand, is \$5,000.

Nothing short of a much more extensive and thorough investigation can show just how the work has been executed in large portions of the sewer, which are covered up, especially the rubble masonry side-walls on the twin sewers. It is our duty to state, also, that there are not in the engineer's office, or elsewhere, records or measurements which will enable any engineer, or other person, to ascertain what quantity of rubble masonry has been actually laid by the contractor. It is true that there are a few notes of measurements of widths and depths made between October 5 and January, by Mr. Hooven, the inspector, but they are valueless for the purpose of calculating, with any approach to accuracy, the masonry in the work.

The duty of measuring the work as actually done, should have been performed by an engineer competent to make the necessary measurements.

This report is very long. We make no apology for its length, as our object has been to convey to you not merely conclusions, but the facts upon which they are founded.

Respectfully submitted.

APPENDIX.

Correspondence under which the examination was undertaken.

Philadelphia, January 3, 1877.

W. MILNOR ROBERTS, *Civil Engineer.*

DEAR SIR:—I have requested your presence in Philadelphia at this time for the purpose of obtaining the benefit of your professional judgment in regard to the contract and work upon the Hart Creek Sewer.

Having been assured by responsible parties that there was something radically wrong in connection with this contract, and the work done under it, and seeing that the present estimated cost is nearly double the original estimate, I felt it my duty to make known to Councils the impression made upon my mind, that the matter has been tainted with fraud.

I have obtained from the proper authorities permission, as a citizen and tax payer, to investigate the case at my own cost, and I desire your professional services to aid me in a thorough investigation, so far as it can be made.

I do not ask or expect you merely to undertake a search for fraud, or to sustain anything I have alleged, or to protect me or any one in any way. What I want, in behalf of myself and other citizens of Philadelphia who are interested as tax-payers, are the *facts* so far as you can obtain them, and, if you think proper, such professional opinion as the facts may seem to you to warrant.

Are you willing to enter upon such an examination, and can you do so immediately? If so, I will introduce you to the Chief Engineer and Surveyor, Mr. Smedley, in whose offices the plans, records, etc., relating to this work, are kept, and will then leave the matter entirely in your hands.

Respectfully yours,

HENRY B. TATHAM.

Philadelphia, January 4, 1877.

HENRY B. TATHAM, ESQ., *Philadelphia.*

DEAR SIR:—Your telegram was received yesterday in New York, and your letter has been received here.

As I understand that the object you have in view is the ascertainment of facts, and upon them to give such professional views and opinions as the facts may seem to warrant, I have no hesitation in complying with your request, and I am prepared to enter upon the duty at once.

Very respectfully yours,

W. MILNOR ROBERTS.

APPENDIX No. 65.

RESOLUTION

Touching alleged action of Common Council upon the increase of the
Funded Debt of the City of Philadelphia.

Whereas, it is currently reported that an Act authorizing an increase of the funded debt of the cities of the first class, *two per cent., annually*, has been introduced into the General Assembly of the Commonwealth, ostensibly in compliance with a resolution of request from the Councils of the City of Philadelphia, therefore.

Resolved by the Common Council of the City of Philadelphia, That the Senate and House of Representatives of the Commonwealth of Pennsylvania, in General Assembly met, be and they are hereby respectfully informed that this Common Council has passed no resolutions requesting authority to increase the funded debt of this City.

Resolved, That the Clerk of Common Council be instructed to forward properly attested copies of this preamble and resolution to the Senate and House at Harrisburg.

APPENDIX No. 66.

Philadelphia, February 8, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—The Committee on Election Divisions, to whom was referred certain ordinances for changing and establishing places of voting in several of the election divisions of the City, respectfully report, that they have considered the same, and submit the annexed ordinance to authorize the changing and establishing of places of voting, and recommend its passage.

Very respectfully,

GEORGE E. HALL, *Ch'n*,
SAMUEL F. HOUSEMAN,
JAMES E. KRYDER,
JOHN F. GLENN,
GEO. A. ENO,
JOHN FOX,
G. W. BUMM,

JOHN KENNEDY,
W. ELLWOOD ROWAN,
M. S. BONSALE,
ROBERT B. SALTER,
N. SPERING,
JOHN McCULLOUGH,
JOHN G. BROOKE.

AN ORDINANCE

To change and establish places of holding elections in several of the
Election Divisions of the City of Philadelphia.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the places of holding elections in the several election divisions hereinafter named, shall be changed and established as follows:

Fourth Ward, Fourteenth Division, changed to southwest corner of Front and Senate streets.

Eighth Ward, Second Division, changed to No. 203 South Eighth street.

Eleventh Ward, Fourth Division, changed to southwest corner of New Market and Green streets.

Thirteenth Ward, Third Division, changed to No. 340 Garden street; Eighteenth Division, established at the southeast corner of Ninth and Noble streets; Fourteenth Division, changed to the northwest corner of Seventh and Parrish streets.

Fourteenth Ward, Fourteenth Division, changed to the southeast corner of Twelfth and Ogden streets; Twenty-fourth Division, established at the southwest corner of Twelfth and Parrish streets.

Sixteenth Ward, Twentieth Division, changed to 519 Wager street.

Seventeenth Ward, Twenty-first Division, changed to No. 321 Girard avenue.

Eighteenth Ward, Third Division, changed to No. 1115 Frankford road.

Nineteenth Ward, Thirty-fifth Division, established at No. 1701 Mascher street; Thirty-fourth Division, established at the northeast corner of Fourth and Columbia avenue.

Twentieth Ward, Tenth Division, changed to the northeast corner of Thirteenth and Cass streets.

Twenty fifth Ward, First Division, changed to the house of Peter Roberts, Bridge street and Frankford road.

Twenty-eighth Ward, Third Division, changed to house of Mr. Rackelt, on Broad street, above Germantown avenue. Eighteenth Division, changed to the northeast corner of Camac and Norris streets; Twenty-fourth Division, changed to Brannon's coal office, Tioga street and Germantown Railroad.

Twenty-ninth Ward, Twentieth Division, changed to the northwest corner of Twentieth and Oxford streets.

Thirtieth Ward, Tenth Division, changed to the northwest corner of Seventeenth and Washington avenue.

Thirty-first Ward, Twenty-eighth Division, established at the southwest corner of Lehigh avenue and Amber streets; Fifteenth Division, established at the northeast corner of Cedar and Adams street; Twenty-sixth Division, established at the southeast corner of Dauphin and Emerald streets.

APPENDIX No. 67.

RESOLUTION

Of instruction to the City Controller relative to warrants for cleaning the streets.

Resolved by the Select and Common Councils of the City of Philadelphia, That the City Controller be, and he is, hereby instructed to withhold his signature from the warrants of the contractors for cleaning the public streets, until such time as said contractors shall have performed their part of the contract, by thoroughly cleaning the streets.

APPENDIX No. 68.

Philadelphia, February 8, 1877.

To the President and Members of Common
Council of the City of Philadelphia.

GENTLEMEN:—Your Committee appointed under a resolution to appoint a Special Committee of Common Council to investigate alleged political assessments upon the police force, hereby respectfully report, that they have attended to the duty assigned them, by holding a series of meetings, at which they examined a number of witnesses, and that they have otherwise given the matter their earnest consideration.

At our first meeting, on the 30th of January, a subpoena was issued for a number of witnesses, and in accordance with the usual custom where subpoenas have heretofore issued from Committees of Council, we requested the signature of his Honor the Mayor to said subpoena.

At our meeting on the following day, we received a letter from the Mayor, declining to sign the subpoena on the ground "that one branch of Councils have no power to investigate for the correction of alleged evils and abuses, or infraction of law, but the same can only be done by the direction of both branches of Council." (See Mayor's letter appended, marked "A.")

Not feeling satisfied with this view of the case, and knowing that upon previous occasions, subpoenas have been issued by Committees of one branch of Councils alone, we requested the opinion of the City Solicitor upon the subject.

His reply was received at our next meeting, held on the 3d inst.; he states "in my opinion such right belongs to either branch acting independently, as well as to both acting concurrently," thus upholding the action of this committee. The City Solicitor stated, however, that we could not require the Mayor to sign the subpoena, and that a summons from the committee would be as effective as if signed by him. (See City Solicitor's opinion appended, marked "B.")

We summoned a number of witnesses who attended at our subsequent meetings. We examined the Chief of Police, several Police Lieutenants, one of the Mayor's clerks and others under oath, and the following information was elicited from them :

The police officers were requested to *contribute* money for political purposes on or about the last day of the year 1876.

The amount *requested* by the Lieutenants at the *suggestion* of the Chief of Police and his Captains, was twenty (20) dollars from each regular patrolman, and ten (10) dollars from each substitute.

The Lieutenants who were examined took particular pains to impress upon the minds of the Committee, that they had merely *suggested* to their men the propriety of *contributing*, and at the same time had given them to distinctly understand that there would be no *assessment*.

The Lieutenants examined by this Committee, four in number, viz.: Ferguson acting on the Reserve, Axe of the Twelfth District, Brown of the Sixteenth, and Strunk acting in the Eighteenth District, testified that they had collected from their men in the aggregate, about \$4,400, and that very few of the men did not pay their contribution.

The money collected was paid by the Lieutenants to Mr. Wm. Culbertson, one of the Mayor's clerks, and he testified that it was deposited in bank by him subject to his order. He declined to state the amount so deposited, in whose name, or in what bank the account was kept.

It was testified that it had been customary for years to make *assessments* on police officers for election purposes, but this is the first instance that we have been enabled to find wherein the word *contribution* has been officially used in connection with a collection for campaign purposes, and where it was *suggested* to each man that he should *contribute* a fixed amount.

This collection was taken at an earlier period before the election than was customary in former political campaigns, and was made at or about the time the ordinance making it illegal to assess police officers for political purposes was passed by Council.

We have been unable to find that there has been any money *assessed*, *contributed*, or *donated*, by any officer of the police force since the above ordinance became a law, on the 18th day of January.

We do not know that any police officer has *as yet* been discharged for neglecting or refusing to "*contribute*" in accordance with the recent *suggestion*, and we have no doubt that had such discharge been made, the parties discharged would have appeared before your Committee.

In conclusion, we unite in expressing our disapproval of a systematized collection of money for political purposes from public officials, whether made under the name of an *assessment*, a *contribution*, or a *donation*, or whether coming from the police or any other Department of our City, State, or National Government.

We believe that it tends to demoralize the public service, that it places the subordinate at the mercy of the superior officer, and that by its means funds are raised with which to debauch the ballot-box; preventing a fair expression of public opinion, and making a Republican form of Government a farce, and a reproach in the minds of the people.

We report the appended resolution, and ask its adoption.

Respectfully yours,

LOUIS WAGNER, <i>Ch'n</i> ,	JAMES C. SHEDWICK,
WM. W. MORGAN,	SAMUEL R. MARSHALL,
THOS. BROMLEY.	

RESOLUTION

To discharge a Special Committee.

Resolved by the Common Council of the City of Philadelphia, That the Special Committee to investigate alleged political assessments upon the police force be and it is hereby discharged.

—

OFFICE OF THE MAYOR,

Philadelphia, January 31, 1877.

GENERAL LOUIS WAGNER,

Chairman of Common Council

Committee on Police Assessments.

DEAR SIR:—One of the messengers of Common Council has presented to me for signature a subpoena issued by a Committee of Common Council, which I declined to sign for the following reasons :

I am advised that one branch of Councils have no power whatever to investigate for the exposure and correction of alleged evils and abuses, or infractions of law, but the same can only be done by the direction of both branches of Councils.

If correct in this, the subpoena would be futile, because issued without authority of law. See Section 50 of the Act of February 2, 1854.

If the Committee will give the name of any person in my department, who it is alleged has paid assessment for political purposes since the Ordinance forbidding the same became a law. I will direct the appearance of such person before your committee, and use every effort to secure such attendance.

I am, very respectfully,

W. S. STOKLEY,

Mayor.

Philadelphia, January 31, 1877.

GEN. C. H. T. COLLIS,
City Solicitor.

DEAR SIR:—I have the honor to enclose a communication from his Honor the Mayor in which he declines to sign a certain subpoena issued by a Committee appointed by Common Council, because of a supposed provision in Section 50 of the consolidation act, requiring both branches of Councils to unite in the appointment of such Committees before subpoenas can issue.

Will you please advise the Committee at your earliest convenience if this interpretation is, in your opinion, correct.

By direction of the Committee on alleged Police Assessments.

LOUIS WAGNER,
Chairman.

P. S.—I also enclose the subpoena which was refused signature.
L. W.

LAW DEPARTMENT,

Philadelphia, February 2, 1877.

GEN. LOUIS WAGNER,
Chairman, etc.

MY DEAR SIR:—I am in receipt of yours of the 31st ulto., which substantially asks my opinion upon the question, whether, or not, one branch of Councils has the right to institute inquiry into alleged abuses in, or connected with, any department of the City, by means of its own Special Committee.

In reply, I have to say that, in my opinion, such right belongs to either branch acting independently, as well as to both acting concurrently.

Even if this power is not derived from the 50th Section of the Act of February 2, 1854, about which I am aware there

is a difference of judgment between some who have given their attention to the matter, I think it exists as an incident to the legislative powers which belong to each branch of Councils, and as an essential instrumentality in many possible cases for the obtaining of information which may bear upon the propriety of pending or proposed legislation.

In the prosecution of such inquiries, it is competent for the committee appointed for the purpose to summon before those parties whom they may desire to examine, by such process or order in the name of the committee, as they may direct.

There is no necessity that such mandate shall be signed by the Mayor, or be under the seal of the City, nor do I think that the committee has the right to require the Mayor to sign the same. A suitable, and, I believe, customary, mode in such cases is, that the committee should direct the order for the attendance of witnesses to be issued and signed by its chairman, in his capacity as such. An order issued for your committee in such a manner would have the same force as if in any other form.

Yours respectfully,

C. H. T. COLLIS,

City Solicitor,

Per ROBT. N. WILLSON, *Asst.*

DEPARTMENT FOR SUPPLYING THE CITY WITH WATER.

Philadelphia, February 15, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—This community demands it, and it is a duty that you owe to yourselves, the gentlemen of the Committee on Water, and your humble servant, to institute a most thorough and searching investigation into every official act of mine, since I became the Chief Engineer of the Water Department.

Therefore, I not only earnestly request, but respectfully demand that you appoint a special committee composed of the Presidents and at least four members from each Chamber, that it may be determined once and for all the animus which prompts these insidious and malignant attacks upon the character and reputation of the Heads of Departments on the eve of every election. I will cheerfully aid you, so far as in my power lies, to discriminate between guilt and innocence, and thus afford an opportunity to my accusers (*the gentlemen who know so very much about corruption and "imbecility,"*) either to convict me, by evidence, if guilty, if innocent acquit, or forever after hold their peace and cease acting as the vehicles for the filth of others.

Yours, very truly,

WM. H. McFADDEN,
Chief Engineer Water Department.

APPENDIX No. 79.

RESOLUTION

Of request to the Legislature to pass a Bill removing the Eastern Penitentiary from its present location in Philadelphia.

WHEREAS, A bill is now pending before the Legislature of this Commonwealth providing for the removal of the Eastern Penitentiary from its present location to some other and more suitable locality, and

WHEREAS, The continuation of the Penitentiary at its present location, in the midst of the built up portion of this City, greatly retards improvement, depreciates the value of property, and is subversive of the best interests of the City, therefore

Resolved by the Select and Common Councils of the City of Philadelphia, That the Legislature be respectfully requested to pass the bill providing for the removal of the Eastern Penitentiary from its present location, believing the same to be imperatively demanded by the growth and development of the City, and the welfare and prosperity of the section in which that institution is at present located.

Resolved, That a copy of the foregoing preamble and resolution be forwarded to the Legislature.

APPENDIX No. 80.

RESOLUTION

Relative to the original Declaration of Independence.

WHEREAS, It is understood that steps are about to be taken, under the direction of the Department of the Interior at Washington, to have the original chart of the Declaration of Independence removed from Independence Hall, where it has been temporarily deposited since the opening of the Centennial Exhibition, back to the National Capital ;

AND WHEREAS, The State House of Pennsylvania has been dedicated by the citizens of Philadelphia to their fellow countrymen of the United States, as a perpetual monument to the founders of American Independence, and it is peculiarly appropriate that the original chart of the Declaration should be permitted to remain permanently in the building where it was signed and originally promulgated, as an enduring object of interest to the ceaseless throng of visitors to that historic spot; therefore,

Resolved by the Select and Common Councils of the City of Philadelphia, That the national authorities are hereby respectfully and earnestly requested to take the necessary

action, legislative or otherwise, by which the said chart may be suffered to remain deposited hereafter on exhibition in Independence Hall, under the care and custody of the Councils of the City of Philadelphia.

Resolved, That a certified copy of these resolutions be forthwith transmitted by his Honor the Mayor, to the President of the United States, the Secretary of the Department of the Interior, and the members of Congress from Pennsylvania, and that the latter are hereby respectfully urged to unite their endeavors to secure the accomplishment of the object herein proposed.

Philadelphia, February 15, 1877.

To the Common Council

of the City of Philadelphia.

GENTLEMEN:—Your Committee of Conference upon the points of difference on “An Ordinance to make an appropriation to the Clerks of Councils for the year 1877,” would respectfully ask that the Committee be discharged, and they recommend that Common Council concur in the amendments of Select Council, with amendments as follows: “Insert after the words ‘Committee on Printing and Supplies,’ in the Select Council amendments, the words ‘and the Committee on Finance,’” which would compel the awarding of the contracts in the presence of the two committees, and which arrangement should be satisfactory, we think, to Select Council.

Respectfully,

LOUIS WAGNER, *Ch’n*, JOHN P. WOOLVERTON,
SAMUEL R. MARSHALL.

APPENDIX No. 88.

LAW DEPARTMENT.

Philadelphia, February 17, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—I have the honor to acknowledge the receipt of your Joint Resolution in the following words: "That the City Solicitor be instructed to inquire into the legality of the compensation of the Collector of Delinquent Taxes, and if any extra compensation or charge has been made contrary to law, to proceed to recover all moneys so retained or charged."

The office of Collector of Delinquent Taxes was created by the Act of March 24, 1870, the contents of which statute may be succinctly stated as follows:

1. The Collector was to be appointed by the Receiver of Taxes.

2. The Receiver was required to hand over to said Collector on the first of February the list of all delinquents for the previous year.

3. The Collector was vested with full power and authority to collect, sue for, levy, file liens, and sell real estate.

4. The third Section of the Act provides that "the penalties and costs now by law added to such delinquent bills shall remain as heretofore."

5. The Collector is required to make certain returns of his collections under oath, and to return to the Board of Revision such bills as are uncollectable. For omission to do which a penalty is to be imposed.

6. And then follows this provision in reference to compensation: "The compensation of said collector shall be five per cent. upon the amount he shall collect and pay over to the City Treasury: *Provided*, That the City of Philadelphia shall not be liable for any expense for advertising, office rent, clerk hire, or any other cost of collection; all such expense to be paid by the collector."

At first glance it would perhaps appear as though this last section of the Act limited the cost of administration of the Delinquent Tax Department to a commission of five per cent. upon the amount collected, out of which the collector would be obliged to compensate his deputies; but this section must be considered in connection with the third section, to wit: "The penalties and costs now by law added to such delinquent bills shall remain as heretofore."

Those costs and penalties were imposed by the Act of April 9, 1861, which was an Act providing a system for the collection of delinquent taxes. The third section is in the following words: "That there shall be the following commission and charges paid by the delinquent taxpayers, and no other or more, and any demand and collection of other or greater charges, shall subject the parties receiving the same to the like penalties, to be in the like manner recoverable as the Sheriff is liable for the same offence, that is to say, a commission of five per cent. to be paid to and received by the Receiver of Taxes; and the following shall be paid to and received by the collectors, upon warrants placed in their hands for their own compensation, and the collectors shall collect no commission for the receiver or City; on all sums over ten dollars due from one taxpayer, five per cent. on all sums so due; between five and not over ten dollars in amount, ten per cent.; on sums between one and not over five dollars, fifteen per cent.; and the following fees, to wit: seventy-

five cents for the warrant, and three cents a mile, circular measurement, to be but once charged from each delinquent."

On the ninth of January, 1867, so much of the foregoing Act "as authorized the Receiver of Taxes to charge and collect a commission of five per cent. from delinquent taxpayers, to be paid to and received by him" was repealed.

From that date until the passage of the Act in 1870, creating the office of Collector of Delinquent Taxes, the costs and charges therefor were five per cent. on all sums over ten dollars, and seventy-five cents for the warrant; and these were chargeable against the taxpayers, and not against the City, and were received as compensation by the deputy collectors for their services.

These were the only penalties and costs existing at the time of the passage of the Act of 1870, and that Act required them "to remain as heretofore."

For what purpose, as heretofore? To be paid into the Treasury? The Act does not say so.

I am of opinion that a fair construction of the Act gives these commissions and costs to the deputy collectors "as heretofore."

But, it will be said, what are the meaning of the words of the Act of 1870, that "the City of Philadelphia shall not be liable for any expense for advertising, office rent, clerk hire, *or any other cost of collection*; all such expense to be paid by the collector." To which I reply that the City is *not* liable for any such expense; all such expenses are paid by the collector out of his own compensation and from the penalty added for the deputies. In fact, the municipality at present pays absolutely nothing for the collection of her delinquent taxes. The *entire* cost comes out of the delinquent himself.

Whether it is proper that the *entire* amount should be charged to the delinquent is a question involving the construction of the Act of 1861, upon which there may be a fair difference of opinion. That subject, however, is not included within the scope of your inquiry.

Yours respectfully,

CHARLES H. T. COLLIS,

City Solicitor.

APPENDIX No. 90.

Philadelphia, March 1, 1876.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—I herewith transmit for your consideration a copy of letter from Mr. Henry B. Tatham to Chas. H. T. Collis, Esq., City Solicitor, dated February 9, 1877, and a communication from Mr. Tatham to myself, dated yesterday, referring to the construction of the Hart Creek Sewer, and to certain misrepresentations in the statements of the engineers appointed to examine the work, with a proposition to make a full examination of the workmanship upon the sewer as far as completed.

I would recommend that Councils give this matter thorough and complete investigation, in order to determine whether the charges of fraud are well founded, and if so, to take prompt action to bring the guilty parties to justice, and at the same time to take into consideration the propriety of passing such Ordinance as will secure the faithful performance of all contracts on the part of contractors with the City.

I am, respectfully,

W. S. STOKLEY,
Mayor.

Philadelphia, February 9, 1877.

C. H. T. COLLIS, ESQ.,
City Solicitor.

DEAR SIR:—In defending the City against the claims of Mr. Malone, in connection with the "Hart Creek Sewer," it has occurred to me, that additional investigations are required to make a complete and triumphant exposure of the hidden truths of the construction, measurements, and quality and quantity of rubble masonry, rock, plank, and timber foundation.

In order to obtain this information, in addition to that already in our possession, I make the following proposition:

I propose to make excavations through the "refilling" of the sewer, at a number of points along and outside of said sewer, down to, and along the masonry sufficiently large to allow a cross section to be taken, thus making two excavations to each cross section, requiring about 50 cross sections for the purpose of ascertaining the shape and depth of the side walls of rubble masonry. I will contract to do this work for the sum of \$8,000, starting at or near the beginning of the 15 feet sewer. If at any place where the masonry is full, and according to the plan now in the engineer's office, I will deduct the sum of one hundred and sixty dollars (160) per cross section. This amount, \$8,000, will include refilling and replacing the earth as found, and I will guarantee against all injury to the sewer.

By the contract, such examinations are provided for, and in all cases where the contract has been fulfilled, the expense must be paid by the City, where not fulfilled, by Mr. Malone. My proposition relieves the City of all expense.

Very truly yours,

(Signed.)

HENRY B. TATHAM.

Philadelphia, February 28, 1877.

HON. WM. S. STOKLEY,
Mayor.

DEAR SIR:—Since I had the pleasure of addressing you upon the subject of the "Hart Creek Sewer," I have been receiving additional information confirming, in every respect, the report of engineers, Roberts and Seabrook, Jr.

The information in regard to the bad character of the rubble masonry, is more than confirmed. In some instance, the stones were thrown in without a particle of cement-mortar, and what cement-mortar was used, was of no substantial value.

In the Engineers' Report, page 19, fifth line from the bottom, you will observe, that "on only one day, January 18, we noticed that considerable care was used in laying the stones, and we noticed some improvement in sizes."

This remarkable deviation from the quality of the masonry heretofore laid, was easily accounted for, when Mr. Smedley appeared upon the ground, accompanied by Mr. W. Lorenz, Engineer of the Philadelphia and Reading Railroad Co., who was shown THIS SPECIAL PIECE OF STONE MASONRY AS A TYPE OF THE WHOLE.

Mr. Lorenz readily fell into the error prepared for him, and he has written a letter to Mr. Smedley approving of the work.

Mr. Lorenz, so far as I can learn from himself, had, up to this period, paid but one visit to the work in progress, whilst Messrs. Roberts and Seabrook were upon the work daily, over four weeks.

The same remarks will apply to the necessity of a timber and plank foundation for the "twin sewers." He, Mr. Lorenz, personally knew nothing of the facts of the foundation of the "twin sewers," and yet Mr. Smedley attempts to discredit the engineers, Messrs. Roberts and Seabrook, by a statement that *some where else* he, Mr. Lorenz, had found treacherous bottom. This information was imparted *after* Mr. Smedley had changed the plans. Mr. Smedley's letter to you abounds with errors, and as to the cost of stone and cement, is absolutely untrue.

I know that Mr. Malone was offered, by one of our most responsible Stone Co.'s, stone at not exceeding \$1.70 per cubic yard, delivered in close proximity to the sewer.

As to the cement, no such quantity was used as represented by him, namely, \$1.08 per cubic yard.

To arrive at a practical solution of the whole subject, I append a proposition submitted to the City Solicitor, with a view of making a triumphant exposition of the *hidden* truths, in the construction, measurements, quality and quantity of work performed.

Should the examination cost less than the sum estimated, the unexpended balance would be covered into the Treasury of the City.

I am not desirous of taking charge of the proposed examinations. I should prefer that some first class engineers of well known good character, acceptable to your Honor, should be employed to make them.

Very truly, your obd't servant,
HENRY B. TATHAM.

LAW DEPARTMENT.

Philadelphia, February 26, 1877.

GEN LOUIS WAGNER,
Chairman Finance Committee.

MY DEAR SIR:—I have examined the ordinance appropriating \$4,500 to this department to pay counsel fees in the watch-tax case. This is to pay the fee of Mr. Newlin, as special counsel for the City.

Since I have been City Solicitor, I have never requested special counsel for any case. In this particular matter Mr.

Newlin was retained directly by the Finance Committee, he having acted, from time to time, at their request, in tax cases against the State for several years.

The whole matter is, therefore, entirely in the hands of the Finance Committee, subject to whatever arrangements they themselves made with Mr. Newlin in the premises.

Yours truly,

CHARLES H. T. COLLIS,

City Solicitor.

AN ORDINANCE

For payment of counsel fees.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the sum of four thousand five hundred dollars be, and the same is, hereby appropriated to the Law Department to pay fee of counsel for the City in the suits of the City against Mackey and others, and the City against Cochran and others. The warrant therefor to be drawn by the City Solicitor.

APPENDIX No. 105.

Philadelphia, March 1, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—The Committee on Finance respectfully report that they have considered “An Ordinance to authorize the sale of furniture, &c., contained in the Municipal Building, located on the Centennial grounds, within Fairmount Park,” and report the same back, and recommend its passage.

LOUIS WAGNER, *Ch’n*,

W. S. REYBURN,

JOHN A. CLARK,
D. NEWLIN FELL,
JOS. J. MARTIN,
SAML. R. MARSHALL,
WM. ARMSTRONG,
JOHN A. MISKEY,
ARTHUR THACHER.

AN ORDINANCE

To authorize the sale of furniture, &c., contained in the Municipal Building, located on the Centennial Grounds, within Fairmount Park.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Commissioner of City Property be, and he is, hereby directed to offer at public sale, within thirty days of the passage of this ordinance, the furniture, &c., contained in the Municipal Building, located on the Centennial grounds, within Fairmount Park, the proceeds of said sale to be paid into the City Treasury.

APPENDIX No. 106.

OFFICE OF BOARD OF PORT WARDENS,

Philadelphia, March 8, 1877.

To the President and members of Common Council
of the City of Philadelphia.

GENTLEMEN:—I am instructed by our Board to forward you the following copy of a preamble and resolution passed at our last stated meeting, held on the 5th inst.:

“WHEREAS, The enforcement of the collection of the fee, known as the Port Warden’s fee, being deemed onerous by the commercial community, therefore

“*Resolved*, That the Board of Port Wardens recommend to the Select and Common Councils of the City of Philadelphia, that the said fees be abolished.”

These fees are and have been collected under the following Acts of the General Assembly of the Commonwealth of Pennsylvania:

Act of 29th March, 1803, Act of 4th February, 1846, and Act of 5th April, 1867.

Of late years there has been a disposition, on the part of some vessel owners, ship brokers, and others engaged in the shipping of this port, to resist the payment of these fees, until only about one-sixth of the vessels arriving at this port enter and pay fees at this office.

As this Board is one of arbitration between the masters, owners, and consignees of vessels, pilots, wharf owners, &c., relative to all disputes in their respective callings, they are almost daily called upon to adjust claims for pilotage, wharfage, &c., as well as the regulation of commerce of the port, the maintenance of free navigation of both the Delaware and Schuylkill Rivers, &c.

These fees constitute almost the entire revenue of the office, and have fallen off from about \$3,000 to \$1,500 per annum.

The Board therefore ask your honorable body to take such immediate action as will enable them to collect these fees from all vessels arriving at this port, or tend to the abolishment of all such fees, as in your judgment you may deem best for the commercial interests of this port.

Very respectfully yours,

GEO. C. SANDGRAN,

Secretary.

APPENDIX No. 107.

LAW DEPARTMENT,

Philadelphia, March 8, 1877.

To the President of Common Council.

DEAR SIR:—I desire to call your attention to the fact that a large number of claims for services rendered the City by jurors and election officers are outstanding, for which suit may be commenced at any moment, and that unless a sufficient appropriation is at once made to pay the same, the amount will be largely increased by costs of suit.

Yours respectfully,

CHARLES H. T. COLLIS,

City Solicitor.

APPENDIX No. 108.

RESOLUTION

To meet in Joint Convention to elect a Chief Engineer and Surveyor.

Resolved by Common Council, That Select Council be invited to meet Common Council in Joint Convention, in Common Council Chamber, Thursday, March 8, 1877, at 3.45 o'clock P. M., to elect a Chief Engineer and Surveyor.

APPENDIX No. 109.

RESOLUTION

Of request to the Philadelphia and Reading Railroad Company relative to a gate at Broad street and Lehigh avenue.

Resolved by the Select and Common Councils of the City of Philadelphia, That the Philadelphia and Reading Railroad Company be requested to place a gate at Broad street and Lehigh avenue for the protection of the lives of the citizens of Philadelphia.

APPENDIX No. 110.

Philadelphia, March 7, 1877.

To the President and Members of the

APPENDIX No. 116.

Philadelphia, March 15, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN :—Allow me to call the attention of your Honorable bodies to the condition of the sewer on Pennsylvania avenue, from Brown street to the breweries, it being now almost filled with sewage matter, and has caused the water to back up into the cellars of some of the breweries to the depth of three feet, threatening serious damage, but from errors in the construction of said sewer, it fills with filth almost immediately after being cleaned out, and has every year been a source of great expense to the City, and it is almost useless to again clean it out, without some change is made in it.

I would respectfully suggest therefor, that the matter of making the necessary alterations be referred to the Survey Department, with the request that the matter receive immediate attention.

Respectfully,

WILLIAM BALDWIN,
Chief Commissioner of Highways.

AN ORDINANCE

To authorize the construction of sewers on Haverford street, Westminster avenue, Fifty-fifth, Brooks, Thirty eighth, Sixteenth, Hancock, and Adams streets.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Department of Highways be, and is, hereby authorized to construct the following sewer, viz.: on Haverford street, from Sixtieth to Fifty-sixth street, three feet in diameter; thence on Westminster avenue to Fifty-fifth street, of four feet in diameter; thence on Fifty fifth street to Brooks street, and along Brooks street to the natural water-course between Fifty-fifth and Fifty-fourth street, of four and a-half feet in diameter; on Thirty-eighth street, from Eadiline to Hamilton street; on Sixteenth street, from Pine to South street, and on Hancock street, from Chelton avenue to Haines street, thence southward along Haines street about eighty feet, of the diameter of three feet. Said sewers to be built of brick, circular in shape, and in accordance with specifications prepared by the Chief Engineer and Surveyor.

SEC. 2. The Chief Commissioner of Highways shall advertise according to law, announcing that bids will be received for the sewers above designated, and shall allot them to the lowest bidders; and it shall be a condition of the contracts that the contractor shall keep the said sewers, and that portion of the street along which the said sewers shall be laid, in good order and repair for three years from and after the date of the completion of the said sewers, and shall accept the sums assessed upon and charged to the properties lying on the lines of said sewers, in manner and form authorized by

ordinance entitled "An Ordinance regulating the assessment upon property for the construction of branch culverts or drains," approved May 12, 1866, and supplement thereto, approved February 16, 1869; any excess over and above said assessment, in addition to that provided for by ordinance entitled "An Ordinance authorizing the Chief Commissioner of Highways to draw warrants for street intersections, man-holes, and legal deductions in the construction of branch sewers," approved April 3, 1868, to be charged to Item (for branch sewers) of annual appropriation made to the Department of Highways for the year 1877; *Provided*, Said excess does not exceed the sum of four thousand five hundred (4,500) dollars.

APPENDIX No. 144.

DEPARTMENT OF PUBLIC BUILDINGS.

Philadelphia, March 29, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—I have the honor to enclose a communication received from Major General Robert M. Brinton, commanding the First Division of the National Guards of Pennsylvania, in reference to head-quarters being provided in the new public buildings. There are rooms in the buildings which can be temporarily fitted up without interfering with any arrangements heretofore proposed, and which will afford comfortable accommodations for the military head-quarters of the City, and the estimated cost of fitting up which will be about \$3,000.

As the question of fitting up portions of the Buildings for use of some of the departments, I have deemed it proper to forward the communication of Major General Brinton at once to your bodies, that it may receive attention in connection with the general subject already under consideration of your committees.

Personally, I am warmly in favor of any measures which will add to the efficiency of our local military.

Very respectfully,
SAM'L C. PERKINS,
Pres't of Commission.

HEAD-QUARTERS NATIONAL GUARDS,

Philadelphia, March 27, 1877.

Samuel C. Perkins, Esq.,

President of Building Commission.

DEAR SIR :—The National Guards of Philadelphia have previously requested that suitable accommodations for their head-quarters be furnished them by the City authorities. Whilst the requisition was recognized as just and eminently proper, yet there were no rooms then at the disposal of the proper authorities. I have the honor, as commandant of all the National Guards in the City of Philadelphia, to respectfully request, that if possible, suitable rooms be fitted up, and assigned us, in the New Public Buildings. At present we have no suitable shelter to either transact our business, or store the accumulated records. The necessity of the case will be apparent to you, when you contemplate that the important service we perform, is entirely without remuneration, and where other cities are liberal to the extent of tens of thousands of dollars, Philadelphia has been unable to afford us a single room previously, but I trust you will secure in the new buildings, and in which it was originally intended we should have rooms assigned, suitable quarters for us at once.

I am very respectfully,

your obedient servant,

ROBERT MORTON BRINTON,

*Major General Commanding First
Division National Guards.*

APPENDIX No. 154.

AN ORDINANCE

To regulate huckstering or vending of produce, wares, and merchandise, within the corporate limits of the City of Philadelphia, and to grant license for same.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the owner or owners of any cart, wagon, or other vehicle in the nature thereof, drawn otherwise than by hand, and used for the purpose of carrying or exposing for sale in the public streets of the City of Philadelphia, any vegetables, fruits, berries, fish, oysters, general produce, or any other wares or merchandise of any description whatsoever, shall, on or before the first day of June next, appear at the office of the Commissioner of Markets and City Property, and then and there make application for license, stating his, her, or their name or names, and place or places of residence.

SECT. 2. That upon application being made as provided in Section 1, the Commissioner of Markets and City Property is hereby authorized to grant license to the owner or owners to use carts, wagons, or like vehicles, for the purpose of huckstering, vending, or selling from door to door; such license shall specify in each case, the name and place of residence of the owner or owners of such vehicle, and shall also have written thereon the number to be placed on said cart or wagon in accordance with a provision hereinafter contained.

SECT. 3. That upon the granting of the license for the purpose aforesaid, the said applicant or applicants shall pay to said Commissioner, for the use of the City of Philadelphia, the sum of ten (10) dollars for each wagon, cart, or like vehicle, and said applicant shall receive from said Commissioner a certificate or certificates as provided in Section 2.

SECT. 4. That the owner or owners of such carts or wagons, shall annually, after such original entry, appear between the first (1) and fifteenth (15) days of April, at the office of the Commissioner of Markets and City Property,

and take out a new certificate for which he or they shall pay to said Commissioner for the use of the City of Philadelphia, a like sum for each cart, wagon, or like vehicle, as is provided for in Section 3.

SECT. 5. That no abatement in amount shall be made for license issued for a fractional part of a year.

SECT. 6. That no person or persons shall set up or drive within the corporate limits of this City, any huckster-cart or vehicle in the nature thereof, for the purpose of vending or selling from door to door of produce, wares, or merchandise of any kind, unless the same be registered and a certificate thereof be annually renewed as herein provided, under a penalty of five (5) dollars for each and every day said cart or wagon is used.

SECT. 7. That every such cart or wagon shall have the registered number thereof marked in painted figures of not less than two (2) inches in length upon the outside, in such a position, and of such color, that it may be plainly seen; in addition thereto, the name and place of residence of the owner or owners shall be painted in plain and legible letters and figures and prominently displayed thereon at all times; and if the owner or driver of any cart or wagon used for the purpose specified in this ordinance, shall use or drive such vehicle, or permit the same to be used or driven without complying with all the provisions set forth in this section, he or they shall forfeit and pay the sum of ten (10) dollars for each and every offence.

SECT. 8. That it shall be the duty of every owner of each cart or wagon, who after having registered the same, shall change his place of abode, or shall have made sale or transfer of such cart or wagon, to appear within ten (10) days after such removal or sale, at the office of the Commissioner of Markets and City Property, and state the place to which he has removed, or to whom any sale or transfer has been made, and have the same endorsed upon his certificate, and any such owner removing as aforesaid, or selling or transferring his carts or wagons, who shall refuse or neglect to comply with the above requisition, shall forfeit and pay the sum of ten (10) dollars for each and every such offence.

SECT. 9. That if any person or persons shall make, or cause to be made, a false registry of such carts or wagons, either in the number or the use of any number, or in the name or place of residence of such owner, or after a true registry shall have been made, shall in any form or manner alter the certificate, or shall forge or cause to be forged or counterfeited any such certificate, he or they so offending, shall in addition to the penalties already imposed by law for such crime or misdemeanor, forfeit and pay for each and every offence the sum of twenty dollars.

SECT. 10. That each and every person who shall own or have in use any wheelbarrow, push-cart, or hand-cart, for the purpose of huckstering, vending, or selling from door to door any produce, wares, or merchandise, shall pay to the Commissioner of Markets and City Property for the use of the City of Philadelphia, in like manner, and at such times as provided in Sections 2, 3, and 4 of this ordinance, the sum of two dollars and fifty cents (\$2.50) for each and every wheelbarrow, push-cart, or hand-cart, so used or employed; all fines, penalties, and provisions of this ordinance, except in the amount of license to be paid (provided for in a preceding clause of this section), shall apply equally and alike to those persons employed in huckstering or selling from wheelbarrows, push-carts, or hand-carts, as well as to those selling from carts and wagons.

SECT. 11. That the same laws and ordinances now governing, or which may hereafter be enacted to govern the Department of Markets and City Property, in reference to the sale of stale or unwholesome fruits, vegetables, fish, provisions, or other impure stuff, shall apply to all persons licensed in accordance with this ordinance.

SECT. 12. That the said Commissioner of Markets and City Property shall cause to be prepared suitable books and blanks for the issuing and the keeping of a strict account of all licenses issued in accordance with the provisions of this ordinance, and shall return to the City Treasurer all moneys received for said license, in like manner as is now prescribed by law in reference to other moneys received by said department.

SECT. 13. That all ordinances or parts of ordinances inconsistent or conflicting with the provisions of this ordinance, be, and the same are, hereby repealed; *Provided, however,* That all licenses, fines, penalties, and forfeitures, by or under any of the said ordinances, shall be considered as fully and effectually binding and obligatory, as if the said ordinances were in full force; *Provided, also,* That no part or section of this ordinance shall apply to farmers selling the products of their own farms, but that they shall have and enjoy all and the same privileges that are now secured and accorded to them by existing laws and ordinances.

SECT. 14. That all penalties incurred under this ordinance, shall be recoverable before any police magistrate or alderman of this City; one-half thereof shall be paid to the person prosecuting for the same, and the other half shall be paid into the City Treasurer.

APPENDIX No. 163.

Philadelphia, April 4, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—Your Committee on Surveys and Regulations, to whom was referred the accompanying papers, relative to the vacation of Perot street, and the placing of two forty feet wide streets, in lieu thereof, upon the plan of the City,

report, that they have given this case careful examination and consideration. Said Perot street is a street laid out by the Perot family many years ago, but never opened; it is an intermediate street, between Fairmount avenue and Hare street, running west from Twenty-fifth street to Pennsylvania avenue, only one square and a half, is not in the line of any other street, and is therefore not a public necessity as a thoroughfare. It is represented by some of the immediately interested property owners, that the ground will be better adapted for building purposes, to have the said Perot street stricken from the plan, and two streets of forty feet in width, substituted. As it affects private interests more than the public, we believe that the property owners should adjust the matter among themselves, without any cost to the City; for this end, we recommend the passage of the ordinance herewith presented.

Very respectfully,

R. KLAUDER, *Ch'n*,
 JOS. J. MARTIN,
 D. B. WENDLE,
 ISAAC J. GRIFFITHS,
 F. DUNDORE,

 JAS. R. GATES,

JOHN P. WOOLVERTON,
 H. B. LIPPINCOTT,
 DAVID WALLACE,
 BENJ. SAELTZER,
 BENJ. ALLEN,
 JOHN FOX,
 MAXWELL ROWLAND.

AN ORDINANCE

To place certain streets upon the City plan, and to strike Perot street therefrom.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Department of Surveys be, and is, hereby authorized to alter the City plan, between Twenty-fifth and Twenty-sixth streets, Fairmount avenue, Pennsylvania avenue, and Hare street, by striking therefrom Perot street, and placing thereon two streets of the width of forty feet each; *Provided*, That the City incur no cost therefor.

APPENDIX No. 165.

OFFICE OF THE RECEIVER OF TAXES.

Philadelphia, April 12, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—It is my duty to inform you that defalcations have recently been discovered in my department, one of which, committed by Theodore Hanel, the receiving clerk for the Eighth and Tenth Wards, is for a large amount.

The cases have been referred by me to the City Solicitor for such action as might be proper, and his efforts have already been successful in reclaiming a very large amount, and he informs me that in his opinion the ultimate loss will be small in comparison to the large amount abstracted.

But whether his efforts should prove successful or not, the fact still remains, that under the imperfect system now existing for the collection of taxes, facilities exist for embezzlements by dishonest clerks, which could be remedied by proper legislation.

The heavy discounts allowed to tax-payers for prompt payment bring an uncontrollable multitude of people to the tax office at the commencement of each year, and their payments are made to fifteen receiving clerks, whose accounts cannot be audited each day, as they should be, because I am not authorized to appoint any person for that purpose.

The ordinance of Councils makes the receipt of the clerk sufficient evidence of payment, and this receipt may just as well be given outside the office as over its counter, thus placing the tax receiver and the tax payer entirely at the mercy of a dishonest receiving clerk.

The Legislature recently passed a law requiring me to advertise the names of delinquents standing on the books at the close of each year, and I asked your bodies to make

the appropriation to defray the necessary expense incident thereto, but you declined to do so, thus depriving me of the means of communicating to the public the bills upon my books appearing to be unpaid.

The publication of such list would have immediately discovered all discrepancies and defalcations.

On the first of the present year I addressed you a communication calling attention to these defects of system, but no definite action has been taken by you in regard thereto, and my object now is to urge upon you the importance of promptly disposing of the subject, so as to protect the public from loss and the Receiver of Taxes from painful embarrassment and anxiety in the performance of his duties, and in this connection I desire Councils to examine the methods I have adopted of my own motion in advance of any legislation upon the subject.

Respectfully, your obedient servant,

THOS. J. SMITH,

Receiver of Taxes.

RESOLUTION

Instructing the City Solicitor to sue out a writ of quo warranto against Samuel P. Hancock, to inquire by what authority he continues to exercise the office of City Controller.

WHEREAS, In a late suit against the City of Philadelphia, the Master appointed by the Court to report upon the testimony taken therein, found as a fact that Samuel P. Hancock, City Controller, had a direct interest in the contract in suit, in violation of law, which finding has since been affirmed by the Court of Common Pleas of this county;

AND WHEREAS, By Act of Assembly of this Commonwealth the conduct of the said Samuel P. Hancock has worked a forfeiture of his said office of City Controller; therefore be it

Resolved by the Common Council of the City of Philadelphia, That the City Solicitor of the City of Philadelphia be, and is, hereby instructed to proceed without delay to take such action as to procure a writ of quo warranto to be sued out against the said Samuel P. Hancock to inquire by what authority he continues to occupy and exercise the office of City Controller of the City of Philadelphia.

LAW DEPARTMENT.

Philadelphia, April 19, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—I notice by the published proceedings of the Water Committee that I am quoted as giving an opinion to the Chief Engineer that he was justified in allowing extra compensation for “rock excavation” in the construction of the Wentz farm reservoir. This is a mistake. The so-called opinion is in the following language:

“LAW DEPARTMENT,

November 4, 1875.

DR. WM. H. McFADDEN,
Chief Engineer, Water Department.

DEAR SIR:—I am instructed by General Collis, to say that in his opinion the fixing of the compensation for rock excavation in the contract of Mr. R. A. Malone, is a matter within your discretion. The contract will be prepared in obedience to any written directions given by you.

Yours, very respectfully,

W. N. ASHMAN,

Assistant City Solicitor.”

The contract was then unexecuted by the Mayor, and remained so unexecuted, until December 1, 1875, during which time I received no instructions to vary the terms of the contract; when signed by the Mayor, it read, that “all excavations were to be estimated and paid for as ‘earth excavations,’ ” to wit: thirty-eight cents per cubic yard.

Upon the only occasion since the execution of the contract, when my opinion was asked upon the subject, I said emphatically to Mr. McFadden's assistant, in the presence of Mr. Rowan, that the excess paid to the contractor was unwarranted, and must be refunded.

Respectfully, yours,

CHARLES H. T. COLLIS,

City Solicitor.

RESOLUTION

Of instruction to the City Solicitor, relative to contract with William Struthers & Sons.

Whereas, The Commissioners for the erection of Public Buildings, on the 10th instant, passed a resolution requiring the firm of William Struthers & Sons to proceed with the erection of said buildings, and to furnish all labor and material necessary to sustain the marble work provided for under their contract: and

Whereas, William Struthers & Sons are now proceeding with said work, having been advised by counsel eminent in the law, that they will be entitled to recover against the City, under the terms of their contract, in the absence of any appropriation by Councils to the Commissioners; therefore be it

Resolved by the Select and Common Councils of the City of Philadelphia, That the City Solicitor is hereby requested to inform Councils of the liability of the City under the contract now existing between the Commissioners for the Erection of Public Buildings and William Struthers & Sons.

APPENDIX No. 180.

OFFICE OF THE MAYOR,
Philadelphia, April 19, 1877.

To the Common Council
of the City of Philadelphia.

GENTLEMEN:—I herewith transmit communications from Messrs. Tatham and Seabrook, also a certified copy of the proceedings of the Board of Surveyors, relative to the construction of Hart Creek Sewer, for such action as the case requires.

Very respectfully.

W. S. STOKLEY,
Mayor.

—
Philadelphia, April 3, 1877.

H. B. TATHAM, Esq.

DEAR SIR:—As requested, I have to-day examined the present condition of the Hart Creek Sewer, as well as it can be done since its completion.

I found in the sewer, from one and a-half to two feet of debris, broken bricks, &c., it not having been cleaned out, as required by the terms of the contract. Even the place below the temporary dam, claimed to have been built for the purpose of allowing that duty to be performed, is itself not cleaned out, and only served to prevent our continuing the examination for the timber foundation, two hundred and twenty feet long, that had such an obscure location.

The water in a large number of places was dripping and soaking through the brick work. If the brick work was built as it should have been, and the cement made as contracted for, the sewer would have been water tight. Several places have been repaired where the work has given away. The inferior work is shown by the numerous places that are bulging in, the worst of which, IS THIRTY-TWO FEET LONG, FROM TWO TO THREE FEET WIDE, and extending inward from six to eight inches.

At about from four to five hundred feet above the plank road there is an error in the grade, it having a very much heavier fall than it should. The abutment at the lower end

of the sewer, at the Aramingo canal, is giving away, making an ugly crack in the brick work along the inside line of the ring stone. This has been concealed once or twice by cementing the cracks up. In fact, the sewer is in just such a condition as Mr. Robert's and my own examinations convinced me, would be the consequences of such a class of work.

I think the only manner to obtain a complete knowledge of the quality and quantity of work done, is to pursue the plan proposed by you to the Mayor, by sinking shafts and taking cross sections every hundred feet.

Very respectfully,

THOMAS SEABROOK, JR.,

C. E.

Philadelphia, April 11, 1877.

HON. WM. S. STOKLEY, Mayor.

DEAR SIR:—Apprehensive that the “Hart Creek Sewer” would not stand the test of the spring thaw, I requested Mr. Thomas Seabrook, Jr., Civil Engineer, to examine the inside of the sewer. The result of his examination I herewith transmit to you.

From information obtained, I learn that much of the brick work was left out, contrary to the plan, and many bricks laid “dry,” without a particle of cement, and thousands of bricks of miserable quality used.

I doubt if any sewer was ever built in our city, that would compare with the miserable and outrageous construction of this “Hart Creek Sewer.”

As Councils have taken no notice of my recommendation to make a careful examination of this sewer, I would respectfully suggest, that the whole subject should be referred to the Board of Surveyors, with a request that they should make a thorough investigation of the whole subject.

I am informed that it is the duty of the Chief Engineer to submit all his plans for bridges, sewers, &c., to this Board, who are to approve of the same before being contracted for. If this is the law, he has failed to perform his duty, as he has not consulted the Board upon this and similar contracts for public works.

Very respectfully, your obd't servant,

HENRY B. TATHAM.

[*Extract from the minutes of the Board of Surveyors of date April 10, 1877.*]

“ A communication from the Hon. Wm. S. Stokley, Mayor, together with a letter from Henry B. Tatham and a report of Thos. Seabrook, Jr., upon the Hart Creek Sewer, were presented and read; when, Mr. Lightfoot moved that the matter be referred to a Committee of Three.

Which was agreed to.

APPENDIX No. 181.

RESOLUTION

Of instruction to the Chief Engineer of the Water Department relative to
Wentz Farm Reservoir.

WHEREAS, During the late investigation in the matter of the construction of the Wentz Farm Reservoir, it was in evidence that the Water Department had issued warrants for 117,300 bricks, at thirteen dollars and fifty cents (13.50) per 1,000 (which had not been received), amounting to one thousand five hundred and eighty-three dollars and fifty-five cents (1,583.55) and had also paid for 2,000 cubic yards of rock excavation at one (1) dollar per yard, while the contract expressly stated that such excavation would only be paid for as earth excavation at thirty-eight (38) cents per yard, making an excess of one thousand two hundred and forty (1,240) dollars.

AND WHEREAS, By the certificate of John J. Thackeray, one of the sworn measurers of the City, it appears that the department has paid for about 400 cubic yards of stone masonry at fourteen (14) dollars per yard (amounting to about five thousand six hundred (5,600) dollars in excess of the work actually done; therefore,

Resolved by the Select and Common Councils of the City of Philadelphia, That the Chief Engineer of the Water Department be, and he is, hereby instructed not to draw any more warrants for work hereafter done on the said Wentz Farm Reservoir until the future work actually completed shall amount to the sum of eight thousand four hundred and twenty-three dollars and fifty-five cents (\$8,423.55).

Resolved, That the Chief Engineer be, and he is, hereby instructed that hereafter when contracts have been entered into, he shall not materially alter or amend them unless he shall have previously laid before the Select and Common Councils a plan of the proposed changes and estimated cost of the same, and obtaining the consent of said Councils to such changes and amendments.

SECT. 2. That the City Solicitor be, and he is, hereby directed to file an agreement of record, restricting the lien of judgment as against the said Peter A. B. Widener, to the following properties, viz.: Nos. 1901, 1903, 1905, 1907, 1909, 1911, and 1913 Berks street, in the City of Philadelphia.

APPENDIX No. 203.

Philadelphia, April 26, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—The Committee on Finance respectfully report, that they have considered the annexed communication from the Inspectors of the Philadelphia County Prison, for

an appropriation of \$1,338.00, for placing a tin roof on the north and south blocks of the prison occupied by the male prisoners, and submit the annexed ordinance to make an appropriation for the purpose, and recommend its passage.

Very respectfully,

LOUIS WAGNER, <i>Ch'n</i> ,	G. T. JONES,
JOHN BARDSLEY,	GEO. A. SCHAFER,
JOHN A. CLARK,	WM. ARMSTRONG,
J. P. WOOLVERTON,	JOHN C. BICKEL,
S. R. MARSHALL,	W. S. REYBURN,
EDWARD MATTHEWS,	G. W. BUMM,
JOHN A. MISKEY.	

To the Select and Common Councils
of the City of Philadelphia.

The Board of Inspectors of the Philadelphia County Prison respectfully make known, that the copper covering of a part of the roofs of the north and south blocks of the prison (occupied by the male prisoners) has suffered so much from the action of the weather for more than forty years, that it is found absolutely necessary to apply another covering to prevent further leaking.

The estimate for the repairs of the roof is as follows :

For tin of the kind best adapted to that purpose,	
and for soldering and paint, - - -	\$1,050.00
For lumber (boards and scantling) and nails, - -	288.00
	<hr/>
	\$1,338.00

That amount will include the entire cost of the proposed repairs, as the putting on of the tin, the carpenters' work and the painting will all be done by the force in the prison, and without any additional cost to the institution.

But as these repairs to the roof are not entered into the estimate of the present year's expenditure, and as the existing appropriations for repairs may be required for ordinary purposes,

and as it is not likely that there will be any surplus from which a large transfer could be made to that of repairs, and as it is right to have an appropriation for a large expenditure, it is respectfully requested that Councils will make an additional appropriation for repairs to the estimated amount of cost of covering the roof, viz.: thirteen hundred and thirty-eight (1338) dollars.

The amount *realized* from the repairs of the roof will be about as follows:

Estimated product of the sale of the old copper,	\$4,000.00
Appropriations for new tin, &c.,	- - 1,338.00
	<hr/>
	\$2,662.00

So that after the expenditure of \$1,338.00 for new tinning the roof, there will be a balance of \$2,662.00 to be returned to the Treasury.

Respectfully submitted,

JOS. R. CHANDLER,

President P. T. of the Board.

Philadelphia County Prison,

April 9, 1877.

—

AN ORDINANCE

To make an appropriation to the Inspectors of the County Prison to pay for a new tin roof.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain,* That the sum of thirteen hundred and thirty-eight (1,338) dollars be, and the same is, hereby appropriated to the Inspectors of the County Prisons to pay for putting on a new tin roof on the north and south blocks of the prison (occupied by the male prisoners.) And warrants shall be drawn by the said inspectors.

APPENDIX No. 211.

RESOLUTION

Requesting the District Attorney of the County of Philadelphia to prefer an indictment before the Grand Jury of said County, against Samuel P. Hancock, for perjury.

WHEREAS, In the late suit of *Quinn vs. The City of Philadelphia*, the Master appointed by the Court found as a fact that Samuel P. Hancock, City Controller, was to, and did receive a portion, to wit, the sum of six thousand dollars, out of the bill and warrant presented to him for his audit and approval as Controller of the said City, which finding has since been affirmed by the Court aforesaid, to wit, the Court of Common Pleas No. 3, of the County of Philadelphia.

AND WHEREAS, By the Ordinance of February 28, 1856, it is enacted as follows: "No department shall issue any warrants until the bill containing such claim shall be presented by said department to the Controller. And the Controller shall audit such bill with the view to ascertain whether the supplies have been purchased or the services performed, and the sum charged therefor is proper; and he shall inquire and ascertain if any member of Councils, member or officer of such board, officer of any department, or *officer or agent of the City corporation is interested in the sum due therefor, or is to receive any portion thereof*, or has received any commission, consideration, or gratuity relating thereto; and if any party is so interested, *he shall refuse to countersign said bill*, and report the same to Councils."

AND WHEREAS, The said Samuel P. Hancock did take an oath faithfully to discharge the duties of his office, and to superintend the fiscal concerns of the City in such manner, and make reports thereon in such manner as is prescribed by ordinance.

AND WHEREAS, By Act of Assembly, passed February 2, 1854, it is enacted, that if he shall knowingly violate the

oath by him taken, *he shall be deemed guilty of perjury*, and on conviction thereof in the proper Court, be sentenced to undergo solitary imprisonment at hard labor in the Eastern Penitentiary for the term of not less than one, nor more than ten years.

Resolved by the Common Council of the City of Philadelphia, That the District Attorney of the County be, and is, hereby requested to prefer an indictment before the Grand Jury of the County of Philadelphia, against Samuel P. Hancock aforesaid, the then, and the present City Controller, for *perjury*, under the statute aforesaid.

OFFICE PUBLIC BUILDING COMMISSION,

Philadelphia, May 3, 1877.

To the Select and Common Councils
of the City of Philadelphia.

At a stated meeting of the Commissioners for the Erection of the Public Buildings, held on Thursday, the first instant, the following resolution was adopted :

Resolved, That copies of the opinion of George W. Biddle, Esq. be sent to the Select and Common Councils, with the request that they provide by ordinance authorizing and directing the Controller to countersign warrants to the amount of \$500,000, to be drawn by the Commissioners, in favor of their Treasurer, from time to time, as they may need, for payment of the liabilities necessary for the prosecution of the work.

And a copy of the opinion of George W. Biddle, Esq., therein referred to, is herewith transmitted.

Very respectfully,

SAM'L C. PERKINS,

President of Commissioners.

—

Philadelphia, April 27, 1877.

SAMUEL C. PERKINS, Esq.,

President of the Commissioners for the
Erection of the Public Buildings.

DEAR SIR:—Under the communication of the 21st instant, addressed to me by yourself and others, a Committee of the Commissioners for the Erection of the Public Buildings, I have proceeded to examine the questions submitted to me for my opinion, and I have reached the following conclusions :

I. The existing contract of December 18, 1873, between the Public Buildings Commission and Messrs. Struthers & Sons is binding upon the City of Philadelphia.

II. Section X of the existing contract between the Public Buildings Commission and Messrs. Struthers & Sons would enable the Commission to require Messrs. Struthers to supply or erect any additional materials or work of the same general description as that contemplated by the contract; but the Commission cannot *compel* these contractors, under this section, to erect the brickwork of the Public Buildings, that work being of a different kind from that contemplated by the contract.

III. It is, perhaps, doubtful whether the Commission can now make a new contract, on which the person contracted with can sue the City of Philadelphia directly: But

IV. The Commission can compel the Councils and other officers of the City of Philadelphia to raise such amounts as the Commission shall (on or before December 1 of each year) make requisition for by the imposition of a special tax. The proceeds of such special tax must be paid in bulk to the Commissioners.

V. The Commission can make new contracts now with any one for the purpose of erecting, furnishing material to, or completing the Public Buildings, and pay such contractors out of the money so raised. Such contractors would probably have to look to the funds thus raised by the Commission.

VI. The proper legal remedy of the Commission in case Councils refuse to comply with the requisitions duly made by the Commission, is by a mandamus against the City, the Councils, and the fiscal officers of the City.

The reasoning by which I have arrived at these conclusions is as follows:

The contract made by the Commission with Messrs. Struthers & Sons, under the authority of the Act of August 5, 1870, was executed December 18, 1873, and the first question that arises, is whether it is affected by the Constitution of 1874, which was voted on on December 16, 1873.

Section 20 of Article III. of the present Constitution is—

“The General Assembly shall not delegate to any special Commission * * * * any power to make, supervise,

or interfere with any municipal improvement, * * * *
or to levy taxes, or perform any municipal function what-
ever."

Section 2 of Article XV. is—

"No debt shall be contracted, or liability incurred, by any Municipal Commission, except in pursuance of an appropriation previously made therefor by the Municipal Government."

While it is true that the present Constitution was adopted by a vote of the people of the State, upon the 16th December, 1873, yet by paragraph 3 of the ordinance submitting it to a vote of the people, it is declared that, "If it shall appear that a majority of the votes polled are for the new Constitution, then it shall be the Constitution of the Commonwealth of Pennsylvania, on and after the first day of January, in the year of our Lord 1874."

The validity of this paragraph of the ordinance of submission was not questioned in *Wells vs. Bain*, 30 Legal Intelligencer, 416; *Woods vs. The Secretary of the Commonwealth*, 31 Legal Intelligencer, 364, and since the adoption of the Constitution it is binding, as § 32 of the schedule enacts that the ordinance "shall be held valid for all the purposes thereof." Moreover, section 1 of the schedule declares that "this Constitution shall take effect on the first day of January, in the year 1874, for all purposes not otherwise provided for therein;" and the words "adoption" and "adopted" are constantly used throughout the instrument as the equivalent of "*the taking effect*" referred to in this section of the schedule.

As the present Constitution, therefore, did not go into effect until January 1, 1874, the contract with Messrs. Struthers & Sons, executed on December 18, 1873, is a valid and effective contract, governed by the constitutional provisions applicable to such instruments, and has all the force of any other contract, made between parties competent to contract, notwithstanding the provisions of section 20, article III., and section 2 of article XV., above quoted. It may be added that section 2 of the schedule declares that "all rights, actions, prosecutions, and contracts shall continue as if this Constitution had not been adopted."

It may, however, be argued that in view of the sections of the Constitution already referred to, the Building Commission cannot now make any further contracts with other parties binding upon the City in order to carry into effect the purposes for which the Commission was created, viz. : the erection and completion of the Public Buildings upon the site designated.

The language of section 20 of article III. is, "The General Assembly shall not delegate to any special commission," &c. This proviso has been held by Judge THAYER, in *Park Commission vs. The Mayor and Councils of the City of Philadelphia*, 2 Weekly Notes 124, to be clearly prospective; and this view is strengthened by contrasting with this section the concluding passages of sections 21 and 22, immediately following, viz. :

"No Act of Assembly shall limit the amount to be recovered for injuries, * * * *and such Acts now existing are avoided.*"

"No Act * * * shall authorize the investment of trust fund * * * in the bonds * * * of any private corporation, *and such Acts now existing are avoided,*" showing that when the constitution designed to avoid existing Acts, express language for this purpose was used. It seems plain therefore, that the Building Commission may proceed to carry out the purposes of the Act of Assembly of August 5, 1870, from which they derive their existence. This can only be done by entering into contracts where such further contracts are necessary. It is plain that the Messrs. Struthers cannot complete their contract as to the marble work, unless the brick work to which marble work is to be attached, proceeds at the same rate. The Commission therefore must have authority to contract for the erection of brick work and the like, and indeed for all work necessary to be done in order that the buildings may be completed.

Can the Commission, however, under Section 2 of Article XV. of the Constitution, contract, or incur a liability for these purposes, except in pursuance of an appropriation previously made therefore by the City? It is doubtful whether the City would not be directly liable in a suit by a contractor, on a contract made to-day by the Commission. The Act of 25th August, 1870, enacts that—"the said Commissioners shall make requisition on the Councils of said City prior to

the first day of December in each year, for the amount of money required by them for the purposes of the Commission for the succeeding year, and said Councils *shall* levy a special tax sufficient *to raise the* amount so required ;” and also, “it shall be the duty of the Mayor, the City Controller, City Commissioner, and City Treasurer, and of all other officers of the City, and also the duty of the Councils of the City of Philadelphia, to do and perform all such Acts in aid and promotion of the intent and purpose of this Act of Assembly, as said Commission may from time to time require.”

The Commission is, undoubtedly, to make its requisitions prior to December of every year upon the City Councils for such sums of money as they may deem necessary for the prosecution of the work during the ensuing year. The only limit to the amount of this requisition is the *bona fides* of the action of the Commission. If they make the requisition, as I am instructed has been done prior to the month of December, 1876, for the present current year, and its terms are disregarded by Councils, then clearly the Commission has a remedy to compel Councils to do their duty in the premises.

This remedy would be a writ of mandamus directed to the Mayor and Councils of the City to compel the levying of a tax sufficient for the purpose, and to pay over the proceeds of the tax when raised.

Act of 5th April, 1866, P. L., 523.

Act of 5th April, 1867, § 4, P. L., 816.

After the money has been raised in this way, the Commission may undoubtedly enter into contracts for new necessary work, such as brickwork, &c., to be done upon the buildings. If therefore, Article XV., Section 20, is operative upon the Building Commission, it would seem that the money must be raised under their requisition before they can make new contracts; in other words the money must be in direct course of being raised under their requisition, and in that sense appropriated, before any new contracts binding upon the City

can be entered into. As a practical question this should not delay the prosecution of the work, because we are bound to suppose that the municipal authorities, when their attention is directly called to their duties in this behalf, will obey the mandate of the law, without opposing unnecessary obstacles thereto.

APPENDIX No. 236.

Philadelphia, May 11, 1877.

To the Presidents and Members of Select and

Common Councils of the City of Philadelphia.

GENTLEMEN:—We, your Committee on Police, to whom was referred the bill entitled “An Ordinance to regulate huckstering or vending of produce, wares, and merchandise, within the corporate limits of the City of Philadelphia, and to grant license for the same,” respectfully report that we have examined and approve the same, and submit for your consideration the annexed ordinance, and recommend its passage.

Very respectfully,

E. H. HAYHURST, <i>Ch'n</i> ,	W. ELLWOOD ROWAN,
WM. WRIGHT,	JOHN SHEGOG,
GEORGE T. MOORE,	FRANCES MORGAN,
ALEXANDER RUSSELL,	S. C. COLLINS,
C. H. KRUMBHAAR,	CHAS. THOMSON JONES,
AMOS M. SLACK,	WM. ARMSTRONG,
EDWARD W. PATTON.	

AN ORDINANCE

To regulate huckstering or vending of produce, wares, or merchandise, within the corporate limits of the City of Philadelphia, and to grant license for same, and regulate the highways of the City of Philadelphia for market purposes.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the owner or owners of any cart, wagon, or other vehicle in the nature thereof, or any person using the same drawn otherwise than by hand, and used for the purpose of carrying or exposing for sale, in the public streets of the City of Philadelphia, any vegetables, fruits, berries, fish, oysters, general produce, wood, coal, or any other wares or merchandise of any description whatsoever, shall, within thirty days of the passage of this or-

dinance, appear at the office of the Commissioner of Markets and City Property, and then and there make application for license, stating his, her, or their name or names, and place or places of residence.

SEC. 2. That upon application being made as provided in section 1, the Commissioner of Markets and City Property is hereby authorized to grant license to the owner or owners to use carts, wagons, or like vehicles, for the purpose of huckstering, vending, or selling from door to door. Such license shall specify in each case the name and place of residence of the owner or owners of such vehicle, and shall also have written thereon the number to be placed on said cart or wagon, in accordance with a provision hereinafter contained.

SEC. 3. That upon the granting of the license for the purpose aforesaid, the said applicant or applicants shall pay to said Commissioner, for the use of the City of Philadelphia, the sum of fifteen (15) dollars for each wagon, cart or like vehicle drawn by two horses, and the sum of ten (10) dollars for all drawn by single horses, and said applicant or applicants shall receive from said Commissioner a certificate or certificates, as provided in section 2.

SEC. 4. That the owner or owners of such carts or wagons shall annually, after such original entry, appear between the first (1st) and fifteenth (15th) days of April, at the office of the Commissioner of Markets and City Property, and take out a new certificate, for which he or they shall pay to said Commissioner, for the use of the City of Philadelphia, a like sum for each cart, wagon, or like vehicle, as is provided for in section 3.

SEC. 5. That no abatement in amount shall be made for license issued for a fractional part of a year.

SEC. 6. That no person or persons shall set up, or drive within the corporate limits of this City, any huckster cart or vehicle in the nature thereof, for the purpose of vending or selling from door to door of produce, wares, or merchandise of any kind, unless the same be registered and a certificate thereof be annually renewed as herein provided, under a penalty of five (5) dollars for each and every day said cart or wagon is used.

SEC. 7. That every such cart or wagon shall have the registered number thereof marked in painted figures of not less than two (2 inches in length, upon the outside, in such a position, and of such color, that it may be plainly seen; in addition thereto, the name and place of residence of the owner or owners shall be painted in plain and legible letters and figures, and prominently displayed thereon at all times; and if the owner or driver of any cart or wagon, used for the purpose specified in this ordinance, shall use or drive such vehicle, or permit the same to be used or driven, without complying with all the provisions set forth in this section, he or they shall forfeit and pay the sum of ten (10) dollars for each and every offence.

SEC. 8. That it shall be the duty of every owner of each cart or wagon, who, after having registered the same, shall change his place of abode, or shall have made sale or transfer of such cart or wagon, to appear, within ten (10) days after such removal or sale, at the office of the Commissioner of Markets and City Property, and state the place to which he has removed, or to whom any sale or transfer has been made, and have the same endorsed upon his certificate; and any such owner removing as aforesaid, or selling or transferring his carts or wagons, who shall refuse or neglect to comply with the above requisition, shall forfeit and pay the sum of ten (10) dollars for each and every such offence. *Provided however*, That there shall be no charge made for any such register of transfer or removal.

SEC. 9. That if any person or persons shall make or cause to be made a false registry of such carts or wagons, either in the number or the use of any number, or in the name or place of residence of such owner, or, after a true registry shall have been made, shall in any form or manner alter the certificate, or shall forge or cause to be forged or counterfeited any such certificate, he or they so offending shall, in addition to the penalties already imposed by law for such crime or misdemeanor, forfeit and pay for each and every offence the sum of one hundred dollars.

SEC. 10. That each and every person who shall own or have in use any wheelbarrow, push-cart, or hand-cart, for the

purpose of huckstering, vending, or selling from door to door any produce, wares, or merchandise, shall pay to the Commissioner of Markets and City Property, for the use of the City of Philadelphia, in like manner, and at such times as prescribed in sections 2, 3, and 4 of this ordinance, the sum of one (1) dollar for each and every wheelbarrow, push-cart, or hand-cart so used or employed. All fines, penalties, and provisions of this ordinance, except in the amount of license to be paid (provided for in a preceding clause of this section), shall apply equally and alike to those persons employed in huckstering or selling from wheelbarrows, push-carts, or hand-carts, as well as to those selling from carts and wagons.

SEC. 11. That the same laws and ordinances now governing, or which may hereafter be enacted to govern the Department of Markets and City Property in reference to the sale of stale or unwholesome fruits, vegetables, fish, provisions, or other impure commodities, shall apply to all persons licensed in accordance with this ordinance.

SEC. 12. That the said Commissioner of Markets and City Property shall cause to be prepared suitable books and blanks for the issuing and the keeping of a strict account of all licenses issued in accordance with the provisions of this ordinance, and shall return to the City Treasurer all moneys received for said license in like manner as is now prescribed by law in reference to other moneys received by said department.

SEC. 13. It shall not be lawful to use any highway or sidewalk as a wagon stand for the sale of meats, vegetables, produce, wares, or merchandise of any kind, and any person violating the provisions of this section shall be liable to a fine of fifty dollars for every such offence.

SEC. 14. That from and after the passage of this ordinance it shall not be lawful to set up, establish, or maintain any stand or curb stone market upon any of the public paved streets or footwalks of the City of Philadelphia, either by

cart, wagon, vehicle, or otherwise, for the sale of vegetables, meats, fish, farm, or garden produce.

SEC. 15. That all ordinances or parts of ordinances inconsistent or conflicting with the provisions of this ordinance be, and the same are, hereby repealed: *Provided*, That no part or section of this ordinance shall apply to farmers selling the products of their own farms, but that they shall have and enjoy all and the same privileges that are now secured and accorded to them by existing laws and ordinances: *Provided however*, That all persons residing in the rural districts, or outside of this county, professing to be farmers, using the streets of this City for the selling of the products of their own farms, shall appear before the Commissioner of Markets and City Property and there, under oath or affirmation, satisfy him that they are such farmers so residing, and obtain from him a certificate to that effect without cost, and any person found violating the provisions of this section shall be subject to a penalty of five (5) dollars for the first offence and ten (10) dollars for every subsequent offence.

SEC. 16. That all penalties incurred under this ordinance shall be recoverable before any police magistrate or alderman of this City; one-half thereof shall be paid to the person prosecuting for the same, and the other half shall be paid to the City Treasurer.

OFFICE OF THE PORT WARDENS,

Philadelphia, May 9, 1877.

To the President and members of Common Council
of the City of Philadelphia.

GENTLEMEN:—I beg to transmit to your honorable body the following copy of a resolution, adopted unanimously at our last stated meeting, held on 7th instant:

Resolved, That the Committee on Councils of this Board be instructed to urge upon City Councils the necessity for an appropriation to raise the hulks of three (3) canal boats, sunk in the Schuylkill river, between the Market and Chestnut streets bridges.

Very respectfully yours,

GEO. C. SANDGRAN,

Secretary.

APPENDIX No. 242.

OFFICE OF THE PORT WARDENS,

Philadelphia, May 9, 1877.

To the President and Members of Common Council
of the City of Philadelphia.

GENTLEMEN:—I beg to transmit to your honorable body the following preamble and resolution adopted unanimously at our last stated meeting, held on 7th instant:

WHEREAS, The Common Council of the City of Philadelphia, at a meeting held on Thursday, May 3, 1877, passed a resolution which provides for the removal of the office of the Port Wardens to Penn Square; and

WHEREAS, The State of Pennsylvania has provided by law that all vessels arriving at the port of Philadelphia of over seventy-five tons burthen shall within twenty-four hours report at the Wardens' office, which is now conveniently located near the Delaware river; and that if removed to Broad street, captains, masters, consignees of vessels, &c., will fail to report; therefore, we respectfully ask your honorable body to reconsider the vote as touching the removal of the Port Wardens' office, believing, as we do, that the office should be in the immediate vicinity of the principal business of the port.

Very respectfully yours,

GEO. C. SANDGRAN,

Secretary.

APPENDIX No. 243.

Philadelphia, May 18, 1877.

To the President and Members of Common Council
of the City of Philadelphia.

GENTLEMEN:—A resolution was passed May 11, 1877, appointing Messrs. Kneass, Shedaker, Briggs, and Smelley, a Committee of Engineers to make a survey and report upon the cost and best plan of widening Delaware avenue from 40 to 100 feet, for the railroad track, and as Colonel Scott has agreed to pay only one-third of such cost, then Councils will know who is to pay the balance before giving up the avenue from Vine to Walnut streets for the purpose of widening

Section 1 of the ordinance passed by the Select Chamber, relates exclusively to the possession of Delaware avenue, between Dock street and the south side of Callowhill street, and as that is the part for which the Engineers were appointed to make the survey and report, the suspension of that section for the present, until after the survey is made, can work no injury, as the other sections of the bill can be pro-

ceeded with without reference to this section. Besides, by a suspension of section 1, until after the survey, Councils can act intelligently, know the cost and the amount to be paid, and prevent future litigation between the Railroads, City, Girard Trust, and the owners of property on said avenue.

APPENDIX No. 246.

Philadelphia, May 16, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—Your Committee on Surveys and Regulations, to whom was referred the accompanying ordinances and petitions for sewers, beg leave to report that they find the drainage asked for to be requisite for public health, cleanliness, and convenience. We herewith submit an ordinance for their construction, and respectfully ask its adoption.

Very respectfully,

R. KLAUDER, <i>Ch'n</i> ,	S. DAVIS PAGE,
LOUIS WAGNER,	JOHN McCULLOUGH,

DAVID WALLACE,	HENRY GLASS,
JOHN P. WOOLVERTON,	BENJ. ALLEN,
JOHN COCHRAN.	

AN ORDINANCE

To authorize the construction of sewers on Mt. Vernon, Third, German, and Penn streets.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Department of Highways be, and is, hereby authorized to construct the following sewers, viz. : on Mount Vernon street, from Ninth to Tenth street; and on Penn street, from Wingohocking creek to a point fourteen hundred feet northeastward therefrom, of vitrified drain pipe, of the diameter of fifteen inches in the clear; and on Third street, from Catharine to German streets, a three feet brick sewer with an extension of a twelve inch pipe westward from Third street to the summit east of Fourth street. Said sewers to be built in part of brick, circular in shape, and in accordance with specifications prepared by the Chief Engineer and Surveyor.

SECT. 2. The Chief Commissioner of Highways shall advertise according to law, announcing that bids will be received for the sewers above designated, and he shall allot them to the lowest bidders, and it shall be a condition of the contracts that the contractor shall keep the said sewers and that portion of the street along which the said sewers shall be laid, in good order and repair for three years from and after the date of the completion of the said sewers, and shall accept the sums assessed upon and charged to the properties lying on the lines of said sewers, in manner and form authorized by Ordinance entitled "An Ordinance regulating the assessment upon property for the construction of branch culverts or drains," approved May 12, 1866, and supplement thereto, approved February 16, 1869; any excess over and above said assessment, in addition to that provided for by Ordinance entitled "An Ordinance authorizing the Chief Commissioner of Highways to draw warrants for street intersections, manholes, and legal deductions in the construction of branch sewers," approved April 3, 1868, to be charged to Item (for branch sewers) of annual appropriation made to the Department of Highways for the year 1877; *Provided*, Said excess does not exceed the sum of seven hundred and seventy (770) dollars.

APPENDIX No. 247.

Philadelphia, May 16, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—Your Committee on Surveys and Regulations, to whom was referred the accompanying ordinance and petitions for sewers, report that they have been examined, and approved by the Board of Surveyors, from whose reports we find them to be much needed for surface and private drainage; that their aggregate length will be 1,996 feet, costing to the property owners \$5,154, and to the City not exceeding \$500. We herewith submit an ordinance for their construction, and respectfully ask its adoption.

AN ORDINANCE

To authorize the construction of sewers on Fitzwater, Mill, Second, and Race streets.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Department of Highways be, and is, hereby authorized to construct the following sewers, viz.: On Fitzwater street, from Nineteenth street to the east line of Twentieth street; on Mill street, from Cumberland street southward five hundred and seventy-eight feet; on Second street, from Christian street to Washington avenue; and on Race street, from Twenty-second street to eighty-five feet east of Albion street. Said sewers to be built of brick, circular in shape, of the diameter of three feet in the clear, and in accordance with specifications prepared by the Chief Engineer and Surveyor.

SECT. 2. The Chief Commissioner of Highways shall advertise according to law, announcing that bids will be received for the sewers above designated, and he shall allot them to the lowest bidders; and it shall be a condition of the contracts that the contractor shall keep the said sewers, and that portion of the street along which the said sewers shall be laid, in good order and repair for three years from and after the date of the completion of the said sewers; and shall accept the sums assessed upon and charged to the properties lying on the lines of said sewers, in manner and form authorized by ordinance entitled "An Ordinance regulating the assessment upon property for the construction of branch culverts or drains," approved May 12, 1866, and supplement thereto approved February 16, 1869; any excess over and above said assessment, in addition to that provided for by ordinance entitled "An Ordinance authorizing the Chief Commissioner of Highways to draw warrants for street intersections, manholes, and legal deductions in the construction of branch sewers," approved April 3, 1868, to be charged to Item (for branch sewers) of annual appropriation made to the Department of Highways for the year 1877. *Provided*, said excess does not exceed the sum of five hundred (500) dollars.

APPENDIX No. 248.

Philadelphia, May 18, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—Your Committee on Surveys and Regulations, to whom was referred the accompanying ordinance to revise the lines and grades upon Plan No. 18, beg leave to report that the diversion of the waters of Gunner's run into the main sewer renders it necessary to provide for the drainage formerly passing into that stream, by several branch sewers, for which purpose a change of grades and the location of several new streets will be required.

Such streets have already been laid out and dedicated to the City, or built upon, and the revision of lines and grades petitioned for from time to time. Your committee for these

reasons recommend the ordinance, with the proviso that the City be at no cost for the dedication and placing upon plan of any new street, to your favorable consideration.

RESOLUTION

To discharge the Committee on Finance from the further consideration of
an ordinance relative to City warrants.

Resolved by the Select and Common Councils of the City of Philadelphia, That the Committee on Finance be discharged from the further consideration of an ordinance entitled “An Ordinance that all warrants drawn by the Departments of the City of Philadelphia shall be payable to the order of the party or parties to whom the debt or debts are due.”

Philadelphia, April 26, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—The undersigned minority of the Committee on Finance respectfully report that they cannot agree with the majority in their negative report on the ordinance

entitled "An Ordinance that all warrants drawn by the different departments of the City of Philadelphia be drawn to the order of the parties to whom the debt or debts are due," for the reason that they believe that all warrants should be made payable to the order of the person entitled to the same, as it would prove to be a greater security to the City. Until recently all warrants were made payable to order, and we think they should be made payable to order at all times.

Respectfully submitted,

DEPARTMENT OF SURVEYS,

Philadelphia, May 24, 1877.

JOSEPH L. CAVEN, ESQ.,

President of Common Council.

DEAR SIR:—I send herewith for the approval of Councils, as required by ordinance, a plan for an iron draw-bridge on the site of Penrose Ferry bridge, consisting of a fixed span of 91 feet on the west, and a swing bridge, to be operated by steam power, of 304 feet in length, nearest the east side of the river, which will make the main channel available, and remove the objections which have been made in the interest of navigation, and it is believed will satisfy the demands of traffic both by land and water.

Respectfully submitted.

SAML. L. SMEDLEY,

Chief Engineer and Surveyor.

AN ORDINANCE

To release Charles A. Sparks as surety upon the official bond of Wm. H. McFadden, Chief Engineer of the Water Department, and to substitute Robert McFadden as surety on said bond, and to restrict the lien of the judgment thereon.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That Charles A. Sparks be, and he is, hereby released as surety upon the official bond of Wm. H. McFadden, Chief Engineer of the Water Department, and that the City Solicitor be, and he is, hereby authorized and instructed to satisfy the judgment entered upon the said bond as against the said Charles A. Sparks; *Provided*, That Robert McFadden shall first enter into a bond in the sum of ten thousand dollars conditioned for the faithful performance by said Wm. H. McFadden of his official duties, and indemnifying the City from any loss by reason of any breach of the conditions of his official bond; *Provided*, The

co-surety on said official bond shall consent thereto; *And provided further*, That the sum of fifty dollars be first paid into the City Treasury to pay the cost of printing this ordinance.

SECT. 2. APPENDIX No. 271.

Philadelphia, May 24, 1877.

To the Select and Common Councils

of the City of Philadelphia.

GENTLEMEN:—The Committee on Finance respectfully report that they have considered a communication from the Chief Commissioner of Highways relative to sewer rent due and unpaid by the Eastern Penitentiary and the House of Refuge; also a communication from the Managers of the House of Refuge, stating that they had never paid any sewer rent, and that they were one of the charitable institutions of the City, supported by appropriations made by Councils, and ought to be exempt from such payment. The committee are of opinion that for the reasons mentioned by the said Managers of the House of Refuge, they should be exempt; but as the Penitentiary charges the City for the support of prisoners, they ought to pay the said sewer rent. The committee therefore submit the annexed ordinance relative to the subject, and recommend its passage.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the City Solicitor be, and is, hereby directed to enter satisfaction upon the official bond of Jameson Lott, late Superintendent of Highways: *Provided*, The City Controller shall first certify that his accounts are correct, and there is no default.

APPENDIX No. 273.

Philadelphia, May 24, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN :—The Committee on Finance respectfully report that they have considered a resolution to authorize the construction of a sewer on Forty-fourth street, from Market to Sansom street, and there being a balance of loan of May 3, 1860, Bridge and Road Damages, sufficient to pay for its construction, the Committee submit the annexed ordinance to authorize the construction of a sewer on Forty-fourth street, between Market and Sansom streets, and recommend its passage.

LOUIS WAGNER, <i>Ch'n</i> ,	GEO. A. SCHAFER,
HENRY GLASS,	GEO. A. ENO,
G. W. BUMM,	ARTHUR THACHER,
JOHN A. MISKEY,	JAS. R. GATES,
MAXWELL ROWLAND,	WM. ARMSTRONG,
JOHN McCULLOUGH,	EDW'D MATTHEWS,
GEORGE T. JONES,	W. L. ELKINS,
J. P. WOOLVERTON.	

AN ORDINANCE

To authorize the construction of a sewer on Forty-fourth street, between Market and Sansom streets.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain,* That the Chief Commissioner of Highways is hereby authorized and directed to enter into a contract with competent mechanics for the construction of a sewer on Forty-fourth street, from Market to Sansom streets, five feet in diameter.

SECT. 2. That it shall be the duty of the Chief Engineer and Surveyor to prepare plans and specifications for said sewer, and that the contract entered into for the construction thereof shall be in accordance with such plans and specifications.

SECT. 3. That before entering into the said contract the Chief Commissioner of Highways shall cause advertisement to be made for sealed proposals for the construction of the sewer, and that the contract therefor shall be awarded by him to the lowest and best bidder; and no contract therefor shall be binding on the City of Philadelphia until the same shall have been approved by these Councils.

SECT. 4. That no proposal for the construction of the said sewer shall be considered by the said Chief Commissioner of Highways unless accompanied by an engagement in writing from two or more sufficient sureties guaranteeing the faithful execution of the contract in case such proposal be accepted.

SECT. 5. That as the completion of the said sewer shall progress, there shall be assessed and charged upon the properties in front of which the same shall be completed, the sum of one dollar and fifty cents for each lineal foot of the front of the said properties.

SECT. 6. That it shall be a condition of such contract that the contractor shall accept the sums so assessed and charged under the foregoing section of this ordinance, in part payment of his contract price, and that he shall collect the same at his own cost; and the better to enable him so to do he may use the name of the City of Philadelphia, and employ all legal remedies or proceedings, whether of lien or otherwise, to which the said City may be competent.

SECT. 7. That payments may be made while the work of constructing the sewer is in progress by the Chief Commissioner of Highways in warrants upon the City Treasurer, charged to that portion of loan for "the building of a bridge over the River Schuylkill at Girard avenue, approved October 14, 1872," said payments in all cases to be made upon a certificate of the Chief Engineer and Surveyor estimating the amount of work done: *Provided*, That for all current estimates no payments shall exceed four-fifths of the money meritoriously earned under said contract, after deducting the ratable proportion of the assessments referred to in Section 5 of this ordinance; said payments to be made in the bonds of the City of Philadelphia or in cash, at the discretion of the Mayor.

SECT. 8. Satisfactory evidence shall be furnished by the contractor to the Chief Commissioner of Highways that full payment has been made for all labor done and materials furnished previously to drawing a warrant for the final estimate of any work done by virtue of this ordinance; and the Chief Commissioner of Highways shall require full and entire payment by the contractors of all labor and materials on account of such work; and the said Commissioner shall give one month's notice in two daily papers of the time at which final payment will be made on each and every final estimate.

W. L. ELKINS.	

RESOLUTION

To discharge the Committee on Finance from the consideration of a supplement to an ordinance to make an appropriation for the expenses of the House of Correction for the year 1877.

Resolved by the Select and Common Councils of the City of Philadelphia, That the Committee on Finance be discharged from the further consideration of a supplement to an ordinance entitled “An Ordinance to make an appropriation for the expenses of the House of Correction, Employment, and Reformation for the year 1877.”

APPENDIX No. 277.

Philadelphia, May 24, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN :—Your Committee on Finance respectfully report that they have considered a communication from the Chief Commissioner of Highways, submitting the names of those to whom the contracts for the construction of certain sewers were awarded, and also the names of their sureties ; and as bids were received for the construction of said sewers per quantities, and not per lineal foot (except the Dauphin street sewer), the Committee are of opinion that the Chief Commissioner should re-advertise them, believing it to be for the best interests of the City. They therefore submit the annexed resolution of instruction to re-advertise ; also, an ordinance to approve the contract and sureties of James M. Kreamer, and recommend their passage.

Very respectfully,

LOUIS WAGNER, <i>Ch'n</i> ,	W. L. ELKINS,
GEO. A. SCHAFER,	HENRY GLASS,
GEO. A. ENO,	JNO. COCHRAN,
GEO. T. JONES,	J. P. WOOLVERTON,
G. W. BUMM,	JOHN A. MISKEY,
JAS. R. GATES,	MAXWELL ROWLAND,
JOHN McCULLOUGH,	EDWARD MATTHEWS.

RESOLUTION

Of instruction to the Chief Commissioner of Highways to re advertise certain sewers.

Resolved by the Select and Common Councils of the City of Philadelphia, That the Chief Commissioner of Highways is hereby instructed to re-advertise the following sewers, viz. :

On Sellers and Unity streets; on Sansom street; on Lombard street; on Palmer street, and on Snyder avenue. Bids to be received for the construction of said sewers at a specific sum per lineal foot; the total cost of said sewers not to exceed the estimates of the Chief Engineer and Surveyor.

AN ORDINANCE

To approve the contract and sureties of James M. Kreamer, and to restrict the lien of the judgment.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the contract of James M. Kreamer, for the construction of the sewer on Dauphin street, be, and the same is, hereby approved, and that Robert W. Mackey and William A. Atwood be, and they are, hereby approved as the sureties of said James M. Kreamer for the faithful performance of the said contract.

SECT. 2. That the City Solicitor be, and he is, hereby instructed to file an agreement of record, restricting the lien of the judgment to be entered on the bond accompanying the said contract, as against the said surety, to premises situate at the northwest corner of Sixteenth and Master streets, containing in front on Sixteenth street 20 feet 7 $\frac{1}{4}$ inches, and in length or depth 172 feet 10 inches to Willington street; and premises, No. 128 South Ninth street, 20 by 100 feet. *Provided*, That said contract shall contain a clause that the said sewer shall be completed in all respects according to the plans, specifications, and estimates of the Chief Engineer and Surveyor, for the sum or price of twenty-two dollars and forty cents per lineal foot, and inlet seventy dollars.

MAYOR'S OFFICE,

Philadelphia, May 31, 1877.

To the Common Council
of the City of Philadelphia.

GENTLEMEN:—I herewith return, without my approval, “An Ordinance creating a public stand for cabs or hacks on the south side of the new Public Buildings, from Broad to Juniper streets.”

Rather than locate one of these nuisances in front of the Public Buildings, I would recommend the passage of an ordinance directing the removal of all hack, cab, and carriage stands from the highways.

Independence Square was recently improved at considerable expense, and is now an ornament to the City, yet Councils permit to remain on Fifth street, between Chestnut and Walnut streets, one of these public stands which is a disgrace to that locality, and a source of complaint from those doing business in the neighborhood, as well as pedestrians.

I have advised the removal of this stand, and cannot consent to the establishment of a like nuisance adjacent to the new Public Buildings.

The officers of the Presbyterian Church in the vicinity, also object to the location.

Very respectfully,

W. S. STOKLEY,
Mayor.

RESOLUTION

Of instruction to the Chief Engineer and Surveyor relative to Hart Creek sewer.

Resolved by the Select and Common Councils of the City of Philadelphia, That the Chief Engineer and Surveyor be directed not to issue any further or other certificates or estimates to R. A. Malone, of materials and work furnished and done towards the construction of the Hart Creek sewer.

APPENDIX No. 281.

Philadelphia, May 31, 1877.

To the President and Members of the
Common Council of the City of Philadelphia.

GENTLEMEN :—Your Special Committee appointed for the purpose of inquiring into the management and the manner of awarding contracts for supplies for the Almshouse, respectfully report that they proceeded to the discharge of their duties by holding several meetings, at which they examined the members of the Board of Guardians of the Poor, the officers of the institution, and various citizens in possession of facts relating to the management of the Almshouse.

The Committee were embarrassed by their inability to issue subpoenas for the attendance of witnesses which were compulsory, or to administer oaths which had any binding legal effect. It is to be hoped that the next General Assembly of the State will confer such powers in response to the repeated appeals of the Councils of this City.

Your Committee ascertained that the awarding of contracts at the Almshouse is exclusively delegated by the Board to the

monthly Committee on Supplies, consisting of three members in each month. This regulation seems unwise, since it must often happen that the monthly committee contains no person who is an expert in judging of the supplies or materials offered during that month, and the result is that the awarding of contracts in this manner does not commend itself to public confidence. The contracts should be awarded at meetings of the whole Board and in the presence of the Committee on Prisons, to whom the supervision of the Almshouse is committed.

Complaint was made that during the month of January last, the award of a contract for flour was not made to the lowest bidder. It however appeared that the monthly committee had accepted the offer of the lowest bidder, who offered flour, which in their judgment was of the required standard of excellency. The difference of price between the samples offered was twenty-five cents per barrel. There was no evidence to show that any improper influence had been used by the successful bidders.

The attention of the Committee was called to the fact that the bills for marketing for hospital and nurses' and matrons' tables for the various departments, had been approved without any very specific itemization. These supplies are purchased in the markets by the Superintendent, Major Ellis P. Phipps, who renders the bills monthly to the Board in his own name, and when they have been duly approved, receives a warrant from which he pays the various persons from whom purchases of marketing have been made. This has been the invariable usage of the Board in the past. It was in evidence that Major Phipps had formerly rendered bills with all the details of small purchases, but that so much clerical labor had been consumed that he was instructed by the Board to make a more condensed itemization, which furnished all the information regarded as necessary.

Your Committee found that the management by Major Ellis P. Phipps, had been highly commendable, and that he had discharged his duties in every respect with great fidelity.

Your Committee would however suggest, that the bills for marketing should in the future be itemized, and that they should be made out by the parties from whom the purchases are made.

The Committee found that the Guardians had purchased during the year many materials without advertisement, among these marketing, lumber, feed and other materials, amounting to over \$40,000. This had been done under the impression that purchases could be made more advantageously from certain parties, with whom the Board had previously dealt, than from any strangers responding to advertisements. The Board however expressed themselves willing to be guided in future by the opinions of your Committee as to their duty in reference to this matter.

Your Committee are clearly of the opinion that it is the duty of the Guardians of the Poor to obey the ordinances of Councils. The responsibility rests upon Councils, and the various Departments must submit to their legislation.

The Committee submit the annexed resolution which they ask to have passed.

JAMES C. SHEDWICK, *Ch'n*, JOHN A. CLARK,
WM. C. LAWSON, JOS. C. HERR,
WM. W. MORGAN.

RESOLUTION

To discharge the Special Committee appointed for the purpose of inquiring into the management and the manner of awarding contracts for supplies for the Almshouse.

Resolved by Common Council of the City of Philadelphia, That the Committee appointed for the purpose of inquiring into the management and the manner of awarding contracts for supplies for the Almshouse, be discharged from the further consideration authorizing the inquiry.

Resolved by the Select and Common Councils of the City of Philadelphia, That the Committee on Highways be, and are, hereby discharged from the further consideration of the ordinances authorizing the grading and paving of Thirty-fourth street, from Wharton street to Gray's Ferry road, in the Twenty-sixth Ward, and the widening of Girard avenue, Fortieth and Forty-first streets.

APPENDIX No. 297.

LAW DEPARTMENT,

Philadelphia, June 1, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—I have the honor to acknowledge the receipt of the resolution, passed yesterday, directing me to enter an appearance for the members of your bodies in the proceeding instituted by the Public Building Commissioners. This had already been done.

Your resolution also asks me to report to Councils “whether I desire additional counsel employed by the City in said suit?” In reply to which, I say that I do *not* desire additional counsel. During my term of office, I have uniformly opposed the expenditure of public money for such purposes, and yet if my client (the City) wishes to associate with me other counsel, perhaps I ought to acquiesce.

Should you so desire, I take the liberty of suggesting the name of E. Spencer Miller, Esq., a gentleman who in all litigations touching the powers and duties of the Building Commissioners, has represented the interest antagonistic to that body, and who is therefore thoroughly familiar with the questions likely to arise upon the hearing of the application for the mandamus.

Respectfully,

CHARLES H. T. COLLIS,

City Solicitor.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the City Controller be authorized and directed to make the following transfer in the annual appropriation to the Inspectors of the County Prison for the year 1877, viz.: From item 15, "for fuel," nine hundred dollars to item 19, to pay salaries of two additional keepers for the balance of the year 1877.

APPENDIX No. 300.

DEPARTMENT OF HIGHWAYS.

Philadelphia, June 7, 1877.

To the Presidents and Members of the Select and
Common Councils of the City of Philadelphia.

GENTLEMEN:—The bridge over Cobb's Creek at Market street and the eastern approach thereto has been completed, and I have sent a notice (of which I enclose a copy) to the Commissioners of Delaware County. Should they neglect or refuse to finish the approach on the western side, and this Department be called upon to do the work, some provision for the payment of the same will have to be made by your honorable bodies, as there is no item for it in the present appropriation.

Respectfully,
WM. BALDWIN,
Chief Commissioner of Highways.

To the Commissioners of Delaware County.

GENTLEMEN:—I hereby notify you that the repairs to the bridge across Cobb's Creek at Market street, being the county line between Philadelphia and Delaware counties, are completed, excepting the approaches thereto on your side thereof. Please inform me whether you intend doing this work, otherwise the city of Philadelphia will do it, and charge the expense thereof to your county.

Respectfully yours,
WM. BALDWIN,
Chief Commissioner of Highways.

APPENDIX No. 308.

Philadelphia, June 7, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—The Committee on Finance respectfully report, that they have considered “An Ordinance to authorize the construction of a sewer on Forty-second street, between Haverford and Market streets, in the Twenty-fourth Ward,” and being informed by medical authority, that said sewer is absolute necessary for sanitary purposes, submit the annexed ordinance to authorize its construction, and recommend its passage.

LOUIS WAGNER, <i>Ch'n</i> ,	JOHN BARDSLEY,
THOS. M. HAMMETT,	JAS. R. GATES,

SAMUEL R. MARSHALL,	HENRY GLASS,
GEORGE T. JONES,	JOHN A. MISKEY,
GEO. A. SCHAFER,	JOHN COCHRAN,
EDWARD MATTHEWS,	MAXWELL ROWLAND.

AN ORDINANCE

To authorize the construction of a sewer on Forty-second street, between Haverford and Market streets, in the Twenty-fourth ward.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Chief Commissioner of Highways is hereby authorized and directed to enter into contract with competent mechanics for the construction of a main sewer on Forty-second street, between Haverford and Market streets, in the Twenty-fourth Ward.

SECT. 2. That it shall be the duty of the Chief Engineer and Surveyor to prepare plans and specifications for said sewer, and that the contract entered into for the construction thereof shall be in accordance with such plans and specifications.

SECT. 3. That before entering into the said contract, the Chief Commissioner of Highways shall cause advertisements to be made for sealed proposals, for the construction of the sewer at a specific sum per lineal foot. The total cost of said sewer shall not exceed the estimates of the Chief Engineer and Surveyor for the work to be done, and no contract therefor shall be binding on the city of Philadelphia until the same shall have been approved by these Councils.

SECT. 4. That no proposal for the construction of the said sewer shall be considered by the said Chief Commissioner of Highways, unless accompanied by an engagement, in writing, from two or more sufficient sureties, guaranteeing the faithful execution of the contract in case such proposal be accepted.

SECT. 5. That as the completion of the said sewer shall progress, there shall be assessed, and charged upon the properties in front of which the same shall be completed, the sum of one dollar and fifty cents for each lineal foot of the front of the said properties.

SECT. 6. That it shall be a condition of such contract that the contractor shall accept the sums so assessed and charged under the foregoing section of this ordinance, in part payment of his contract price, and that he shall collect the same at his own cost; and the better to enable him so to do, he may use the name of the City of Philadelphia, and employ all legal remedies or proceedings, whether of lien or otherwise, to which the said City may be competent.

SECT. 7. That payments may be made while the work of constructing the sewer is in progress, by the Chief Commissioner of Highways, in warrants upon the City Treasurer, charged to that portion of loan approved October 14, 1872, for the construction of culvert on Thirtieth street, said payments, in all cases, to be made upon a certificate of the Chief Engineer and Surveyor estimating the amount of work done: *Provided*, That for all current estimates, no payments shall exceed four-fifths of the money meritoriously earned under said contract, after deducting the ratable proportion of the assessments referred to in Section 5 of this ordinance; said payments to be made in the bonds of the City of Philadelphia, or in cash, at the discretion of the Mayor.

SECT. 8. Satisfactory evidence shall be furnished by the contractor to the Chief Commissioner of Highways that full payment has been made for all labor done and materials furnished previously to drawing a warrant for the final estimate of any work done by virtue of this ordinance; and the Chief Commissioner of Highways shall require full and entire payment by the contractors of all labor and materials on account of such work; and the said Commissioner shall give one month's notice, in two daily papers, of the time at which final payment will be made on each and every final estimate.

APPENDIX No. 323.

OFFICE OF CHIEF ENGINEER AND SURVEYOR,

Philadelphia, June 14, 1877.

JOSEPH L. CAVEN, Esq.,

President of Common Council.

DEAR SIR :—Since submitting to Councils on the 24th ult. plans for a swing bridge at Penrose Ferry of 306 feet in length, with a fixed span of 93 feet, I have prepared plans and specifications for a single span of 411 feet, which would be much more satisfactory to those directly interested in commerce on the river Schuylkill.

In order that proposals for the single long span might come within the appropriation, sidewalks, for which there is no pressing need at this locality, are dispensed with. Although the old shore piers are light for the service of the new bridge, their strength can be practically tested by the weight of the superstructure when erected. There is reason to believe that they will be sufficient for the purpose without the expense of rebuilding.

The enlarged draw will be much better for river navigation, and as the bridge can be built of the full span on more favorable terms to the City than anticipated, the lowest proposal received being \$67,500, about \$12,000 less than the amount appropriated; I recommend that the subsequent plan should be adopted, and therefore send it herewith for your consideration.

When this is authorized by your honorable bodies, I should ask the authority of Councils to make the usual appointment of a competent assistant engineer to constantly supervise the work.

Respectfully submitted,

SAML. L. SMEDLEY,
Chief Engineer and Surveyor.

GEN. C. H. T. COLLIS,
City Solicitor.

DEAR SIR:—In the matter of the application for a writ of *quo warranto* against Samuel P. Hancock, City Controller, I have concluded that it is not a case warranting my interference, for the proceedings could not be sustained if the writ were issued.

It was admitted upon the argument, and the facts prove it, that the last act of Mr. Hancock upon which a forfeiture of his office could be predicated, was on the 8th of June, 1874, and he was again elected to another term in November, 1874. Without discussing the question whether his acts worked a forfeiture, which is unnecessary under the view which I take of the case, but assuming that they did, the forfeiture was immediate upon the acts being committed. The forfeiture followed the act, without the intervention of the writ of *quo warranto* to declare it, and the office reverted to the people who gave it. But the judgment of ouster could be pronounced only under a proceeding on a writ of *quo warranto*, which could have been issued at the time; and if proceeded in to judgment before the expiration of his term, he would have been ejected. And that would have been the only consequence of such a proceeding.

A forfeiture of an office, and judgment of ouster pronounced upon it, will not disfranchise a man, or render him incapable of holding an office thereafter. The ejection from the office is the only penalty in that proceeding, and the people to whom the office reverts by forfeiture can elect him to the same or any other office. If they can do it after his office has been judicially declared forfeited in a proceeding by *quo warranto*, *a fortiori* can they re-elect him where the forfeiture has not been judicially determined.

It is the office, or the term of office, held at the time of the act done, which is forfeited, and not the right to hold an office. And much less do the people forfeit their right to elect him, or any one they please, who is laboring under no legal disqualification. The voters did re-elect Samuel P. Hancock to the office of City Controller in November, 1874, after the act complained of had been committed, as it was their right to do, and as he has committed no act during that term by which it is claimed he has forfeited his office, and as he is still holding under that term, no sufficient ground has been shown for a *quo warranto*, and the writ is therefore refused.

Very respectfully,
Your obedient servant,
GEORGE LEAR,
Attorney General.

Philadelphia, June 21, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—The Committee on Finance respectfully report that they have considered a communication from the Chief Engineer and Surveyor, relative to the erection of Penrose Ferry Bridge; also a communication from the Chief Commissioner of Highways, submitting a copy of the contract, together with ordinance approving the plans, contract, and sureties, and submit the annexed ordinance to approve the contract and sureties, and to authorize the appointment of a competent assistant engineer, and recommend its passage.

Very respectfully,

LOUIS WAGNER, <i>Ch'n</i> ,	ROBT. B. SALTER,
JOHN BARDSLEY,	THOS. M. HAMMETT,
JOHN A. CLARK,	MAXWELL ROWLAND,
JOHN P. WOOLVERTON,	WM. ARMSTRONG,
GEO. A. SCHAFER,	JAS. R. GATES,
EDW. MATTHEWS,	J. C. BICKEL,
JOS. J. MARTIN,	W. S. REYBURN.

THIS AGREEMENT, made this ninth day of July, in the year of our Lord one thousand eight hundred and seventy-seven, between the City of Philadelphia, party of the first part, and Joseph H. Cofrode and Francis H. Saylor, copartners, under the firm of Cofrode & Saylor, parties of the second part, *Witnesseth*, That the parties of the second part, for and in consideration of the payments hereinafter specified, and agreed to be made by the parties of the first part, hereby covenant and agree to furnish and deliver all the materials, and to do and perform all the work and labor required to be furnished and delivered, done and performed, in and about the rebuilding of part of Penrose Ferry Bridge, over the Schuylkill River, in the Twenty-sixth and Twenty-seventh Wards of the City of Philadelphia, including the removal of parts of the present bridge, in strict and entire conformity with the terms and conditions of this agreement, and of the specifications hereto attached, which said specifications are hereby made part of this agreement as fully as if the same had been herein at length set forth.

The parties of the second part further covenant and agree that all of said materials shall be the best of their several kinds and qualities, and that all of said work and labor shall be done and performed in the best and most workmanlike manner. They further covenant and agree that all of said materials shall be furnished and delivered, and all of said work and labor shall be done and performed, to the entire satisfaction and approval of the Chief Engineer and Surveyor of the City of Philadelphia.

The parties of the second part further covenant and agree that in case any of said materials or work shall be rejected by the said Chief Engineer as defective or unsuitable, then such materials shall be removed, and replaced with other materials; and such work shall be taken down and done anew, to the satisfaction and approval of the said Chief Engineer and Surveyor, at the cost and expense of the parties of the second part.

The parties of the second part further covenant and agree that they will be responsible for, and pay all loss or damage which may in any manner arise during the execution of the work provided for under this contract, by reason of the execution of the said work.

The parties of the second part further covenant and agree that they will furnish and deliver all of said materials, and fully complete all of said work, to the satisfaction and approval of the Chief Engineer and Surveyor as aforesaid, and so that the said bridge shall be ready for immediate use and travel on or before the ninth day of January, A. D. 1878. And in case the said work shall be delayed beyond that day, or beyond the day of the termination of such extension of said time, as may be agreed upon in conformity with the clause hereinafter providing for an extension of said time, then the parties of the second part hereby further covenant and agree to pay to the party of the first part the sum of fifty dollars per day for each and every day during which the said work shall be so delayed ; the said sum of fifty dollars per day to be paid as liquidated damages, and not as a penalty.

The parties of the second part further covenant and agree that they will keep the said work in complete order and repair for the full term of two years from and after the date of the final payment provided to be made under this contract.

The parties of the second part further covenant and agree that they will not assign, transfer, nor sublet this contract.

It is further expressly understood and agreed by and between the parties hereto, and it is hereby made part of this contract, that in addition to the sum of fifty dollars per day, hereinbefore provided to be paid in case of the delay in the completion of the said work, beyond the period herein provided for its completion, if, in the opinion of the said Chief Engineer and Surveyor, the parties of the second part shall prosecute the said work with an insufficient force of workmen or materials, or shall neglect or refuse to remove such materials as shall be rejected as defective or unsuitable, and to replace the same with other materials as hereinbefore provided, or shall neglect or refuse to take down and to build anew such work as shall be in like manner rejected, then in any such case the said Chief Engineer and Surveyor shall be at liberty, and he is hereby expressly authorized and empowered, upon giving ten days' notice to the parties of the second part of his intention so to do, to purchase such materials as may be required, and to employ such workmen, or to enter into such contract or contracts, at the then

market rates, as in his opinion shall be most advantageous for the prompt completion of the said work, at the cost and expense of the parties of the second part.

It is further expressly understood and agreed that nothing in this contract, or in the specifications annexed, shall be held or construed to preclude the party of the first part from contesting the estimates or certificates of the Chief Engineer and Surveyor, which may be furnished hereunder; but the party of the first part shall be at full liberty to take every lawful defence to any claim of the parties of the second part under this contract, or under such estimates or certificates, or to the character, quality, or quantity of the materials or work furnished or done under this agreement, or to the manner or time in which the same shall be furnished or done, notwithstanding such estimates, or certificates, or payments thereunder.

In consideration of the premises, the party of the first part hereby agrees to pay to the parties of the second part the sum of sixty-seven thousand five hundred dollars; payments to be made from time to time, not oftener than once in each month, upon estimates to be made by the Chief Engineer and Surveyor, and one-fifth of the amount of each estimate to be retained until the completion of the entire work, when a final estimate and full payment shall be made. All of said payments shall be made in City warrants, drawn by the Chief Commissioner of Highways upon the City Treasurer, and the said warrants shall be accepted as cash by the parties of the second part.

In witness whereof, The corporate seal of the party of the first part, attested by the Mayor of the said City, hath been hereto attached, and the parties of the second part have hereto set their respective hands and seals, the day and year first above written.

Sealed and delivered in the presence of ("July" being first written on erasure in the date), as to Cofrode & Saylor. }

OTIS EGAN.

JOSEPH H. COFRODE, [SEAL.]
FRANCIS H. SAYLOR, [SEAL.]
COFRODE & SAYLOR, [SEAL.]

AN ORDINANCE

To approve the contract and sureties of Cofrode & Saylor for the erection of the Penrose Ferry Bridge, and to authorize the employment of an assistant engineer.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That Percival Roberts and A. & P. Roberts be, and the same are, hereby approved in the sum of thirty-three thousand seven hundred and fifty dollars as sureties of Cofrode & Saylor, for the erection of the Penrose Ferry Bridge, and that the contract submitted to Councils between the City of Philadelphia and the said Cofrode & Saylor be, and the same is, hereby approved: *Provided*, The said Cofrode & Saylor shall deliver to the City Solicitor the usual bond and warrant attached for thirty-three thousand seven hundred and fifty dollars, to be entered of record as all similar security bonds for the performance of contracts with the City are recorded, and to be entered up in the proper county as well as in the county of Philadelphia: *And provided further*, That the said Cofrode & Saylor shall bind themselves to complete the said bridge according to the plans and specifications of the Chief Engineer and Surveyor, for the price bid, and to keep the said bridge in good order and repair for the space of two years from the final payment.

SECT. 2. That the Chief Engineer and Surveyor is hereby authorized to appoint a competent assistant engineer, to be on the ground, in charge of the work, on behalf of the City, for the space of six months, at one hundred and fifty dollars per month, to be paid out of the appropriation for the erection of Penrose Ferry Bridge.

AN ORDINANCE

To approve the contract and sureties of William B. Griffith & Co., for the construction of the Sansom street sewer, and to restrict the lien of the judgment.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the contract of W. B. Griffith & Co., for the construction of the main sewer on Sansom street, be, and the same is, hereby approved, and that John Gillespie and Thomas Gillespie be, and they are, hereby approved as the sureties of the said W. B. Griffith & Co., for the faithful performance of the said contract. *Provided*, That the said contract shall contain a clause that the said sewer shall be completed, in all respects, according to the plans, specifications, and estimates of the Chief Engineer and Surveyor, for the sum or price of forty-nine dollars and ninety-eight cents per lineal foot.

SECT. 2. That the City Solicitor be, and he is, hereby instructed to file an agreement restricting the lien of the judgment to be entered on the bond accompanying said contract to the following described properties of the said John and Thomas Gillespie, viz.: brick messuage and tenement, and five acres one hundred and twenty-seven perches of land, in late township of Passyunk, County of Philadelphia, seven acres of land in the late District of Moyamensing, Twenty-sixth Ward, and lot on the east side of Twenty-first street north of Tasker street.

APPENDIX No. 360.

Philadelphia, June 20, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—Your Committee on Surveys and Regulations, to whom was referred an ordinance to revise the grades on Forty-sixth street, between Woodland avenue and

the Schuylkill river, in the Twenty-seventh Ward, beg leave to report that the carrying out of the present plan will entail a large amount of excavation, and the very objectionable feature of a grade crossing at the Westchester Railroad, the necessity for either of which can be removed by so altering the plan as to provide for a bridge crossing at the railway. Your committee, therefore, recommend that the Department of Surveys be authorized to revise the plan, and submit an ordinance for that purpose.

AN ORDINANCE

To establish the grade of Forty-sixth street, between Woodland avenue and the river Schuylkill.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Department of Surveys be authorized to make revision and establish the grades on Forty-sixth street, in the Twenty seventh Ward, from Woodland avenue to the Schuylkill river, no expense to the City.

APPENDIX No. 361.

Philadelphia, June 21, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—Your Committee on Surveys and Regulations, to whom was referred the accompanying ordinance

and petition to repeal an ordinance to construct a sewer on Unity and Sellers streets, beg leave to report in consideration of the facts set forth by the petitioners, and the cost to the City arising from the nature of the ground through which the sewer must pass, your Committee recommend that the construction of the sewer be postponed for the present, and return the ordinance for your approval.

Very respectfully,

R. KLAUDER, <i>Ch'n</i> ,	JOS. H. TATEM,

AN ORDINANCE

To place upon the Public Plan a road in the Twenty-third Ward.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Department of Surveys be, and they are, hereby authorized to place upon the Public Plan a road thirty-three feet in width, extending from the Bensalem road to the Poquessink creek, connecting with and being a continuation of a road in Bucks County, the said road having been dedicated to the City of Philadelphia as a public highway by deed on file in the Department of Surveys.

APPENDIX No. 363.

Philadelphia, June 20, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—Your Committee on Surveys and Regulations, to whom was referred the accompanying petition to widen Coulter street, between Germantown avenue and the Philadelphia and Reading Railroad, beg leave to report, that the measure proposed will result in making the street of uniform width, and in the erection of buildings of a much better character than would otherwise be the case; it is therefore recommended that the authority to widen the street be given to the Department of Surveys, with the proviso that the City be put to no cost for the opening of the same to the new line.

AN ORDINANCE

To revise the lines of Coulter street, between Germantown avenue and Cumberland street.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Department of Surveys be, and is, hereby authorized to revise the City Plan so as to increase the width of Coulter street, between Germantown avenue and Cumberland street, in the Twenty-second Ward: *Provided*, That the opening of the said street to its new width shall be at no cost to the City.

APPENDIX No. 364.

Philadelphia, June 20, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—Your Committee on Surveys and Regulations, to whom was referred the accompanying petition to strike Grape street, between Fortieth and Preston streets, from the City Plan, beg leave to report, that in view of the strong reasons adduced by the petitioners, of the street having never been opened by course of law, or otherwise, or used as a street; that its opening would render it impossible to improve the ground by erecting buildings suitable to the locality, and that its opening will be attended with considerable cost to the City for damages, &c., it is recommended that the prayer of the petitioners be granted, and that the street be stricken from the plan.

AN ORDINANCE

To strike Grape street, from Fortieth to Preston street, from the City Plan.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That Grape street, between Fortieth street and Preston street, in the Twenty-fourth Ward, be stricken from the plan of the City, and that the Department of Surveys be, and is, hereby authorized to prepare a plan for that purpose.

APPENDIX No. 365.

Philadelphia, June 20, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—Your Committee on Surveys and Regulations, to whom was recommitted an ordinance to construct a sewer on Grape street, beg leave to report that they are of the opinion that in view of the alleged inability of the owners of property in said street to contribute to the cost, and the imperative necessity of its construction and use to the health and convenience of the public not being apparent, its construction need not be ordained at this time. Your committee, therefore, respectfully ask to be discharged from the further consideration of the subject.

RESOLUTION

To discharge the Committee on Surveys and Regulations from the further consideration of an ordinance to build a sewer on Grape street.

Resolved by the Select and Common Councils of the City of Philadelphia, That the Committee on Surveys and Regulations be discharged from the further consideration of an ordinance to build a sewer on Grape street, from Thirty-eighth to Union street, in the Twenty-fourth Ward.

APPENDIX No. 366.

Philadelphia, June 20, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—Your Committee on Surveys and Regulations, to whom was referred a resolution directing the construction of a sewer on Spring Garden street, between Thirty-eighth and Thirty-ninth streets, report that this sewer seems not to be imperatively required for public health and cleanliness, and as many of the property owners on its line oppose its construction, your committee recommend that its construction, for the present, be postponed, and offer the accompanying resolution.

RESOLUTION

To discharge the Committee on Surveys and Regulations from the further consideration of a resolution for the construction of a sewer on Spring Garden street.

Resolved by the Select and Common Councils of the City of Philadelphia, That the Committee on Surveys and Regulations, to whom was referred the resolution for the construction of a sewer on Spring Garden street, between Thirty-eighth and Thirty-ninth streets, be discharged from the further consideration of the subject.

APPENDIX No. 367.

Philadelphia, June 20, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN :—Your Committee on Surveys and Regulations, to whom was referred the accompanying ordinance for the construction of a sewer on Thirtieth street, from Pennsylvania avenue to Jefferson street, report, that this sewer will carry the drainage of several hundred acres by the way of Pennsylvania avenue sewer, and empty into the river Schuylkill at Wood street, which now goes into Fairmount reservoir at Girard avenue bridge. We herewith present an ordinance that will cover the case, and respectfully ask its adoption.

R. KLAUDER, <i>Ch'n</i> ,	JOS. H. TATEM,
JOHN P. WOOLVERTON,	D. B. WENDLE,
DAVID WALLACE,	JAMES R. GATES,
JOS. G. HAINES,	F. DUNDORE,
ROBERT J. HANBY,	JOHN FOX,
JOS. J. MARTIN,	BENJAMIN ALLEN,
HENRY GLASS.	

AN ORDINANCE

To authorize the construction of a sewer on Thirtieth street, from Pennsylvania avenue to Jefferson street, in the Twenty-ninth Ward.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Chief Commissioner of Highways is hereby authorized and directed to enter into a contract with mechanics for the construction of a main sewer on Thirtieth street, from Pennsylvania avenue to Jefferson street, in the Twenty-ninth Ward.

SECT. 2. That it shall be the duty of the Chief Engineer and Surveyor to prepare plans and specifications for said sewer, and that the contract entered into for the construction thereof, shall be in accordance with such plans and specifications.

SECT. 3. That before entering into the said contract, the Chief Commissioner of Highways shall cause advertisements

to be made for sealed proposals, for the construction of the sewer at a specific sum per lineal foot. The total cost of said sewer shall not exceed the estimates of the Chief Engineer and Surveyor for the work to be done, and no contract therefor shall be binding on the City of Philadelphia until the same shall have been approved by these Councils.

SECT. 4. That no proposal for the construction of the said sewer shall be considered by the said Chief Commissioner of Highways, unless accompanied by an engagement, in writing, from two or more sufficient sureties, guaranteeing the faithful execution of the contract in case such proposal be accepted.

SECT. 5. That as the completion of the said sewer shall progress, there shall be assessed, and charged upon the properties in front of which the same shall be completed, the sum of one dollar and fifty cents for each lineal foot of the front of the said properties.

SECT. 6. That it shall be a condition of such contract that the contractor shall accept the sums so assessed and charged under the foregoing section of this ordinance, in part payment of his contract price, and that he shall collect the same at his own cost; and the better to enable him so to do, he may use the name of the City of Philadelphia, and employ all legal remedies or proceedings, whether of lien or otherwise, to which the said City may be competent.

SECT. 7. That payments may be made while the work of constructing the sewer is in progress, by the Chief Commissioner of Highways, in warrants upon the City Treasurer, charged to that portion of loan "for the building of a bridge over the Schuylkill at Girard avenue, approved October 14, 1872," said payments, in all cases, to be made upon a certificate of the Chief Engineer and Surveyor estimating the amount of work done: *Provided*, That for all current estimates, no payments shall exceed four-fifths of the money meritoriously earned under said contract, after deducting the ratable proportion of the assessments referred to in Section 5 of this ordinance; said payments to be made in the bonds of the City of Philadelphia, or in cash, at the discretion of the Mayor.

SECT. 8. Satisfactory evidence shall be furnished by the contractor to the Chief Commissioner of Highways that full

payment has been made for all labor done and materials furnished previously to drawing a warrant for the final estimate of any work done by virtue of this ordinance; and the Chief Commissioner of Highways shall require full and entire payment by the contractors of all labor and materials on account of such work; and the said Commissioner shall give one month's notice, in two daily papers, of the time at which final payment will be made on each and every final estimate.

APPENDIX No. 368.

Philadelphia, June 20, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—Your Committee on Surveys and Regulations, to whom was referred the accompanying ordinances for the construction of branch sewers, report that the necessities for drainage in the localities named require early attention, that newly improved properties may be occupied, and the surface water now running over their areas properly placed under ground. Your Committee ask to have special attention directed to the recommendation for a sewer on Reed street, from Twelfth to Sixteenth street; this has been, after careful examination by the Board of Surveyors, approved in lieu of one upon Wharton street, from Thirteenth to Sixteenth street, as the relief asked for can more readily be obtained by the adoption of Reed street line. The aggregate length of these sewers will be 5,289 feet, costing to property owners on their lines \$11,485, and to the City not exceeding \$2000. We respectfully ask the adoption of the ordinance herewith submitted.

JAS. R. GATES,
F. DUNDORE,
JOHN FOX,
BENJ. ALLEN.

AN ORDINANCE

To authorize the construction of sewers on Warnock, Orianna, Reed, Vine, Ninth, and Delancey streets.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Department of Highways be, and is, hereby authorized to construct the following sewers with an inside diameter of three feet, viz. : on Warnock street, from York street to the north house line of Huntingdon street; on Orianna street, from Norris street northward four hundred and sixteen feet; on Reed street, from Twelfth to Sixteenth street; on Vine street, from Broad to Perry street; on Ninth street, connecting with sewers at Race and Vine streets, and a fifteen-inch diameter vitrified drain pipe on Delancey street (late Cox street,) from Seventeenth to Eighteenth street. Said sewers to be built in accordance with specifications prepared by the Chief Engineer and Surveyor.

SECT. 2. The Chief Commissioner of Highways shall advertise according to law, announcing that bids will be received for the sewers above designated, and he shall allot them to the lowest bidders; and it shall be a condition of the contracts that the contractor shall keep the said sewers, and that portion of the street along which the said sewers shall be laid, in good order and repair for three years from and after the date of the completion of the said sewers; and shall accept the sums assessed upon and charged to the properties lying on the lines of said sewers, in manner and form authorized by ordinance entitled "An Ordinance regulating the assessment upon property for the construction of branch culverts or drains," approved May 12, 1866, and supplement thereto approved February 16, 1869; any excess over and above said assessment, in addition to that provided for by ordinance entitled "An Ordinance authorizing the Chief Commissioner of Highways to draw warrants for street intersections, manholes, and legal deductions in the construction of branch sewers," approved April 3, 1868, to be charged to Item (for branch sewers) of annual appropriation made to the Department of Highways for the year 1877; *Provided*, Said excess does not exceed the sum of two thousand (2,000) dollars.

APPENDIX No. 370.

DEPARTMENT OF HIGHWAYS, BRIDGES, AND SEWERS,
Philadelphia, June 29, 1877.

To the Presidents and Members of the Select and

Common Councils of the City of Philadelphia.

GENTLEMEN :—As the City is constantly suffering from the persistent removal of guards placed on the highways to protect the paving and repaving of streets, and as there appears

to be no adequate provisions for stopping the evil, I would ask your honorable bodies to pass such an ordinance as will give the Chief Commissioner of Highways power to protect the work upon the streets by stopping travel over the same, until it shall be in condition to open for public use.

Very respectfully,

WILLIAM BALDWIN,

Chief Commissioner of Highways.

APPENDIX No. 371.

Philadelphia, June 29, 1877.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN :—At a meeting of the Board of Commissioners of the Fire Department, held on Tuesday, June 26th, William Davis was awarded a contract to build a fire station-house at Clearfield and Belgrade streets, in accordance with plans and specifications, for the sum of seven thousand one hundred and eighty-three (7,183) dollars.

The Board respectfully ask that the requisite appropriation may be made out of loan for fire purposes.

Yours, &c.,

JNO. R. CANTLIN,

Secretary.
